Censorship and Propaganda

"CENSORSHIP," so an editor-friend of ours said, "as now practiced in the authoritarian countries, makes the dissemination of ignorance an instrument of national policy."

That is well put, and he might have said "Censorship and propaganda," for the two are reverse sides of the same coin. Censorship deprives the people of certain information. Then propaganda is poured in to fill the void.

The evolution of mankind has been, and must continue to be, in the direction of greater individual intelligence and freedom, with the wise, co-operative use of supreme power by the sovereign people. We may be a long way from the goal, but at least we know what the goal is. We know that the way to attain it is to march toward it as best we can, and not to head in the other direction. Dictatorships are obstructions in the stream which would carry people ahead, permitting them to develop freely, naturally, and normally without artificial stimulation thru propaganda and certainly without being misled and terrorized. You cannot bring up a child as he should be by frightening him and lying to him, and you cannot do so with a nation.

We as individuals in a world temporarily in the grip of such forces, can try to be intelligent and reasonable, do our daily work as well as we can, be as tolerant as we can and, above all, avoid being stampeded ourselves by propagandists and demagogues, wherever they may be, who will excite our emotions, if they can, and so induce us to believe and act as they want us to do.

Ultimately, events will force the world back onto the course of progress. Censorship and propaganda now help to hefog the scene and delay that return. But we will get there in the end. Recognizing man's potentialities, as revealed by the long course over which he has come so far, censorship and propaganda become mere temporary annoyances, obstructions built upon fear and selfishness, and rising high enough to keep out the light of truth. As we become able to bear the brilliance of that light, we our(illegible) obstructions and open the way.

Christianity and Democracy

CHRISTIANITY has (illegible) been a liberator. Even in perfectly practiced, it has freed men's minds from the oppressions of hate, selfishness and superstition. Increasingly political institutions have reflected that freedom. The relation has again been called to attention at the New England Methodist Conference by a statement of Alf M. Landon:

If Christianity does not achieve its aims, democracy cannot succeed.

Even the casual observer can see that the attack on democracy today centers in un-Christian thinking—selfishness, hate, dishonesty, arrogance. Those who wish to preserve and perfect self-government might well begin by seeking to improve the practice of Christianity—unselfishness, love, honesty, meekness. When these qualities govern men they can govern themselves.

When two minds, fully harmonized, begin to work on a problem, they attract ideas that more than double the contribution of either.

It is the life behind that is the essential thing, not the manifestation.

Response leads to responsibility.

Liquor Comes High

IF THE experience of Los Angeles is a criterion, the cities of the United States are paying a much larger bill for the prosecution and care of publicly intoxicated persons than before the repeal of prohibition. Roy Knox, director of the Los Angeles Bureau of Budget and Efficiency, reports:

Arrests for drunkenness increased from a total of 93,438 in the six years prior to repeal to 156,326 in the three years following repeal.

Cost of handling these cases increased from an average of $886,002 per year before repeal to a present average of $2,360,898.

Whenever the police ambulance or patrol siren sounds, one out of three times it is answering a call for which a drunken person is responsible, and the average cost per call is $45.

The city's total bill includes the cost of one-third of the police department; of trials, feeding, housing and clothing prisoners awaiting trial and after conviction; treatment of alcoholics and inebriates in public hospitals and clinics, damage to property and persons, only a small part of which is footed by the taxpayers, and in certain cases maintenance of wives and children of jailed fathers.

Higher taxes on liquor will not alone solve such a problem, even tho they make it more difficult for the family pay envelope to satisfy the drinker's appetite. Neither the cost nor the quality of liquor have a decisive bearing on the social results of its abuse. Obviously, from Los Angeles' experience, the degree of its availability is the controlling factor.

Junk the Old Cars

THE proposal has been seriously put forth by an automobile manufacturer that the Government should spend a hundred million dollars to buy the million worst old automobiles now on the roads and destroy them.

