Mother's Day

SUNDAY, MAY 13, marks the annual observance of Mother's Day. This day, the second Sunday in May, has been set aside most aptly to pay homage to the one whom, of all living human beings, we owe the most—the one whose love is never failing and who never knows too great a sacrifice, when the happiness and welfare of her children are concerned.

The day will be marked with special programs in the churches, family gatherings, gifts and other fitting tributes. Everyone should make a special effort to be with his or her mother on this day if at all possible. If it is impossible, then a message and a token of your love should be sent to help make her happy.

The chief purpose of the observance of one particular day as Mother's, embraces the simultaneous honoring of mother thruout the world as an impressive acknowledgement of the love and reverance all men and women owe their mothers. And, the we stress this one day, Mother's Day should be observed every day of the year for it should be in every heart to do so. The love felt by a mother for her children and her children for her, are things apart. They are proved by service and sacrifice, not by words or special acts of devotion on one particular day. They need no special emphasis.

"Play Ball"

THE crack of the bat meeting leather has already resounded thruout the country. The sandlotters have been at it every suitable day this spring. Now the big leagues have officially opened another season of the great American game. And it promises to be a successful and exciting season.

Organized baseball teams have suffered keenly during the past two or three years due to the depression. Gate receipts dwindled and only a very few clubs were able to keep out of the red. Salaries and operating expenses were cut greatly in an effort to stem the tide of increasing deficits in operation. There was no reason to believe that interest was lacking, only the fact that the public could not afford to attend games regularly.

This season, however, it is expected that improved business conditions will be reflected in the attendance in all cities where organized baseball operates.

It is expected that enthusiasm will be kept at its height all season by the predicted close races for the respective pennants. Every league has several real contenders for honors this year, while in the past, one or two teams so often dominated each league.

People with gold teeth find plenty of chances to laugh.

Give Nature a Hand

SPRING time is planting time—the time to help Nature in her work of making gardens and lawns beautiful again. Seeds should be planted, and shrubbery, bushes, flowers and other plants put into place that we may share in the bounties at harvest time.

Whether we plant vegetables, beautiful flowers or lawn ornamentations, the great benefit to be derived in beauty of appearance and material gain can be ours for a bit of extra work and effort in co-operating with nature now at this opportune time.

This community has long been looked upon as a beautiful place. Visitors, time without number, have remarked about the well kept lawns, the artistic shrubbery and stately shade trees, all combining to add to its beauty.

The community has these things in which we all take justifiable pride because somebody, many years ago, had the foresight to understand that to make a community attractive, it should appeal to the eye. One of the things our ancestors did to create such a pleasant and attractive community was to plant shade trees which are a source of great comfort, convenience and fine appearance.

Those who carried on have perpetuated this beauty by caring for and adding to these lovely trees and in planting shrubbery, flowers and other ornamental plants each season which make this locality one of the most outstanding in this part of the country.

The responsibility rests with those who are now home owners and occupants of the town, to sustain the tradition. We must not forget that we must exert some extra effort to keep our community beautiful. Utilize your spare time in beautifying your lawn and garden and the surrounding of your home. You will be more than repaid for your efforts in the improved appearance of your premises and the pleasure it will give you.

Building Communities

NO STREET here was ever paved with money sent away by our citizens for purchases from other cities, no school teacher was ever paid with money spent on mail order goods, no payroll was ever met here with these absentee dollars.

The home town merchant is able to meet your every need, his function is to be your purchasing agent to stock the goods you require against the day you call for them. He is the man whose enterprise gives value as a tax and rent producer to the business district of the town, he is behind every movement for the good of the community.

He is entitled to your patronage and it is unfair to yourself and your city to withhold it. The best and surest means of upbuilding the home community, of increasing the value of its citizens' property, of enlarging its opportunities, is to keep your money at home and make it work for everybody.

Japan is putting on its Sunday manners now that the naval conference is nearing.

