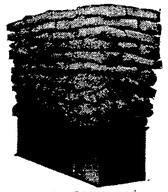
"STRONG and DURABLE"



11,000 POUNDS OF CEMENT ON THIS CASE

The Cost of a BURIAL VAULT has placed it beyond the reach of many; for that reason we have felt for years the need of a more durable burial case than the ordinary wood ROUGH BOX that could be priced within the reach of everyone.

We are presenting, for the first time, just what we have so long been looking for, "THE MANSFIELD METAL BURIAL CASE," made from COPPER BEARING STEEL, A RUST-RESISTING METAL—KNOWN FOR ITS RUST RESISTING QUALITIES—NATION-WIDE.

This is not a vault, and of course, does not have the qualities of a good expensive BURIAL VAULT; it is not water proof, but it is STRONG and DURABLE—ELEVEN THOUSAND POUNDS OF CEMENT (11,000 pounds) is heaped upon this case, showing conclusively that it is able to withstand loads in excess of burial requirements.

We sell metal burial vaults of real value, those that are guaranteed to be water-proof, and resist rust for years, but, of course, the cost is more than TWICE THE PRICE OF THIS METAL BURIAL CASE. We also use and recommend "THE TYRONE NORWALK BURIAL VAULT," a vault that, in our opinion, is the BEST of its KIND, but it, too, is in a class more than twice the price of this case.

For those who want real protection—the best that we have to offer—we present "The Tyrone Norwalk Vault," or their preference of copper bearing steel, or Armco Ingot-iron Air-seal vaults. These are all quality vaults. For those who, especially during these severe times, have only a limited amount of money to use for a protection far in excess of a wooden rough-box, we suggest this copper steel metal burial case, finished inside and outside with "Bronze Metallic" finish.

When anything better, for the money, presents itself YOU MAY BE ASSURED THAT WE WILL HAVE IT.

BAKERS' STORE NEWS

The Mirro Cooker

The Mirro Cooker is, of course, of the Vapo-Seal type, for cooking with little or no water. It cooks a whole meal at one time, a great added attraction you will surely agree. And it has the further merit of utter simplicity. It is no more complicated than a sauce pan, for Mirro designers have perfected for it a cover without clamps. What you have in principle is merely a deep aluminum pot with a heavy fitted cover and an insulating base of extra thick aluminum which insures safety against burning, a chomium plated wire rack is placed inside to support two half circle pans. Thus there is ample capacity for cooking a whole meal for the average family with meat and potatoes in the bottom of the pot and a vegetable and dessert in the duplicate pans above. The Mirro Cooker is a master chef. No other single utensil that you could possibly own is qualified to render a greater service to your household.

Come in and see the Mirro Cooker.

Recipe for the Week

Swiss Steak—10 servings—Thick round steak, 2 pounds; flour ½ cup, salt 1½ teaspoons, pepper, ⅛ teaspoon, onion chopped; 2 tablespoons fat ¼ cup; water hot, 1 cup; tomato juice 1 cup.

Wipe meat, place on meat board and heat flour into the meat with edge of a saucer, continuing until the meat will hold no more flour. Sear meat well in Mirro Cooker in which there is one-fourth cup hot fat. The onion may be browned before meat with fat or added the last half hour of cooking. Add one-half cup hot water. Cover Mirro Cooker and simmer one hour. Add seasonings and continue cooking one-half hour. Arrange on platter with baked potatoes and serve with gravy.

Writing Paper and Envelopes, 10c per package.

Small Memo Pads, 1c each.

Electric Fans

An Electric Fan gives service not only for use in the kitchen and laundry during hot weather, but also in other parts of the house. Modern science shows we keep cool by rapidly changing the air.

On a cold day a fan directed against a steam or hot water radiator will more quickly warm a room. A fan is used in the latest method drying fruits and vegetables. The cost is reasonable—$1.95.

Oil for the Squeaks

Husband: "What are those pans of oil doing in the corners of the room?"

Wife: "I put them there for the mice. You said it annoyed you to hear them squeak."

"Laziness grows on people; it begins in cobwebs and ends in iron chains. The more business a man has to do the more he is able to accomplish, for he learns to economize his time.

That's because the cost of electricity in this section has come down

Mrs. M's electric bills are now only a few cents a day more than they were some years ago. Yet that pays for running their new electric pump, clothes washer, refrigerator and radio, in addition to better lights.

About 5 years ago their bills averaged $2.60 a month for just a flat iron, toaster and lights. So when you figure what they pay now, and what they get for it, you can see why Mrs. M says her electricity is the biggest bargain they buy.

Electricity in this neighborhood is a real bargain and you'll find the more you use the bigger bargain it is.