There seems to be much sounder common-sense behind that project than there is in some of the things which have been proposed or actually undertaken in recent years. It was difficult for the average American to see the justification for the wholesale destruction of livestock and produce under the old A A A. Those were real wealth.

Many of the old automobiles in use, however, are not only practically valueless but a positive menace to human life and public safety. Most of them are beyond repair, and their old-fashioned two-wheel brakes cannot be adapted to modern safety requirements.

A hundred million dollars would be a high price to pay for only a million of these "jalopies." There are probably five million outdated cars cluttering the highways which could be junked for that amount.

We do not advocate unnecessary government spending, but if it is being done, why not spend some where it would do a public service? And if spending of public funds is to continue for the benefit of special groups and classes, why are not automobile manufacturers entitled to as much consideration as farmers or any other group?

A Boston man, hearing of a petition pen in Chicago, wired the following message, direct and collect: Am on way to accept position stop deduct cost of this telegram from my first week's salary. He got the job.

A famous chef, asked the recipe for his equally famous corned beef hash, replied: "There is no recipe, the stuff simply accumulates."

The instructor, having delivered a lecture on parachute jumping concluded, "And if it doesn't open, well, that is what is called 'jumping to a conclusion'."

A mid-west editor runs the following at the top of the front page of his paper: "We only print news, we do not make it. If you don't like the kind of news we print, don't make that kind."

Worse than not having the money to go anywhere is to have the money and not be invited anywhere.

An amusing sight is the absent-minded nudist striking a match.

A bore is someone who is here today and here tomorrow.

HOW, WHAT AND WHY?

Special to the Andover News

The Andover News has arranged with the Office of Information of the New York State Colleges of Agriculture and Home Economics to answer questions about problems of farm and home. If you enclose a self-addressed, stamped envelope and mention the name of this paper, you will receive a direct reply to your query from the colleges. Do not ask more than one question in one letter or on one postcard. Ask as many questions as you like, but make each one a separate communication.

Peaches Don't Grow

Mrs. J. E. R., Woodhaven, writes: "Please advise on my peach tree. The leaves are turning yellow and dropping off. It is filled with small peaches. The tree has been treated for borers. Last year the peaches reached the size of walnuts and all dropped off."

Professor W. D. Mills of the plant pathology department replies: "The trouble in your peach tree is most likely caused by the fungous disease known as peach leaf-curl. If you send some of the diseased leaves I will be glad to examine them.

"We have sent you directions on spraying to control peach leaf-curl; also Cornell bulletin E.314 which gives more detail."

Puzzled by Roses

M. S., Liberty, writes: "I have a fine rose bush which is usually covered with beautiful large blooms. Last summer I noticed a number of peculiar objects on it, like small balls of spittle.

"The bush did not flower as much or as beautifully as in the past. Will you please advise?"

Dr. W. E. Blauvelt, extension entomologist, answers: "I feel sure the rose bushes were infested with insects known as frog hoppers or spittle insects. If very abundant, they might injure the plants and reduce the amount of blossoming.

"The masses of white froth or foam surrounding the young insects consists of plant sap which the insect has sucked from the plant. The foam presumably protects the insect from enemies while full grown, the insects leave the masses of foam and wander about on the branches and leaves.

"The insects can be controlled by dusting the infested plants with a rotenone dust containing three-fourths of one per cent rotenone. This dust is used extensively to control various vegetable garden insects and may be had thru many local seed stores and hardware stores."

Hidden Evidence

A company of local amateurs produced "Hamlet." The following account of the proceedings appeared in the local paper:

"Last night all the fashionable and elite of our town gathered to witness a performance of 'Hamlet.' There has been considerable discussion in the press as to whether the play was written by Shakespeare or Bacon. All doubt can now be at rest. Let their graves be opened. The one who turned over last night is the author."