Adjustment of Foreign Employees Salaries

THE abandonment of the gold standard and the devaluation of the dollar imposed a real hardship on foreign representatives of the United State. The exchange rate of the dollar fell so low on foreign markets that they were forced to take a much greater reduction in salary, according to buying power in respective foreign countries, than were government employees at home.

Many government representatives have been unable to afford the fine quarters which are theirs to maintain. Government attaches of lesser rank have been faced with the problem of bare existence so greatly did the fluctuation of the dollar affect them.

Earlier efforts to adjust the situation met with failure but recent reports indicate that an additional appropriation for funds to reimburse government employees abroad for their loss will be acted upon favorably in the very near future. It is only a matter of fairness and justice that the salaries of these men should be readjusted to meet the conditions which they face. It is not fair that they should be the victim of circumstance.

Resiving diplomats must be able to maintain the fine establishments provided for them that the dignity of our government may be upheld. Clerks and under officials are entitled to a fair salary in terms of the conditions which they must meet.

The additional appropriation will merely restore salaries to the same level which existed before the decline of the dollar, the ratio being determined by the foreign market on our money.

There is one nice thing about a broken leg—the doctor doesn't advise you to have your tonsils cut out.

Early Decisions Are Profitable

THE young people in this country who are numbered among the graduates this year should have some definite plan for the future, and not take the chance that so many do of pushing the responsibility off onto the college to decide for them what their life's vocation will be.

College education will not help the boy or girl who will not use his or her own initiative to develop a particular field of interest.

A great many young people today go to college, not because they want to learn, but for other reasons. Some want to avoid real work and have a good time. Many of them forget the things that were taught them in the common schools, and they forget because they were not interested.

The late Thomas A. Edison urged all young people before they reached their 20th birthday anniversary to discover something that they would like to do. This great inventor made his decision when he was 15 years of age, and worked unceasingly at his chosen occupation until his death. He declared that any person 20 years of age, who does not know what to do, confesses that he is wasting time

The world today is filled with so many interesting things to do that it would be impossible for the longest human life to exhaust the possibilities that are presented in each of them The time to choose a life vocation is now, for the spring graduates, so that they may direct every effort toward accomplishing success along the line that is chosen.

The little boy who didn't believe in Santa Claus has now grown up to believe the bootlegger when he tells him he is getting bottled in bond for $1.50 per quart.

Federal Payment of Deposit Losses

THE pending bill in Congress which would authorize the federal government to pay in full all depositors in closed banks is as indefinite as it is impractical. The bill is not specific in its points. It does not state how far back the government should go in making good deposits. Banks have failed and are still in a state of liquidation dating back several years.

Other banks have gone thru the process of liquidation and receivership, the depositors have been paid in ratio to the value of the assets and the business closed. What would be done in a situation of this sort is not made clear by the bill.

Regardless of the period of time to be considered or the situation surrounding any of the closed banks, the provisions of the bill are impractical and wrong in principal. It is pointed out that the government would take over the assets of the closed banks and get its money back thru the sale of these assets. This would be all well and good if the assets were worth the liabilities that would be assumed but such is not the case in nine cases out of ten or the banks in question would not have been forced to close.

The losses suffered by many of the closed banks were due to several different causes—bad judgment, dishonesty and mismanagement being among the principle reasons. It is unreasonable to expect the government to assume responsibility of payment to depositors whose money was lost thru such causes, in return for worthless assets.

The government, thru the Reconstruction Finance Corporation has already made loans to closed bank administrations in return for good security in an effort to speed the payment of depositors. This is a worthy cause but to carry out the provisions of the bill in question is quite a different thing.

President Roosevelt has already indicated his intentions of vetoing the bill if it is passed by congress and he is to be recommended for his stand in the matter.

One advantage of the old-fashioned cotton stocking over the present day silk ones is that they gave more mileage.

The baseball experts have already told us how the season will culminate but most of us would rather see it played out somehow.

European nations call us imperialistic because they know exactly what they would do if they were in our place.

What a fine world this would be if everyone would be as amiable as a candidate seeking election.

Our present brand of prosperity seems to originate in the pockets of the poor old taxpayer.

