HAPPILY UNITED.

One of the most pleasing results of the Congressional Convention held in Olean last week, was the uniting of the different factions that have existed among Republicans in this county. Very few of the delegates or spectators believed such a result possible until it was actually accomplished. The first concession was made by Hon. D. P. Richardson of Angelica, who saw that in order to nominate an Allegany County man this county must present a solid front. Therefore, on Wednesday morning, of his own free will, he asked his supporters to vote for Mr. Fuller. They did so, and Mr. Fuller's nomination was so clearly assured that one of Mr. Richardson's friends, a resident of Angelica, telegraphed to parties in that place that Mr. Fuller would be nominated. A few ballots, however, demonstrated that the help due and promised from Cattaraugus county could not be depended upon. The Allegany delegates stood true to their man until the convention adjourned for dinner, when it was plainly evident that all hope of Mr. Fuller's nomination was gone.

After dinner a few more ballots were taken, when Mr. Fuller withdrew his name from the convention, and about three-fourths of the Allegany delegates went to Mr. Richardson, in the hope that an Allegany man might still be nominated. The result showed that Cattaraugus was still inclined to be stubborn, as no help could be drawn from her, and the prize which had twice been so nearly in the grasp of our own county, was given to Chautauqua.

But behind the cloud of disappointment is seen a cheering ray of hope in the fact that Allegany men stood true to their county, uniting the factions which have in the past worked to our disadvantage, and the fact that the leaders of the heretofore opposing factions were on Monday placed side by side as Allegany's delegates to the Judicial Convention, only proves plainer that Allegany, though losing what should by right have been hers, has gained a glorious victory over herself.

The man who more than all others is responsible for the existing condition of affairs as regards congressional matters is Norman M. Allen of Cattaraugus county. He entered the contest and stood to the last, at a time when all political precedent and policy forbade it. His county has been honored for the past two terms, and to turn from Mr. Laidlaw to another man in his own county would be to disgrace the present incumbent of the office and give his county a distinction to which she had not the slightest claim. Mr. Allen had many friends in Allegany county who would have been pleased to honor him at the proper time. He has made a great political error, and we believe he will have occasion to regret it in the future, if indeed he does not do so even now.

Ex-President Cleveland is said to have received from an enterprising lecture bureau an offer of $1,000 for a single lecture the coming winter, the subject to be of his own selection. He declines the offer, and says he doubts whether any lecture is worth that amount.

The extensive clothes-pin factory of the Cuba Manufacturing Company, located near the tracks of the Western New York and Pennsylvania Railroad burned to the ground Monday. It is supposed the fire originated from sparks from a passing engine or a hot journal in the shafting. About 20 men are thrown out of employment. The loss is about $7,000 and the insurance about $3,800. The factory will doubtless be rebuilt, having been a paying industry.

Dr. Daniel E. Lee, instructor in anatomy in the veterinary department of Harvard University, says that the number of tuberculous animals in a thousand is five, and that infection can be produced by constantly feeding animals with tuberculous milk or meat, but this is not the most important source of contagion; that tuberculosis (consumption) is transmitted from animal to animal, and from man to animals; that it is transmitted by cohabitation and by inhaling dust containing dried sputa, the latter being the most dangerous source of contagion; the cattle closely confined are often affected to the the extent of 40 or 50 per cent.; that pet cats and dogs become tuberculous and transmit disease; that cattle are affected with tuberculosis in the largest percentage where they are kept for milk in localities where the percentage of the disease is also great; that tuberculosis is slow in its course, and this is why its contagious character has not before been recognized; and that boiling milk and thoroughly cooking meat abate if they do not destroy contagion. Surely, we ought to be very cautious about our milk and meat supply.