Turning Back the Pages of Andover History

TAKEN FROM THE FILES OF THE ANDOVER NEWS

FORTY YEARS AGO

JUNE 1, 1898

Mosher & Greene, Editor & Publisher

The boiler house of J. J. Warfield was destroyed by fire last night.

James McGinty has sold his barn, corner of Second street and Maple avenue to John Kemp, who will move it to his farm to replace the one recently destroyed by fire.

Mrs. T. J. Tulis of Emporium was visiting in town last week.

Rev. V. L. Eggleston returned last night from a business trip to Rutland, Vt.

Mrs. James McGinty returned Thursday from a visit with her son at Pittsburg.

Michael Carvin was in New York City from Monday until Friday of last week.

Mr. and Mrs. S. G. Herrick and son of Brooklyn and C. R. Herrick of New York City are visiting their parents, Mr. and Mrs. G. B. Herrick.

Miss Inez Lever has returned to her duties at St. Joseph hospital in Philadelphia. Her mother accompanied her and will remain for some time.

Prof. E. D. Hardy spent the week-end in Andover. Prof. Hardy has resigned as principal of the Allentown school and will enter the University of Rochester next September.

Mr. and Mrs. J. H. VanLiew of Otisville, Mich., are visiting friends and old acquaintances in town. Mr. VanLiew left Andover several years ago to take up his residence in Michigan.

NEW KIDNEY TREATMENT

New European Discovery, praised by thousands, gives quick relief and lasting results in most stubborn cases of kidney and bladder troubles called NEF-TEX. Not a big expensive dose, but a scientific formula which soothes and heals inflamed tissues. If functional Kidney or Bladder disorders make you suffer from backaches, nervous tension, rheumatic pains, sciatica, burning smarting or bladder irritation you should get this modern treatment at once. Convenient tablet form makes it easy to take and sure. Brings new vitality. Is guaranteed and costs only 3 cents a dose. Remember the name NEF-TEX TABLETS in brown bottle.

Georgianna Bines

Georgianna Bines, 22, wife of Charles Bines, died at their home on Rochambeau avenue Friday afternoon, May 29. Her husband, a daughter and her parents, Mr. and Mrs. B. F. Howland survive. Services were held at the Methodist church Sunday afternoon.

Lyman Cobb

Just as the News goes to press Andover friends received a telegram announcing the death of Lyman Cobb of Fort Worth, Texas. Mr. Cobb is an old Andover man and well known by nearly everyone.

Baker Bros. are sporting a fine new delivery wagon, the only one in town.

Invitations are issued for the marriage of Miss Grace Lanphear to Earl Carpenter of West Virginia, Wednesday evening, June 10th.

Miss Roxa Hann has been visiting Rochester friends this week.

Mrs. W. E. Snyder is passing a few days with friends in Elmira.

Atty. C. L. Earley returned from a business trip to Rochester and Albion, Thursday.

Charles Tracy started for Tilbury, Canada, Thursday, to look after oil interests.

Mrs. Elizabeth Herrick and Mrs. Jennie Rhinevault were in Canisteo, Thursday.

Mr. and Mrs. Ed. Scott of Canisteo visited their son Floyd Scott and family, Sunday.

Mrs. J. M. Brundage left Tuesday evening for a visit with friends in New York City.

J. D. Cheesman and Miss Edith Brainard visited at the home of Mr. and Mrs. John Gilbert at Alfred Station, Tuesday.

J. J. Oakes of Jersey City is visiting his sister, Mrs. Maud Peet, for a few days.

Mr. and Mrs. W. F. O'Connell attended the Fagan-Rauber wedding in Wellsville, Wednesday.

Miss Mamie Dean is home for a two weeks vacation from her duties in the Sisters of Charity hospital in Buffalo.