HOW, WHAT and WHY?

The Andover News has arranged with the Office of Information of the New York State colleges of agriculture and home economics to answer questions about problems of farm and home. If you enclose a self-addressed, stamped envelope and mention the name of this paper, you will receive a direct reply to your query from the colleges. Do not ask more than one question in one letter or on one post card. Ask as many questions as you like, but make each one a separate communication.

Frost Drives Deeper?

H. S., Liberty, asks: "Why is it that, at the first spring thaw, the frost is driven deeper into the ground by the warmth above? We would think it would thaw out."

Professor R. A. Mordoff of the meteorology department answers: "It is hard to give a definite answer. My own idea is that frost is not driven deeper into the ground by the warmth above, but that the ground temperature lags behind the air temperature.

"The ground continues to get colder as winter progresses, and the low temperature in the soil goes deeper whether the air temperature is a little warmer or a little colder on any particular day.

"For example, on my farm we have water piped from the spring to the barn. This water froze this year for the first time on March 1, or three weeks after the coldest weather occurred. On the day it froze the temperature was fairly high, and it stayed frozen for about six weeks. To me, this indicates that ground temperature lags behind air temperature and that frost is not driven deeper by the warmth above."

Chemical in Cesspool

R. N. H., North Syracuse, writes: "I have heard of a chemical or acid that can be dumped into a stone-walled, but uncemented, cesspool to dissolve the organic matter in surrounding earth. What is the name of this chemical, and how should it be used? Do you think it prolongs the life of a cesspool?"

Professor J. C. McCurdy of the department of agricultural engineering replies: "I would not advise putting any chemical in the cesspool, and I do not think it would prolong its life. A better plan is to build a new cesspool."

Ocean Deposits

Miss E. E. W., Binghamton, says: "I am sending a sample of shale taken from my farm which contains some salt or metal of ocean deposit. I wish you would examine it for me.

"Also imbedded in rock on the farm are oysters and other shell fish, and layers of soft blue clay. Traces of oily secretions can be seen. Is it possible to tell what glistens in these shales?"

H. I. Tucker, curator of the department of geology at Cornell University answers: "The sample of shale contains shining specks of mica, and is stained with iron. It is a very common rock type. The shale was deposited in a very ancient sea, as were all bedded rocks in this region.

"The Binghamton area was, of course, under the ocean for a long period of geologic time. Rocks can be expected to contain fossil remains of both plants and animals which were living in the ocean when the sediments were deposited. These sediments later hardened to form shales and other types of rock.

"I am uncertain about traces of oil you mention in the shale. Iron rust on the surface of stagnant water is often mistaken for an oil seep. This rust breaks up when disturbed, while oil spreads on the water surface. Of course, very black, highly carbonaceous shale is occasionally rich enough to become a possible source of oil at some remote time when our present easy supply is exhausted or when ways are found to extract oil cheaply from shales. I doubt if such shale is common in your area."

Annual Meeting of Hillside Cemetery Association

The annual meeting of the members of the Hillside Cemetery Association, for the purpose of electing directors and the transaction of such other business as may properly come before the meeting will be held at the office of F. S. Clark, Thursday, May 10, 1934, at 2 o'clock p. m.

All lot owners of the Hillside Cemetery are requested to be present.

FRANK S. CLARK,
18 Secretary.

Valley Brook Cemetery Association Meeting

Lot owners of the Valley Brook Cemetery Association are hereby notified that the regular annual meeting of the Valley Brook Cemetery Association will be held at Village Hall in the Village of Andover, Wednesday evening, May 9, 1934, at 8 o'clock.

At this meeting the lot owners will select directors for the ensuing year and transact any business that may properly come before the meeting.

J. HARVEY BACKUS,
18 President

ROMANCE! FUN! THRILLS!

"THESE THIRTY YEARS"

A talking motion picture presented by the Ford Motor Company—a story that begins in a country town of yesterday and ends in a modern setting of today.

"These Thirty Years," a new talking picture produced by the Ford Motor Company, is to be shown at the High School Auditorium, Tuesday, May 15th. Complimentary tickets are being distributed by Guy S. Wood, under whose auspices the local showings are being held.

