From the Wellsville correspondent to the Cuba Patriot:

Howell's Hotel needs enlarging again. He hasn't room for those who come. An average of sixty at dinner each day, and a large barn filled with horses and wagons is the story of that house. Howell really thinks he will not go back to Almond.

SEEK UP.—Stephen M. Perry, who was indicted at the last sitting of the Grand Jury, for stealing a cow from W. H. H Russell, our County Clerk, at Belmont, was tried at the County Court held at Angelica last week, was found guilty, and sentenced for three years.

Address E. Lloyd, 30 Courtlandt street, New York.

PICNIC.—The scholars and parents of the Sabbath Schools of this place are requested to meet at the Presbyterian Church, at 10 o'clock, on Thursday morning, Sept. 1st, when they will march to the grove, "which will be followed by speaking, singing, &c." After these exercises the sweetmeats will be liberally served.

We have been notified that a span of bay horses 15 hands high, with some white in their faces and several white feet, were found on the premises of Wm. Bryce, of Hamden, Delaware county, N. Y., on the morning of July 25th. The horses are supposed to have been stolen, and the owner can have them by proving property and paying charges

The picnic of the Catholic Benevolent Temperance Association on Monday, was a complete success, both as an enjoyable festivity and in a financial point of view. The ladies acquitted themselves in their management of affairs at the grove, and the night was made joyous with music and dancing at the Always Hall, continued till two o'clock in the morning. The gross receipts were $32.—*Oswego Gazette.*

The September number of Harper's Monthly is unusually interesting. An article on "The Mediterranean of the Pacific" gives much valuable information about the Puget Sound region and this is followed by a second paper on Canterbury in "The South Coast Sauntterings in England." "Among the Peaches" is an illustrated paper on a juicy subject, besides which there are papers on Charles Dickens, Wall Street, a Modern Bill of Fare, and the usual serials, stories, and poetry. The Drawer has some new anecdotes about the late James T. Brady, and the whole number is delightful.

Choice brands of Family Flour at J. J. Harman's.

AN EXAMPLE.—At the Court at Angelica last week, Isadore Trinkle plead guilty to larceny and burglary, and was sent to the House of Refuge at Rochester. This should serve as a warning to all boys who are in the habit of helping themselves from their neighbors' gardens and orchards. It is most to common a thing for boys and even young men to go nights skulking around in their neighbors gardens and orchards helping themselves to whatever they see fit to take, and destroying what they do not take, and we are now glad to see this light check drawn upon it.

THE LADY'S FRIEND FOR SEPTEMBER.—A capital number. The steel plate is quiet, domestic scene, the colored fashion plate specially airy and elegant, even for this magazine, and the colored embroidery pattern, brilliant. "Under the Ivied Bridge" looks enchantingly cool these dry hot summer days. The illustrations of children's and ladies' fashions are graceful and stylish—just what ladies of taste require. The music is a new and pretty song, "Eoline." Fresh and spirited as the literary matter of this magazine always is, each number seems better than the last. That favorite writer, Miss Douglass, begins a new continued story—"Solid Silver; or Christie Deane's Bridal Gifts," which is in her best vein; and Miss Prescott, "ever charming, ever new," continues "The Cascannon's Aunt." "By the Silver Sea" is a sprightly and appropriate story; and the poem, "Only

ALMOST A FIRE.—Quite a little excitement was raised at the Rochester Boot and Shoe store of G. Eggleston, on Friday evening last. A kerosene lamp which was suspended by a cord fell to the floor and the burning fluid covered a large portion of the floor, threatening for a time the most serious results. Mr. Eggleston, with great presence of mind, covered the burning oil with a carpet and then deluged it with water, which of course raising the kerosene from the floor was immediately extinguished. This mode of putting out a fire of this kind is well worth remembering, as it will be found that water applied directly without a covering of some kind, would but spread the fire instead of extinguishing it, and increase the chances of a "regular burn up."—*Warsaw Democrat.*

BELMONT CORRESPONDENCE.

BELMONT, Aug. 24, 1870

On the night of August 20th we had a brilliant display of the Aurora Borealis, as fine as is seldom witnessed. They extended from E. S. E. to due West, and the tongues of light darted through the sky until they met in the middle of the heavens, making a most beautiful sight. They looked almost like animated beings so varied and changeful were they, first shooting up with the rapidity of lightning and then receding; starting out full and bright like a flame of fire, and then dying away until scarcely a trace could be seen of them. They lasted but a short time. We are waiting impatiently for Science to explain the cause of this beautiful phenomena and we hope not in vain. Already we have advanced from the darkness of superstition, regarding them and will soon be in the broad day of knowledge. We no longer look upon them with fear, regarding them as an omen of trouble and disaster, but with wonder ready each moment to exclaim "How great are the wonders of God."

It is absurd to suppose that men are incapable of making mistakes but we naturally look upon our distinguished fellow citizens as least liable to err and more readily believe their declarations than those of more humble men. In proof of how mistaken an idea this is, let the following show.

of electricity. How nice it will be for future generations to read such statements as that. They cannot fail to have an exalted opinion of their ancestors knowledge.

There is another new bridge being built on Greenwich Street.