Homemakers' Exchange

of Helpful Household Hints and Recipes

Conducted by ELEANOR HOWE

A baked date pudding that is just as good several days later is made as follows: Combine 1 cup chopped dates, 1 teaspoon soda and 1 cup boiling water. Cool. Meantime, cream 1 cup butter, add 1 cup sugar slowly and beat well. Add 1 beaten egg, beat well and then blend in 1 cup flour, sifted with ½ teaspoon baking powder. Add 1 cup chopped nut meats and the date mixture. Beat well. Bake in buttered baking dish in a slow oven (300°) approximately 1 hour and 10 minutes. Serve with whipped cream. Serves 8.

• • • •

It's most annoying to have one's best silk stockings snagged by rough edges on the legs of chairs and bridge tables. By coating all such edges with a little mending cement, you can stop these pesky snags right at the source.

• • • •

Here is a delightful ice cream recipe that fairly shouts "Spring is here!" LEMON VELVET: Scald 2 cups milk and 2 cups coffee cream. Then add ¾ cup sugar; stir until dissolved and cool. Add 3 tablespoons grated lemon rind and ¼ cup lemon juice. Fold in 1 stiffly-beaten egg white.

Pour mixture into freezing container of modern ice cream freezer, filling it not more than ⅔ full; assemble and cover. Surround with mixture of 3 parts crushed ice and 1 part rock salt. Freeze until turning becomes difficult, about 5 to 10 minutes. Then carefully remove cover, lift out dasher and pack ice cream down with a spoon. Replace cover, draw off excess water and replenish ice and salt mixture. Let stand at least 1 hour before serving. Serves 6 to 8.

• • • •

You can bring order out of chaos in the family sewing box, with a few large safety pins. Put underwear buttons on one safety pin, dress buttons on another and hooks and eyes on a third.

No more burns from reaching back into a hot oven to turn the pie or baking dish set way at the back! Just make an "oven hook," screwing a right-angle hook in one end of an old window shade slat. Screw a small ring hook in the other end of the slat and you can hang up the stick when it is not in use.

• • • •

One can't have too many luscious dessert recipes—particularly the kind that help use up left-overs! APRICOT TRIFLE: Scald 2 cups milk. Slowly add a mixture of 3 tablespoons sugar, a pinch of salt and 3 beaten egg yolks and blend thoroughly. Cook, stirring constantly, until thick; then remove from heat and cool.

Arrange thin slices of left-over sponge or angel food cake in bottom of shallow pan. Cover with 1 cup stewed apricots; then add the custard. Top with more thin slices of cake and place in modern air-conditioned ice refrigerator to chill for 3 or 4 hours. Just as the properly moist, clean-washed air of the new ice refrigerator will keep the left-over apricots and cake fresh and sweet for this dessert, so will it "keep" this finished dessert—for several days to come.

• • • •

Forever straightening "tipsy" pictures can become a regular household chore! Here's something that will keep them on the straight and narrow. Paste a little strip of sandpaper, about 3 inches long and ½ inch wide, on the lower edge of the picture frame. This grips the wall paper and works like a charm.

MARCONI

They Tried to Shoot Marconi for Inventing Radio

It was my good fortune, before he died, to spend an hour with a man who has had a profound effect on your life. He changed the world in which you live. He made it possible for you to send a message around the earth in one-seventh of a second. He also made it possible for you to sit in your home, turn a dial on your radio and hear the President speak from the White House, or listen to some famous orchestra playing the enchanting strains of the "Blue Danube."

As I sat talking to this soft-spoken modest, unassuming man, it was hard for me to realize that I was in the presence of one of the most distinguished men on earth.

I asked him how he first came to be interested in experimenting with radio, and he said it was largely because, as a young man, he wanted to do some sort of work that would enable him to travel all over the earth. He told me that he felt, by experimenting with electrical waves and devoting his life to wireless telegraph, he would have an opportunity to get out under the sky and travel to far off lands. He said he could never have stood the confinement of working in some small shop.

While he was still a very young man, Marconi was able to send wireless messages across the room in his own home; then, finally, he sent messages a distance of two miles. He was greatly excited. His father told him he was wasting his time; but a few years later, young Marconi sold some of his patents to the British government for a quarter of a million dollars and his father was impressively impressed.

