GREENWOOD LOCAL BRIEFS

Spring like weather.

Roads somewhat muddy.

Robins are reporting themselves. They must be good robins.

Sugar making will soon be on.

Larry Hyland was greeting former Greenwood neighbors Monday.

The potato market is lively at 70 cents per.

Adelbert Austin, an oil operator, of the Marsh, was in town yesterday. He reports his latest venture below Wellsville as a fair gaser, but the well is not finished, as the tools are fast in the well. The cable broke before the drillers reached the oil sand. The hole has reached a depth of about 1,100 feet.

Theodore Cobb, Esq., was in Greenwood, Monday.

Allie Scott and family of Haubers' Corners were in Greenwood, Tuesday to attend the funeral of Jesse T. Atkins.

Sherman Austin of Wileyville was in Greenwood, Monday, on legal business.

Ralph Wilcox of Barney Mills was in our city Saturday.

Miss Blanche Parshall spent the her home in Greenwood.

A worker in the Sunday School cause has offered to give a dollar for each dollar given by others up to $50,000 to the New York State Sunday School Association, and County resident, F. L. Fraser, of Corning, has sent out an appeal to residents of this locality to assist in the good work. Pledges may be sent to Rev. Grant L. Bice, Secretary and Treasurer, 44 State Street, Albany, N. Y.

Mr. and Mrs. John Schenck of Jasper were Greenwood visitors Monday.

John Tanner, the marble cutter of Canisteo was in Greenwood, Tuesday.

Thomas Caffrey and son of West Greenwood, were in this city, Saturday.

Mrs. Avery Cheesman returned from a visit at Canisteo, Saturday.

Mrs. H. S. Bennett went to Troupsburg Friday to visit the doctor's parents.

Marvin Henderson returned from Hornell, Saturday.

Miss Aggie Falling of Canisteo was the guest of her sister, Mrs. J. K. Miller, last week.

Albert Lewis of Young Hickory was a business visitor in this village Monday.

The firm of W. B. Daley & Bro., of Genesee, is dissolved. The senior member of the firm, W. B. Daley, continuing in the store and Edward W. hereafter run the mill.

John Harkenrider of West Union was in Greenwood, Monday.

The Masonic lodge of Greenwood attended the funeral of Jesse T. Atkins in a body.

Samuel Wyckoff of Troupsburg was among the visitors in town today.

Horatio Gurnsey of Jasper was a caller in town yesterday.

A good lecture at the opera house Monday evening.

Earl Foster was in our village Monday.

Supervisor Geo. Dennison of West Union was in Greenwood Monday on business.

George Fuller of Troup Creek died Thursday from hemorrhage of the brain. At times it took five or six men to hold him while in spasms. Several years ago he suffered a fracture of his skull, which was probably the cause of his delirium. During his spasms he would raise two men with each arm clear from the floor.

Charles Davenport is drilling a number of water wells at Beech Hill.

Warren Brundage was helping at the railroad station Saturday.

N. E. Coston and son Glenn were in Hornell Saturday.

The Palmer Glass Company will start up their furnaces again Feb. 25th so says W. G. Cornilson, one of the company directors.

Barnard O'Hargan of Rexville was in town Monday on legal business.

Curtis Lampman of Troupsburg was in town yesterday on business.

Frank W. Clark of Whitesville made a pleasant call at this office Monday.

Orville Howland was in our city Monday.

Ross Dennis of Jasper was a Tuesday visitor in Greenwood.

A brown bear was seen in South Canisteo recently. The hunters of that section are looking for bruin's tracks.

W. L. Snow, with a string of 25 horses, will leave Hornell for East Aurora to secure the advantages of the covered race track.

The sleighing last week turned to thin mush.

There is talk of rebuilding the Canisteo wooden ware factory.

Cassius Stephens of Slate Creek, was in Greenwood today.

Oscar Hunker was in town today.