The stone masons are repairing the piers to the railroad bridge. Quite a number of the middle pier had become displaced by the action of the water.

ALMOND CORRESPONDENCE.

ALMOND, August 24th, 1870.

MR. EDITOR: After a brief absence from Almond I have returned again to enjoy the smiles and companionship of those I love. Nothing of importance has transpired here since I last wrote you. Business is very brisk; and our citizens are actively engaged at their respective callings.

The gallant Knights of St. Crispin, (the Shoemakers), who work for our enterprising townsman, William Richardson, Esq., are pegging away from early dawn till late at night. One of their number informed me that the shoe business never was better than it is at present They do not apprehend any danger arising from Cootie emigration, as Mr. Richardson is perfectly satisfied with his present workmen. One who pretends to know, says that Mr. R. turns out the best boots and shoes made in Western New York. And judging from personal observations I think that the Crispins of Almond reflect great credit upon the organization; for a more gentlemanly and industrious class of workmen cannot be found anywhere. They are courteous, intelligent and charitable; and if any of their number is in destitute circumstances, some how or other his wants are supplied, and no one knows from whence it cometh the gift.

I regret to have to record the sudden death of one of our quiet and loading citizens. Rev. William Sanders jr. died here Yesterday while visiting some friends in Hornellsville he dropped dead, and to-day they have consigned his body to the cold, cold grave.

Our industrious citizen Mr. Isaac Ransom, who has been very ill with typhoid fever is recovering fast. It would be a great loss to our village to lose a man of such sterling qualities and business energy.

The business at the foundry is flourishing as ever, under the supervision of their master mechanic the inimitable S.

Mr. Dunlap was in town recently, looking his old home. He produced quite a change in Washington Street. Not only the old house but also the old owner and shop will have entirely disappeared soon as the Almanac lies, and things have passed away, and behold all things are become new.

Vacation is almost passed out, and our distinguished citizen, Rev. Mr. Bingham will soon commence his second term at the Academy.

Miss Lettie Ball still continues her labors in behalf of the juveniles at the District School.

Miss Ella Lowe has opened a school at Stillman's Hall; and as she is highly spoken of as a teacher, we doubt but that she will easily obtain the number of scholars she desires for.

Base Ball still continues to be the rage here The "Pioneers" went to Alfred a short time since and *wooed* the "National Stars," and as it caused a good deal of dissatisfaction at the Bridge, the citizens of Baker's Bridge issued a challenge to the indomitable "Shoo Flys," and last Monday Almond turned out *en masse* and accompanied the *Flys* to the seat of war. I understand that the *Flys* played a good game, but the Nationals played a good deal better, as the score stood thus—Nationals 37; Shoo Flys 25.

The stars are coming down here next week, and you bet they'll have to git up and git if victory perches upon their banners a second time.

Well, Mr. Editor, how do you all get along up there? How is Mr. and Mrs. Everitt, Messrs. Harman, Green, Allen, Benton & Crandall, Shaut, Porter & Barney, and last but not least the pretty girls? Nuff sed

Eternal Justice.

The following poem, by Charles Mackay, was read before the members of "Forest Home Lodge," on Friday evening, Aug. 12th, and by them requested to be published in the Andover *Advertiser*

The man in thought a knave, or fool,
Or bigot, plotting crime;
Who, for the advancement of his kind,
Is wiser than his time.
For him, the hemlock shall distill;
For him, the axe be barred;
For him, the gibbet shall be built;
For him, the stake prepared.
Him, shall the scorn and wrath of men
Pursue with deadly aim:
And malace, envy, spite and lies,
Shall desecrate his name.

They may crush to earth the lamp of clay,
That holds a light divine;
But they cannot quench the fires of thought
By any such deadly wine;
They cannot kill by spoken words
From the mindom of mand
By all the poison that ever flowed
Since time its course began.
To-day abhored, to-morrow adored,
So round and round we run;
And ever the truth comes uppermost,
And ever in justice done.
Plod in thy cave grey anchorite;
Be wiser than thy peers;
Augment the range of human power,
And trust to coming years.
They may call thee wizard, monk, accursed;
And hag thee with dispraise,
Thou were born five hundred years too soon
For the comfort of thy days
But not too soon for human kind;
Time hath reward in store;
And the demon of our lives become
The saints that we adore.
The blind can see, the slave is lord;
So round and round we run;
And ever the wrong is proved to be wrong,
And ever is justice done.
Keep Galileo to thy thought:
And nerve thy soul to bear
The scornful words, they gloat to sling
From the pangs of thy despair.
They may veil their eyes, but they cannot hide
The such meridian glow;
The heel of pride may tread thee down,
And a tyrant work thee woe.
But never a truth has been destroyed,
They may curse and call it crime;
Perverted, hateful, or slandered and slay
Its teachers for a time;
But the christened age shall light the way.
As round and round we run
And the truth shall ever come uppermost,
And justice shall be done.

And lo! there is a new [illegible] as those,
With thoughts like those of old;
Many have died in their misery
And left their thoughts enobled
At length I've read an article, as usual,
And placed in the cold world's ban,
For scoffing at the Keen far-reaching
Plan, [illegible]
Three centuries in the van.
They toil in poverty and want,