The story of "These Thirty Years" begins 30 years ago in the town of Brookfield. Dave Haines and his aged mother see their farm and everything they own put on the auction block to satisfy a greedy mortgage holder. During the auction, however, Dave becomes inspired by a "horseless carriage seen tearing down a rutted country road at the neck-breakin' speed of 20 miles per hour." He sees a great future in automobiles and wants Jed Travers, local livery stable owner, to go into business with him. Jed withholds his decision until Dave proves what his "carriage" can do in a cross-country race with a horse.

Success favors Dave. He wins the race—also the hand of May Larcombe. They have a son, Bob, who becomes a problem in later life for he favors playing to working, and spends his "dad's" money gambling on the stock market.

The "crash" of 1929 catches Bob. He loses everything, including his girl, Ann Bailey, who has been disgusted with him for some time. Jed, the partner of Dave, sticks by Bob, saves his life on one occasion, and finally inspires him to become the man his dad and Ann would like him to be.

The players featured in "These Thirty Years," include David Morris, who played in "Come Easy," "Young Sinners" "Cradle Snatchers," and "In the Best of Families;" K. Elmo Lowe, who played the lead in "There's Always Juliet," and other well known plays; Donald McDonald, who played the leads in "Left Bank," and "Here Today," and took part in "Forsaking All Others" featuring Tallulah Bankhead; Frederick Forrester, who played the father in "Animal Kingdom." Alice John, who plays the part of "Mom" Haines in "These Thirty Years," has played for the Theater Guild, Arthur Hopkins and Charles Froham.

LITTLE AMERICA AVIATION and EXPLORATION CLUB
LITTLE AMERICA TO ANTARCTICA
With Byrd at the South Pole
by C. A. Abele Jr. President U.S.N.R.

22 SEALS!

LITTLE AMERICA, ANTARCTICA, April 24, (via Mackay Radio). We are like an army, digging in and getting everything ready for the big battle to come. The long Antarctic night has descended upon us and all day and night we are in a deep gray shadow. Sometimes, when the sky is overcast or a storm is raging, we are in inky blackness. Most of the time, however, it is a thick, heavy gray which lets us see a dozen or so feet away. Some days and nights we have moonlight and that helps a lot. This absence of daylight is so new to me that it gives me the willies but the old-timers tell me I'll get used to it. We'll make up for it next summer when we have sunlight for months, 24 hours a day. The sun is due to pay us its next visit August 23 and will we give it a cheer!

Commander Mjalmar Ojartsen Expedition

I don't like to see seals killed Commodore but down here it is very necessary, to preserve health for us and our dogs. We have 500 seals, all frozen, some in our storehouses, the rest out on the ice several miles away—in Nature's biggest icebox. You know, we have two kinds of seals down here, the Crab-eaters and the Weddell seals, and two kinds of penguins, the little Adelie and the Emperors. The Crab-Eater seals weigh about 300 pounds when fully grown and are courageous fighters, with sharp teeth, although they can't open their mouths very wide when gobbling crustaceans and small fish. They are a neutral gray and travel over the ice like serpents. They are arrogant, active, interesting and delicious to eat, although their flesh, under the coating of fat or blubber, is very black, like all the birds and animals down here, including whales, on account of the richness of their blood. They make a funny, indescribable noise, half grunt, half moo like a cow.

The Weddell seals are much bigger, weighing 25 to 35 pounds when born, growing 50 pounds a week for the first two or three weeks, then more slowly until they reach around 800 pounds. They have no teeth but find no difficulty eating crabs and other crustaceans and fish by crushing them. They travel by wiggling along, very different from the Crab-Eaters. They are dark brown or black with bright gray spots, hair instead of fur, and make the darndest noise I ever heard—a cross between the trill of a canary and a faint moo. None of the seals down here bark like the northern seals. The Weddell seals can open their mouths prodigiously—150 degrees. And are they lazy! A few days before the sun and the seals (and all other creatures including the whales) disappeared, I ran at two seals on the bay ice, to scare them. You know the animals down here have no fear of humans, because they haven't been hunted with guns—only clubs. Well, the Crab-Eater snaked over the ice and popped into the water of an open lead. The Weddell opened one eye, looked at me scornfully, and closed it again.