A probable reason for making Taft a Mason on sight is that he is too heavy to toss up in the blanket.

Henry O'Hargan was a caller in town this morning.

Homer Donaldson was in Greenwood today.

Abel Denison of West Union was a business visitor in Greenwood yesterday.

Harvey Goodno is at home on a brief vacation.

Mrs. M. C. Williamson left Tuesday afternoon on a visit to friends in Washington, D. C. Mrs. Williamson will be present at the inauguration ceremonies of President Taft, on Mar 4th.

George Alyord of Hornell was in town Wednesday.

H. G. Butterfield of Buffalo was a business visitor in this city Friday.

M. B. Barnard of Canisteo was in Greenwood Friday.

F. F. Williams of Ithaca was a Thursday caller in this city.

E. E. Saunders of Buffalo was among the visitors in town Wednesday.

V. A. St. John of Wayland, was in our city Tuesday.

J. Mellin of Canisteo was a Greenwood caller Tuesday.

The Odd Fellows, of which organization J. T. Atkins was a member, took part in the Atkins funeral Tuesday.

Wireless messages have been sent and received a distance of 2500 miles "That's going some."

David Putman was in Greenwood Tuesday.

Washington's Birthday was generally observed hereabouts.

Special term of Supreme Court at Bath, Saturday, Feb. 20. Judge W. W. Clark, presiding.

Hoarse coughs and stiffy colds that may develop into pneumonia over night are quickly cured by Foley's Honey and Tar, and it soothes inflamed membranes, heals the lungs, and expels the cold from the system. Brundage & Rogers.

You might travel to the ends of the earth, and be in any sort of company or circumstances, wherever you are, whatever you do, if you're in clothes, you'll be distinguished among men for your good appearance. Any man anywhere, who is in these clothes looks and is well dressed. There's a distinction about these goods you don't get in other clothes.

You'll see it in the new models in Topcoats we'll show you; in the smart, new styles in Suits; in the way they're made, the way they fit and wear.

PROMISING KIND OF WHEAT.

Canadian Farmer Has a Prolific Variety With Six Rowed Heads.

R. J. Taylor, who lives a few miles north of Carlyle, Saskatchewan, Canada, is in possession of forty pounds of a new kind of wheat which he hopes will increase greatly the yield of the west, says a Winnipeg dispatch. The striking feature of this new variety is that it grows on the head in six rows instead of the usual two.

Two years ago Mr. Taylor, while cutting his wheat, noticed a six rowed head and saved it, planting the seed in the spring and getting ninety-four heads. These ninety-four heads he sowed last spring and now has forty pounds of the seed, enough to sow about fifteen acres. Mr. Taylor claims that this wheat yields sixty and more bushels to the acre, so this fall he expects to have at least 1,000 bushels from his forty pounds. This wheat grades No. 2 Northern and is said to be less susceptible to frost than any of the varieties now grown in western Canada.

Foley's Orino Laxative cures constipation and liver trouble and makes the bowels healthy and regular. Orino is superior to pills and tablets as it does not gripe or nauseate. Why take anything else? Brundage & Rogers.

Looking Forward.

Yoh uncle wants to prophesy as how it won' be long
Befo' dem African wil' beasts dat seems so tough an' strong
Will learn to min' dere manners an' be gentle an' polite.
Dat big giraffe what day been a-noodin' foh to set 'em right.
We'll have dat roarin' lion so obligin' an' so tame
He'll purr jes' like a kitten an' come answerin' to his name.
We'll hitch de zebra to a cart an' go to town an' trade
Foh drinks an' dry goods wif de eggs de cacklin' ostrich laid.
De tiger will be comin' round a-cryin' to be fed.
De elephant will be grateful if you pats him on de head.
When I takes notice of de tamin' dat's already done,
It 'pears like fair' Africa was ordinary fun!

—Washington Star.

Soldier Balks Death Plot.