In 1901, Marconi believed that the great dream of his life was about to come true; so he rushed across the Atlantic Ocean, confidently expected that he would be able to receive messages from his sending station in England.

Landing in Newfoundland, Marconi sent up a kite to act as an aerial. He listened—listened for hours waiting breathlessly for the signals that were supposed to come from his station in Cornwall, England. But none came; there wasn't a sound. Tragically disappointed, he believed that his experiment was a failure, that the great dream of his life had been blasted.

Then suddenly, he heard a faint click. Then another. Then another. Yes, that was it. There it was; the signal they had agreed upon. The three dots which stood for the letter S in the alphabet used by telegraph operators. Flushed with excitement, Marconi knew that his achievement was momentous history. He longed to rush out and shout the news from the housetops. But should he? No. He feared people wouldn't believe him; so for 48 hours he shared his secret with no one. Then, gathering courage, he cabled the facts to London. They created a sensation. Newspapers on five continents featured the story; and it set the scientific world seething with excitement.

And how old was Marconi when he did all this? Only 27. Immediately he began getting letters from cranks. These fanatics complained bitterly because they imagined that his electrical waves were passing thru their bodies, destroying their nerves and making it impossible for them to sleep.

I asked Senator Marconi how long it would be before you and I could have good, practical television sets in our homes. He said probably in about ten years, maybe sooner; so it won't be long before we will be sitting in front of our fireplaces, watching a fashion show in Paris, or a football game in California.

STATE OF NEW YORK:
COUNTY OF ALLEGANY:
COUNTY COURT:

JOHN FISHER,
Plaintiff,
vs.
EMILY SINGSCHEIMER, as administratrix of the Estate of Matthew Singscheimer, deceased, ROBERT SINGSCHEIMER (also known as Robert Lewis), SILAS HOWARD and LIZZIE HOWARD,
Defendants.

By virtue of an order of foreclosure and sale granted in the above entitled action and entered on the 22nd day of April, 1938, in the office of the Clerk of the County of Allegany, the undersigned, Frank W. Burrows, the referee duly appointed in this action for such purpose, will sell at public auction on the 13th day of June, 1938, at two o'clock in the afternoon of that day, at the Law Office of Clayton L. Earley, in the village of Andover, New York.

ALL THAT TRACT, PIECE OR PARCEL OF LAND situate in the Village of Andover, County of Allegany and State of New York, portion of lots number 35 and 66 in township Number Two (2), Range seven (7), (illegible) and bounded as follows:

Beginning in the north line of Lot No. 66, 63.36 ft., westerly from the east 100 acres of said Lot No. 66, and at the northwesterly corner of a lot now owned or occupied by Floyd Randall; thence S. 7.40 W. 214.50 ft., crossing Dyke Creek and along lands of said Randall and lands formerly owned by William Rice; thence N. 83.29, W. 399.66 ft. along lands of Charles Lynch and lands formerly owned by Rice to an iron pipe; thence N. 7.40, E. 152.42 ft., crossing Dyke Creek to a point S. 7.40 W., 70.00 ft. from the northerly line of said Lot No. 66; thence N. 83-42 E. 414.53 ft., crossing line of Lots Nos. 66 and 65 to an iron pipe in what was known as the O'Boyle lot; thence S. 7.40 W. 35.00 ft. to the place of beginning and containing 1.844 acres of land. Excepting and reserving such easement or right of way for road purposes as now exists along the northerly side thereof.

Being the same premises owned and occupied by Matthew Singscheimer at the time of his death.

Dated April 23rd, 1938.

FRANK W. BURROWS, Referee
CRAYTON L. EARLY, attorney for plaintiff, office and postoffice address, Andover, New York. 23

Lucky Break!

The midday whistle had blown when Murphy shouted, "Has anyone seen me vest?"

"Sure, Murphy," said Pat, "and ye've got it on."