I've talked with the tractor crews and the dog team men who set up our southern bases for the explorations we're going to start next spring—in October. Both groups did a marvelous job and had a horrible time doing it. Captain Innes-Taylor, William Paine, Finn Ronne and Dick Black, with their dog teams, established a big food and supply base for us 180 miles south of here. You might mark that trip on your club maps, using the proper legend for the dog teams—to Latitude 81.2 South Longitude 160.50 West.

We've got a big thrill coming later this month—if we're not beset by too many storms and blizzards. The scientists have told us there will be a lot of vivid meteor showers and they have built an observatory. So now we are all waiting to observe this show to be put on by the heavenly bodies. I'll tell you all about it.

Have you and your friends joined our club yet? Why don't you get your school teachers to enroll their entire classes, as 148 other teachers have done? The club is open to everybody interested in aviation, exploration and adventure and there are no expenses whatever to members. Simply send stamped, clearly self-addressed envelope, or, in case of school teachers, the names and home addresses of self and pupils, with stamps for each, to A. C. Abele Jr., President, Little America Aviation & Exploration Club, Hotel Lexington, 48th Street and Lexington Avenue, New York City and our big free montage map of the South Pole region and membership card will be sent immediately.

GREENWOOD

(Mrs. H. C. McCaffery, Reporter)

Hornell District Epworth League Convention

The convention banquet at the Masonic Hall was a fitting climax to the annual meeting of the Hornell District Epworth League at Greenwood, Saturday, April 28th. The speaker on this occasion was the Rev. G. Eugene Durham, University pastor of the Wesley Foundation at Cornell University, who gave an inspirational address on the subject, "Facing Life." After this message was delivered, Rev. J. Wesley Searles, District Superintendent, installed the officers with a candle-light service, in which every one took part. The Genesee Conference was represented by the President, Fred M. Hewitt of Corning, and the treasurer, Miss Floretta Ufrommer of Rochester, both of whom spoke at the banquet. Rev. Shirley L .Travis gave the invocation and the toastmaster, Dwight Young, introduced Mr. Leonard Dennis who directed the orchestra and led the group singing. Mrs. Milton Chaffee and her committees of the Ladies' Aid prepared and served the 125 guests in a praiseworthy manner.

The officers elected at the afternoon business session at the Methodist Church are the following:

President, Rev. Joseph C. Shipman, Nelson, Pa.

First Vice President, Mr. Ellis B. Hyde, Springwater.

Second Vice President, Miss Mersab Walrath, Painted Post.

Fourth Vice President, Mr. Donald Rollins, Hornell.

Secretary, Miss Edith Moore, Corning.

Treasurer, Miss E. Louise Woods, Mt. Morris.

Junior League Supt., Miss Margaret Tubbs, Troupsburg.

Intermediate League Supt., Mr. Boyd Stoner, Dansville.

Delegate-at-Large, Mr. Dwight Young, Greenwood.

Publicity, Miss Roma Jean Ingersoll, Nelson, Pa.

The office of third vice president was left temporarily vacant to be filled by the new cabinet at its first session.

The convention accepted the invitation of Park Church, Hornell, to meet there in 1935, and under the leadership of its new president, Mr. Shipman, the Hornell District Epworth League hopes to show even greater progress during the coming year than it has shown in the year just completed.

Underwent Serious Operation

Mrs. Stewart McCaffery was operated on Monday for the removal of a ruptured appendix. Her condition is critical. The operation was performed by Dr. O. K. Stewart in St. James Mercy hospital.

Taken to Hornell Hospital

Mrs. George Wearkley was taken to the St. James Mercy hospital at Hornell Tuesday afternoon where she will undergo a serious operation.