It seemed to J. A. Stone, a civil war vetern, of Kemp, Tex., that a plot existed between a desperate lung trouble and the grave to cause his death. "I contracted a stubborn cold," he writes, "that developed a cough that stuck to me, in spite of all remedies, for years. My weight ran down to 130 pounds. Then I began to use Dr. King's New Discovery, which restored my health completely I now weigh 178 pounds." For severe colds, obstinate Coughs, Hemorrhages Asthma, and to prevent Pneumonia it's unrivaled. 50c. and $1.00. Trial bottle free. Guaranteed by BRUNDAGE & ROGERS.

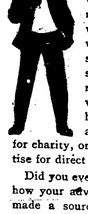
Enlarging Your Business



If you are in business and you want to make more money you will read every word we have to say. Are you spending your money for advertising in haphazard fashion as if intended for charity, or do you advertise for direct results?

Did you ever stop to think how your advertising can be made a source of profit to you, and how its value can be measured in dollars and cents. If you have not, you are throwing money away.

Advertising is a modern business necessity, but must be conducted on business principles. If you are not satisfied with your advertising you should set aside a certain amount of money to be spent annually, and then carefully note the effect it has in increasing your volume of business; whether a 10, 20 or 30 per cent increase. If you watch this gain from year to year you will become intensely interested in your advertising, and how you can make it enlarge your business.

If you try this method we believe you will not want to let a single issue of this paper go to press without something from your store.

We will be pleased to have you call on us, and we will take pleasure in explaining our annual contract for so many inches, and how it can be used in whatever amount that seems necessary to you.

If you can sell goods over the counter we can also show you why this paper will best serve your interests when you want to reach the people of this community.

Why It's Worth While

You want the best FURNITURE you can get for the least money, don't you? Then let us show ours. We are just out of the high rent district, expenses are low and we buy in big quantities. For that reason prices are 10 to 20 per cent. lower than other stores. Is that worth saving? Come here and let us satisfy your Furniture needs. If it is Furniture, we've got it.

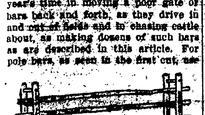
Plenty of life—but Home-like

Easily Constructed and Serviceable, Attractive and Durable.

It is important to the farmer that his inclosure should be well equipped with substantial bars. There are farmers who go to so much trouble in a year's time in moving a poor gate or bars back and forth, as they drive in and out of fields and in chasing cattle about, as making dozens of such bars as are described in this article. For pole bars, as seen in the first cut, use

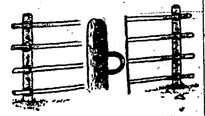


POLE BARS.

round poles about two and one-half or three inches in diameter. Cut four pieces the same length to use for the upright bar posts or standards. In these bore four or more holes spaced an equal distance apart. Connect these standard post holes in pairs with five or six inch lengths of small round poles just the right size to fit tightly into the bored holes. If necessary shave off the ends a bit pointed so as to drive them into place firmly. As an additional security nail each one in place. Little blocks of wood can be nailed between the upright posts instead of the five inch lengths of pole. In either case these little bars or blocks hold up the bar poles. Set the two connected upright standards in position and put your bar poles in place and you have a good tidy set of bars.

A farmer who has several fields opening on the highways has each barway fitted up with bars like those here mentioned.

The bars as seen in the second cut are simply made and very serviceable.



BARS USING HORSESHOE GATOR.

Set two good sized posts one on either side of the barway and to each one, an equal distance apart, nail large horseshoes, allowing the round part to stand out far enough from posts to admit the bar poles easily.

Facts For the Farm Home.

Ohio has a law compelling nurserymen, or those engaged in growing trees, vines or shrubs, to file application with the state agricultural department before July 1 of each year for the inspection of such stock. Disposing of uninspected stock renders the owner subject to fine.

Most farmers who have tried it are becoming to believe that the increased value of food by cooking is not worth the trouble.

