THE ANDOVER NEWS.

HAMILTON C. NORRIS, - EDITOR

ANDOVER, N. Y., AUG. 13, 1890.

The *Albany Argus* adds another horror to the process by calling it "electrothany."

The Allegany County Amendment Executive Committee will meet at the St. James hotel in Cuba to-morrow. Isn't there a building in the county large enough to hold the committee where liquor is not sold?

Hon. J. S. Whipple has been renominated by the Republicans of the 2d district of Cattaraugus county. If elected, as he will undoubtedly be, his coming term will make his 4th consecutive year of service in the state legislature.

A West Virginia clergyman of the Baptist persuasion has been buncoed out of $1,000. In common with innumerable deacons and elders he held to the belief that

To gamble isn't a sin
So long as you manage to win.

The U. S. Senate has passed Senator Plumb's concurrent resolution providing for the transfer, with Mrs. Grant's consent, of the remains of Gen. Grant from Riverside to Arlington Cemetery in Washington. There is no probability that Mrs. Grant will consent to the removal.

An instance of unexpected failure is given by a New York *Press* writer as follows: "'The Last Run' is the name of a novel which was expected to have an enormous run, yet I saw a great pile of them heaped up in a second hand book store to-day, to be sold for five cents apiece. It is the story which Rose Elizabeth Cleveland wrote, about which so much was said, and seems to be entirely forgotten."

The great strike on the New York Central Railroad has reached its climax, and the probability is that within a few days the road will run all trains as usual. The strikers receive no sympathy from the public, for the reason that there were absolutely no good grounds for the strike. The Central management has always treated its employees with a most liberal fairness, and it was worse than folly to try to inaugurate a revolt against the company's business methods. The result will be a sadly demoralized organization of laborers, many of whom will be without employment on account of their own foolish action.

"Rough estimates" of the population of New York state by Superintendant of Census Porter place the number of inhabitants at 5,998,638, an increase of 915,762 from the census of 1880. This is a gain of 18.02 per cent, as against a gain of 15.97 per cent. during the decade from 1870 to 1880. "Rough estimates" from the same source place the population of the United States at about 65,000,000. This is an increase of 29.45 per cent. over the census of 1880, the smallest ratio of increase with the exception of that between 1860 and 1870 when increase was checked by the civil war.

The text of the original-package bill which, by the President's signature has now become a law, is as follows:

"All fermented, distilled, or other intoxicating liquors or liquids, transported into any state or territory, or remaining therein for use, consumption, sale or storage therein, shall upon arrival in such state or territory, be subjected to the operation and effect of the laws of such state or territory, enacted in the exercise of the police powers, to the same extent and in the same manner as though such liquors or liquids had been produced in such state or territory, and shall not be exempt therefrom by reason of being introduced therein in original packages or otherwise."

How the leading daily papers differ in opinion as to whether the execution of Kemmler by electricity was a scientific success! Their opinions could have been foretold by a perusal of their columns at any time during the discussion as to whether capital punishment by electricity was practicable. Those papers which were opposed to it declare the execution to have been inhuman, revolting and sickening, and call for the repeal of the law. Those that believed the method to be feasible say the execution was a success. This latter opinion is shared by a majority of the doctors present. However, all agree that the apparatus did not work perfectly, nor was the experiment entirely successful. We believe it was as nearly so as could reasonably have been expected. Very few experiments are entirely satisfactory. It takes time and practice to bring any new method to perfection, and we think Kemmler was as good a subject to practice on as could be found in the human race. At any rate, this execution was less revolting and cruel than many that have occurred by means of the rope.

The Sheriff of Wyoming county and his assistants went to a picnic one day last week. Three prisoners in the jail got lonesome, overcame the objections of the small boy who was left to guard them, and presumedly went to a picnic also.

The grape crop promises to be an abundant one this fall. Vineyard prospects along the shores of Seneca Lake were never brighter than at present. The clusters are now half grown, and there are very slight appearances of mildew or rot reported, which did so much damage last year. —*Watkins Express.*

Mr. Whipple, the tinner in the employ of Morse & Willis at Friendship, while at work on the roof of the new school building in that village, was severely burned last week. He had one hand lacerated by the explosion of the gasoline magazine of a soldering furnace and narrowly escaped being blown off the roof.

wastes or gives away during the year more or less kitchen grease, each pound of which can in a few minutes be converted into two pounds of the PUREST SOAP, far better than can be found on sale. The only expense for making ten pounds of this soap, with five and one-half pounds of grease or oil, is the trifling cost of one can of BANNER LYE, to be found at nearly every grocery store.

Dissolve the contents of one can of Banner Lye in three and one-half pints of cold water, and pour slowly into five and one-half pounds of lukewarm grease, stirring from the start, until it thickens into a mushy condition; then pour into any kind of mould to harden—a child can make it, and full directions are to be found back of each label.

A can of Banner Lye will do the work of twenty-one pounds of washing soda, and besides its value for scrubbing purposes, the cleansing and disinfecting of Sinks, Closets and Waste Pipes, destroying the Filth and Disease arising therefrom, makes its systematic use one of the greatest boons the housekeeper has fallen heir to.

Hornellsville Exposition, August 25 to 29, 1890.

We learn from the managers of the Hornellsville Exposition that they are now assured of an overflowing exhibit in every department. They promise an array of horses, cattle, sheep, swine and poultry such as has never been gathered together in this part of the country. The implement and machinery department will be more than full, and the main building, machinery hall, and their various annexes will be simply immense. Fine sport is promised on the track, including besides the regular program of races, pony races, chariot races, eight horse driving, and Roman standing races.

The famous East India trick pony, General Grant, and many other special exhibits. The phonograph electrical apparatus, glass blowing and any number of interesting features will be at hand. The grand exhibit consisting of specimens of nearly every product of the south, including the growing crops, minerals, crystals, gems, marble and beautiful heddenite, found only in North Carolina, will alone be well worth a visit to the exposition. The admission is only 25 cents to all exhibits.

A WONDER WORKER.

Mr. Frank Huffman, a young man of Burlington, Ohio, states that he had been under the care of two prominent physicians, and used their treatment until he was not able to get around. They pronounced his case to be consumption and incurable. He was persuaded to try Dr. King's New Discovery for consumption, coughs and colds and at that time was not able to walk across the street without resting. He found before he had used half of a dollar bottle, that he was much better; he continued to use it and is to-day enjoying good health. If you have any throat, lung or chest trouble try it. We guarantee satisfaction. Trial bottles free at Dr. N. P. Brainard's drug store. 5