"Right and I have," replied Murphy, gazing solemnly at his bosom, "and it's a good thing ye seen it or I'd have gone home without it."

WHAT DO MOVIE STARS DO FOR THEIR TEETH?

It stands to reason that Hollywood stars need sparkling, lustrous teeth more than anybody else in the world. And therefore, it is significant that so many famous stars use *Calox Tooth Powder*. Calox is made specifically to give teeth a real beauty polish. It contains *five* cleansing and polishing ingredients.

TRY CALOX—FREE!

Because a trial is so convincing we offer you a FREE 10-day trial. See coupon. You be the judge. Convince yourself that Calox makes teeth shine ... shine like the stars.

FREE TRIAL COUPON

FREE TRIAL COUPON — Dept. A N.F.
McKesson & Robbins, Inc., Fairfield, Conn.
Send me a 10-day trial of CALOX TOOTH POWDER at no expense to me. I will try it.
Name
Address

OUR CHURCHES

BAPTIST

Rev. W. C. Gates, stated supply

Sunday, 10:30, Morning worship. Sermon by Rev. W. C. Gates.

11:45, Bible School.

6:30, Christian Endeavor.

Prayer meeting Thursday evening at 7:30. The W. W. G. will meet with Mrs. Eggleston this Friday evening. Mrs. Thomas of Rushford will be guest and present an interesting talk.

SEVENTH DAY BAPTIST

Walter L. Greene, Pastor

Sabbath services at 2:30 p. m. The pastor will speak.

Bible School following the church service at 3:30.

Independence

Morning worship and sermon by the pastor at 10:30.

Sabbath School following the church service at 11:45.

The Ladies' Aid will serve supper at the parish house Saturday night, June 4.

PRESBYTERIAN

Rev. Lucien H. Kerns, Pastor

Morning worship at 11:30. Sermon, "As Little Children."

Sunday School at 10:30.

The Young People's Society will be the guests of the Young People of the Belmont Presbyterian church on Sunday evening at 7:30. Transportation to Belmont will be provided and all our members are cordially invited to take this opportunity of meeting new friends.

The music festival being held in this church next Tuesday evening at 7:30 promises to be most pleasing and entertaining. It is hoped that there will be a good attendance.

METHODIST EPISCOPAL

Edward J. Cory, Minister

10:30 Public Worship. Observance of Holy Communion, with brief address by the pastor.

11:45 a. m. Church School. Subject of Bible study: The Heart of Christian Service.

The following questions may be considered: "How can we misuse the principle of giving, but not counting the cost?" "Is there any danger of becoming too commonplace in our manner of giving?" "Is one who never gives a costly gift to a friend or to the church likely to be one who gives generously to the poor?"

The young people's evening meeting has been suspended for the summer.

Wednesday, June 8th at 2:30 p. m. The monthly meeting of the afternoon division of the Ladies' Aid at the home of Mrs. Boyd.

CHRISTIAN AND MISSIONARY ALLIANCE

Rev. H. E. Wilson, Pastor

Sunday School at 1:45 p. m. After a temperance lesson we go once more back to the Gospel According to Saint Mark. Topic: "The Heart of Christian Service." Let us not forget to come to Sunday School despite the warm weather. Classes for everyone and strictly fundamental literature is used throughout the classes.

Afternoon public worship at 3 p. m. Message by the pastor. Topic: "Our Lord's Prayer Life." Following this service we will commemorate the Lord's death and return, by gathering around the Lord's table, thus carrying out His injunction "do this in remembrance of me." We give one and all a very cordial invitation to come and worship with us.

Evangelistic service at 7:30 p. m. Come and enjoy this time of old fashioned Gospel singing and testimonies, choruses and a message for both young and old by the pastor. Topic: "What Are Your Chances?" We extend a cordial invitation for everyone to come.