The Minnesota experiment station has originated a new variety of winter rye, called Minnesota No. 2. This rye was obtained by selection from the Swedish rye and is an exceptionally high yielder. The average yield upon the station grounds for the last eight years is 40.4 bushels per acre. One field of 1.9 acres yielded forty-eight bushels per acre last fall.

It is estimated that 2,595,597,000 bushels of corn were raised in the United States in 1908, valued at $1,518,424,000.

It has taken nearly thirty-five years of conscientious effort for breeders to get the Poland-China hog down to the splendid, easy feeding, compact, well finished animal that it is today.

There is no better winter breakfast for hens than equal parts of bran, middlings, cornmeal, ground oats and meat scraps by weight, to which add its bulk in cooked clover hay and 5 per cent. of linseed meal. Mix the ground grain with the tea made by cooking the clover.

It is estimated that the cost of maintaining a hundred breeding ewes in good condition is a dollar per day, or a cent per head, when kept on corn fodder, beets and oats.

Breeders like to have sheep with plenty of meat on the under part of the body. A thick dock and thick, strong neck are also necessary, by which can be judged the amount of muscle or strength.

A mixture of lime, carbolic acid and copperas is said to make a good wash to prevent rabbits gnawing fruit trees.

It is claimed that a hundred sheep can be fed for what it costs to feed ten cows and that the returns from the sheep will be much greater than from the cows.

A horse trainer says that the average person does not know how to pet a horse. He says they do not pet him in the right place. Rub his eyelids or rub him right up between the ears. In petting horses most people slight those nerve centers. They stroke the horse's nose. While a well behaved horse will accept the usual caress complacently, he would much prefer that nice, soothing touch applied to the eyelids.

Rats and mice do much damage to stems and, if a claimed, keep sheep from having stomach worms.

Does No Harm But Much Good

MANY OF OUR CITIZENS SPEAK WELL OF THE HOME PRESCRIPTION WHICH HELPED THEM TO HEAITH.

Mix the following by shaking well in a bottle, and take in teaspoonful doses after meals and at bedtime:

Fluid Extract Dandelion, one-half ounce; Compound Kargon, one ounce Compound Syrup Sarasparilla, three ounces. A local druggist is the authority that these simple, harmless ingredients can be obtained at nominal cost from our druggist.

The mixture is said to cleanse and strengthen the clogged and inactive Kidneys, overcoming Backache, Bladder weakness and Urinary trouble of all kinds, if taken before the stage of Bright's disease.

Those who have tried this say it positively overcomes pain in the back clears the urine of sediment and regulates urination, especially at night, curing even the worst forms of bladder weakness.

Every man or woman here who feel that the kidneys are not strong or acting in a healthy manner should mix this prescription at home and give it a trial, as it is said to do wonders for many persons.

CONCRETE SILOS.

Fireproof and Practically Frost Proof When Properly Constructed.

It is desirable to prevent the freezing of silage in the silo during cold weather as far as possible, and the silo of a construction to prevent freezing to the largest degree is the preferable one, other things being equal, says a bulletin issued by the Iowa experiment station. It is difficult to make a comparison between the merits of the various types of silos in this respect owing to the inability to find them under like conditions. Freezing of silage is due to loss of heat, first, through the silo wall and, second, to the air in contact with the feeding surface. The first loss may be reduced by using a nonconducting wall in the silo and the second by preventing the circulation of air above the silage in the silo.

It may be impartially said that as far as the prevention of freezing of silage is concerned the stave, stone, single wall brick and concrete silos are of equal merit. When properly made, however, the double wall concrete silo is perhaps the most nearly frost proof of all. The conducting material between the walls consists only in small metal ties, and the circulation of air may be cut off by the insertion of horizontal tar paper partitions. When the top of the silo is open and a free circulation of air permitted it is almost impossible to prevent the surface from freezing in severe weather. A personal investigation of silos in cold

DOUBLE WALL CONCRETE SILO.

weather proved conclusively that those provided with a tight roof did not contain nearly as much frozen silage as those left open.