Fire Protection Anticipated Here

E. P. Rogers and Archie Kemp of Andover were in town last Wednesday to assist Greenwood citizens in making plans for future fire protection. The following committee was appointed to attend to the making of a reservoir for water storage: E. P. Holly, Jerry Burd, Mahlon Kernan, Herman Wallace and W. L. Lippert.

Rod and Gun Club Reorganize

A meeting was held in the Masonic Hall Monday evening for the purpose of reorganizing the Greenwood Rod and Gun Club. The officers elected are: President, Ernest Buck; secretary, Mahlon Kernan; treasurer, Theodore Cobb.

Miss Floretta Ufrommer of Rochester, Genesee Conference Epworth League treasurer and registrar of the Silver Lake Institute was a week-end guest at the home of Miss Grace and Dwight Young.

Mr. and Mrs. Howard and daughter of Hornell were Sunday guests of Mr. and Mrs. H. A. Fish.

Mr. and Mrs. W. G. Kellogg and daughter, Miss Jane, and Miss Neree Deron were week-end guests of friends in Geneva.

Caroline Brundage has been ill with the flu.

Mr. and Mrs. Rupert Aman of Irondequoit were recent guests of her father, Merritt Atkins.

Mrs. Robert Holly and Miss Lilian Holly spent the week-end in Troy, the guests of Sterling Holly.

Milton Cline and Ernest Scribner accompanied Mr. and Mrs. J. J. Herrick of Hornell to Buffalo, Sunday.

Mr. and Mrs. J. E. Armstrong, proprietors of the Corner Service Station, have established living quarters in the apartment over the First National Bank.

Miss Ruby Tyler of Hornell spent Saturday in town.

Mrs. O. J. Miller of Bloomsburg, Pa., and Mr. and Mrs. Carl Carpenter of Woodhull were guests of their mother, Mrs. J. K. Miller last Thursday evening.

Supervisor D. D. Baker attended a town board meeting in Addison, Monday evening.

Mrs. A. L. Thompson and Miss Mary Thompson of Canisteo were calling in town Monday afternoon.

Mr. and Mrs. Burdette Russell and daughter, Gloria, of Hunts, spent Sunday with relatives here.

Archie Stephens, Master of the Greenwood F. & A. M., is in New York City, attending sessions of the Grand Lodge.

Home Bureau

Unit Meetings

Mrs. Ruth Comstock, assistant Home Bureau agent, will conduct five unit meetings next week on "Living Room Accessories," as follows: May 7, South Cuba; May 8, Belmont; May 9, Wisco; May 10, Wellsville; May 11, Houghton.

Ten Boys Off For CCC Camps

Ten Allegany county youths were picked from some 25 applicants and sent to Buffalo, April 26th in a big county highway truck for medical examination before transfer to Camp Dix for training and conditioning and assignment to CCC camps.

They are: Charles B. Curry of Andover; Howard H. Brasted of Belmont; Lawrence L. Truesdell of Black Creek; William E. Coon of Ceres; Hugh D. Lockport of Cuba; Willis C. Hopkins and Victor A. Damon of Fillmore; Paul Wilday of Freedom; George E. Nelson of Whitesville and Harold F. Short of Wiscoy.

Uncle Ab says it is not how much you talk, but what you say that counts.

THE BOOK

...the text line of which reads, "The Holy Bible," and which contains Four Great Treasures

by BRUCE BARTON

AN UNKNOWN AUTHOR

WHEN we say that Isaiah's own book ends with the magnificent poem, which concludes chapter 35, somebody raises an objection. "The book of Isaiah has 66 chapters," he says, "and how can it end at 35?—" The answer is that beginning with chapter 40, this book has another author. We do not know his name, nor why he took such great pains to conceal it. Following the exile one hundred years or more after the work and writing of Isaiah himself, there were some useful but rather commonplace prophets, Haggai and Zechariah, whose messages helped on the work of rebuilding the temple, but who cannot be called great men. But one truly great voice did speak out, the voice of this splendid Unknown, the author of the last chapters of the book which is all labeled with Isaiah's name.