The freezing of silage does not necessarily mean a loss, as it may be thawed out and made fit for feeding and when properly attended to need not rot or mold. The frozen silage may be often thawed by mixing with the warm silage at the center of the silo. It is generally considered dangerous to feed frozen silage.

In order to secure a first class concrete silo it is necessary that good materials well mixed in the right proportions, be used in preparing the concrete and that the whole be skilfully tamped. If these requirements are fulfilled the writers upon investigation are confident that no better silo can be erected than one constructed of concrete. The investigation, however, would indicate that it is not advisable for the man with no experience with concrete construction to attempt the building of a concrete silo. The expense involved is too great for the individual farmer who has not previously constructed buildings of concrete to experiment. The work should be turned over to the concrete contractor under a guarantee that only a first-class silo be built.

Among the desirable features of the concrete silo or any masonry silo may be mentioned that it is essentially fire proof. A silo was found to use in Wisconsin which had withstood a fire that burned all the surrounding buildings.

THEES FOR STREETS.

Advice on Planting and Properly Caring For Them.

VALUE OF MUNICIPAL CONTROL

Best Way to Secure Adequate General Tree Beauty, Says an Authority. Choice of Trees Most Important. Why Systematic Planting Pays.

An authority on the planting, proper care of and regulation of street trees who strongly favors municipal regulation of the trees says:

"Investigation will show that in no other way can adequate general tree beauty be secured. It is the universal practice abroad to have the trees cared for by the municipal authorities, and not by the individual property owners. It cannot be said that the tree really benefits primarily the person who lives near it. He receives an incidental benefit, but the tree adds to or detracts from the value of the street generally more than it does the value of the property which it fronts.

In the United States the cities which show the best trees have almost uniformly municipal control, with the exception of some eastern cities, where public sentiment amounts to the same thing.

"Washington has the best ordered and best maintained trees in America. There are some 93,000 of these, all planted municipally and cared for municipally. There has been great attention to the planting of proper trees in uniform shape—that is, a certain street will have nothing but horse chestnuts, another nothing but English sycamores, another nothing but tulip trees. There are whole avenues devoted to splendid oaks, some splendid avenues of elms and maples, an occasional street showing Carolina poplars, and some more plantings of the pin oak. In each case it is a solid street of a tree, and the effect is exceedingly good. No such effect could be produced by individual initiative, for one man would want an elm and another a Carolina poplar and possibly another a horse chestnut. None of these trees might be the right trees for that particular place, and thus the following of individual preference would be making patchwork of the street.

"In considering trees for city streets the width of the streets and the use of the streets must be taken into account. The primary purpose of streets is to serve commerce and business and not to serve as a nursery or park. The park and tree adornment should add to the comfort, the convenience and the health, but it is an adjunct to the general use of the street. Therefore such trees must be chosen as will promote the best use of the streets. Obviously this means that on narrow streets it is not proper to put a tree which has the habit of spreading out into a wide head. The round, compact form of the Texas umbrella tree does not suggest that it is a good tree for a narrow street, whereas the vase form and height of the elm does at once suggest it as a proper tree for narrow streets, and, indeed, for most other streets, for it grows up and out of the way and its limbs reach over in a most attractive fashion.

"Some of the cities in New Jersey have undertaken to regulate trees to plant trees municipally. The best examples are in Newark and East Orange, both of which cities are succeeding admirably in their efforts. The tendency is to plant trees twenty to forty feet apart, to stagger the rows on either side, always to dig a deep hole and fill with good soil and set the tree with an adequate stake, afterward protecting it with a simple, but usually made of chicken wire, so that horses cannot gnaw it. Much care is being given toward keeping the tree in proper shape without having its bark torn by improper guards or by the tying to fasten it to the necessary stake."

In East Orange, N. J., all street trees are pruned to a uniform height, a height that will permit the unimpeded passage of vehicles and will allow all street lights to be seen at night. Few things are more important in the care of trees than proper pruning. The cut should be made close to and even with the trunk. When pruning is properly done the scar will heal. When short stumps are left they dry and rot, prevent the wound from healing and carry decay into the trees.

Even from a financial point of view the systematic planting and care of trees on streets would prove a paying investment. Many cases are known where bare land of superior value has sold at a much less price than inferior land with the frontage aligned with street trees. For all purposes but the growing of crops street trees are of more importance and value to the land than quality of soil. Newcomers are not attracted to a town by garish, shadeless streets any more than they are by dirty or poorly paved streets. Insanitary conditions or other forms of slovenly civic housekeeping.

Rural School Garden Suggestion.

In rural communities instead of conducting miniature vegetable or flower gardens it might be better to secure different varieties of grains or grasses for test upon home plats, encouraging the students to undertake small experiments which shall have for their chief end the development of the faculties of observation. Different methods of tillage and fundamental principles of this character will be involved in these experimental or demonstration areas the results of which will emphasize the importance of certain lines of work.

No Indigestion or Dyspepsia

MAKES MISERY FROM AN UPSET STOMACH VANISH IN FIVE MINUTES.

Every family here ought to keep some Diapepsin in the house, as anyone of you may have an attack of indigestion or Stomach trouble at any time, day or night.

This harmless preparation will digest anything you eat and overcome sour stomach five minutes afterwards. If your meals do not tempt you or what little you eat seems to fill you or lays like a lump of lead in your stomach, or if you have heartburn, that is the sign of indigestion.

Ask your Pharmacist for a 50-cent case of Pape's Diapepsin and take one triangule after supper tonight. There will be no sour risings, no belching of undigested food mixed with acid, no stomach gas or heartburn, fullness or any feeling in the stomach, Nausea intestinal griping. This will all go and, besides, there will be no sour food left over in the stomach to poison your breath with Nauseous odors.

Pape's Diapepsin is a certain cure for all stomach misery, because it will take hold of your food and digest it just the same as if your stomach wasn't there.

Actual prompt relief for all your stomach misery is at your Pharmacist waiting for you.

These large 50-cent cases contain more than sufficient to cure a case of Dyspepsia or Indigestion.

How Long Are Cows Profitable?

In my opinion, a milk cow remains valuable as long as she breeds and continues to give enough milk and butter fat to pay a reasonable dividend over and above cost of keep. The oldest cow I have is nine years old, and I don't remember having kept any until older. I find my cows after their eighth year begin to taper off in quantity of milk produced, though they would last longer if they had not been "crowded" so hard in former years. My experience and observation of Holstein cows lead me to believe that the decrease is gradual from the high point of efficiency, much as the increase from "heiferhood" on is gradual, but that the period of lactation is not shortened in the slightest.

I believe a good cow one that has paid good dividends all her life, should be kept until she can no longer pay for her feed. And if she has been an exceptional cow she should be kept as long as she will breed, as calves from such a cow have every chance to become as good as or better than the dam, and great cows are not as yet very common.—R. B Young in Farmers' Review.

Hexamethylenetetramine

The above is the name of a Germa chemical, which is one of the many valuable ingredients of Foley's Kidney Remedy. Hevamethylenetramin is recognized by medical text books and authorities as a uric acid solvent and antiseptic for the urine. Take Foley's Kidney Remedy as soon as you notice any irregularities, and avoid a serious malady.

Brundage & Rogers.

Electrical Correction.

A novel office for naughtiness and general perverseness is advocated by Dr. Elbert Hubbard, a noted authority on child culture. He maintains that a few shocks of electricity judiciously applied are the most effective means of punishment. In one instance a child of five years was effectually cured of chewing after three days' treatment by this means.