He described himself as "the voice of a herald" crying, "Make straight in the desert a highway for our God." He called men to grade the roads, cutting down the hills and filling the valleys and preparing to go back to Zion. He does not name Isaiah nor refer to any king or event contemporary with him. On the contrary, these chapters were clearly written a hundred and fifty years later, in the time of Cyrus.

Thus saith the Lord to his anointed, to Cyrus, whose right hand I have holden, to subdue nations before him . . . .

I will go before thee, and make the crooked places straight:
I will break in pieces the gates of brass, and cut in sunder the bars of iron:

And I will give thee the treasures of darkness, and hidden riches of secret places, that thou mayest know that I, the Lord, which call thee by thy name, am the God of Israel.

Even tho Cyrus was a heathen, he was God's Messiah for that event. Talk if you like about being broad-minded! Then think of the prejudices that prophet had to overcome to make such a declaration. And think what came of it: a new nation, a new and purer worship, a new epoch in the spiritual history of mankind.

Here is his vision for the rebuilding of Jerusalem:

Arise, shine; for thy light is come, and the glory of the Lord is risen upon thee.

For, behold, the darkness shall cover the earth, and gross darkness the people; but the Lord shall arise upon thee, and his glory shall be seen upon thee.

And the Gentiles shall come to thy light, and kings to the brightness of thy rising.

And this is his dream of a regenerate society and a peaceful world; a new heaven and earth, that is, a new theology and a new political economy.

BLOWOUT PROTECTED GOODYEARS ON EVERY WHEEL

As Low As $16.40 Set of 4 GOODYEAR SPEEDWAYS

Prices subject to change without notice and to any State sales tax.

BLOWOUT PROTECTION THAT LASTS

● Per cent of original tensile strength remaining in cords after long use in tires:

Miles Run	Supertwist Tire Cords	Ordinary Tire Cords
8,000	93%	82%
16,000	81%	36%

Supertwist Cord—a Goodyear patent—stretches, absorbs shocks, and comes back strong! Thoroughly rubberized to resist heat, it gives lasting blowout protection in every ply. Ask us to demonstrate!

4 Four Full Plies of Supertwist Cord — insulated with heat-resisting rubber.

● Here's a lot of tire and a lot of blowout-protection for a little money. An example of the greater value that we can give you because more people buy Goodyears than any other tire. See us before you buy—we'll show you the most for your money at any price you name.

Do Your Tubes "Pinch" and Puncture?

● Here's a tube that puts against the rim the toughest rubber Goodyear has ever developed for tubes. Thicker rubber, too. Ask to see the Tu-Tone Heavy Duty—costs little extra, saves many a stop.

Joyous Carefree Adventure
GREAT LAKES CRUISES

on the S. S. SEEANDBEE
—THE WORLD'S GREATEST SHOW BOAT
500 feet long—100 feet wide—500 Staterooms and Parlors

Here is the ideal vacation—rest, relaxation and diversion—a varied interesting voyage of over 2000 miles—with daily programs of music, dancing to a famous orchestra, deck sports, social events, and a dazzling floor show every night and entertainment—all on a cruise scale new in lake transportation.

These cruises, seven days in duration, begin the second week in July and continue through the first week in September.

On each complete cruise a day and night for exploring the wonders of the Chicago World's Fair, and a full day at Buffalo permitting trip to Niagara Falls.

One low fare includes all expenses—transportation, stateroom, meals, all entertainment on shipboard, and sight-seeing trip at Mackinac Island.

One way or port-to-port trips at proportionately low cost for those who do not wish to make the complete round trip cruise.

OTHER C & B TRIPS

C & B Line steamers operate regular nightly service between Cleveland and Buffalo. Auto tourists save a day's time and money too by taking their car on the boat. Rates are low. During July and August, on Saturday, Sunday and Monday, excursions are offered between Cleveland and Port Stanley, Ontario. Daily service between Cleveland, Cedar Point and Sandusky Bay. Low rate all-expense tours to Thousand Islands and Saguenay River are available. Write for folders.