Bible study and prayer meeting on Thursday evening, at the home of Charles Earley on North Main street at 7:30 p. m. Lesson is from the fifth chapter of the "Epistle to the Romans." Topic: "Seven Results of Justification." Come and bring your Bibles, pencils, paper, and above all, yourselves.

Young people's meeting on Friday evening at the home of Jett Blodgett, lower Rochambeau avenue at 7:30 p. m. Leader this week will be Mrs. Chase and the topic under consideration is "The Diety of Christ." Older folks, the young folks give you a cordial invitation to come and enjoy these most interesting lessons with them.

Collector's Notice

TAKE NOTICE: I the undersigned, Clerk of the Village of Andover, New York, have received the tax roll and warrant for the collection of taxes levied for the present year and I will attend at the office of the Village Clerk in the village office building in said village on June 1st and until July 1st except Saturdays, Sundays and holidays, from 9 o'clock in the forenoon until 4 o'clock in the afternoon of each such days, for the purpose of receiving taxes assessed upon such roll.

For such period of time taxes may be paid to me without additional charge and on all such taxes remaining unpaid until after July 1st five per centum will be added for the first month and an additional one-half of one per centum for each month and fraction thereof thereafter until paid.

Dated May 25, 1938.

CHAS. B. CAPLE,
Clerk.

I Pick 'em Up
TRUE STORIES OF HITCH HIKERS
by L. ELLIS EVONS

A BLIND SISTER

Well, of all things — a hitch hiker with an umbrella.

In all my 25 years of motoring this was the first time I had ever seen that. My travels have taken me over many states, I have picked up hundreds of young and old, fat and thin, down and outers and has-beens, admitted tramps, and students going home for the week-end, every kind and condition of humanity. But here was a new one—an umbrella.

I did not wait for him to thumb more than once. I wanted to give a lift. I felt here was something different, a story in the making. I was not to be disappointed. Having just completed a week of lectures, ten in six days, my throat was tired and I wanted someone else to do the talking. It was Saturday morning and I was on my way home.

My hiker was a youth of 16 years and in response to my usual question as to where he was headed and who he was, I was told a story that should be a lesson to every hospital, doctor and mother.

"My name is J—— M——, and I live in Lancaster, Pa., with my father. I am on my way to Philadelphia. I have never been all the way in the city and I would like to see the big buildings, the historical places I have read about and Wanamaker's Store," the youth replied.

I explained some of the places he should see, and as I would be going all the way to my office which was in the east end of the city, I could take him almost to Independence Hall which he was most anxious to see.

"You know," he said, "I will not have much time and I certainly am glad that you gave me this lift, because I must see my little sister. She is in the Pennsylvania Institution for the Blind at 64th and Woodbine Ave., which is out in that section they call Overbrook."

Yes, I knew the school, as I had often visited it on business and knew the superintendent very well, also a blind cousin of my mother's had been a teacher there many years ago.

"How did your sister become blind?" I asked him. "Was she born blind?"

"Oh, no, I will tell you how it happened. My parents lived in New York State, and my sister was born in the ——Hospital eight years ago. There were six other babies in the hospital ward and one morning a doctor went through the room where the babies were altogether and wiped the eyes of the babies with some kind of antiseptic which destroyed the eyesight of the seven babies. Of course there was an awful time about it, but the parents could not do anything. Later my sister was in an institution in New York State and when President Roosevelt was Governor of New York and he visited the school, my sister was the one chosen to extend the welcome.

"Later on my Mother and Father separated. My father and I moved to Lancaster, and my sister was transferred to the school in Philadelphia."

What a lesson there was in the story of this boy. Seven little babies blinded because a poisonous antiseptic was used in that hospital. As a lecturer on health, continually calling the attention of my audience to the danger of poisonous preparations around the home, this case certainly proved that there is a danger in many preparations that are advertised as being used by hospitals.

Allegany County Youth Camp Opens July 10th

The Allegany County Youth Camp sponsored by the Allegany County 4-H Club, will open this year on July 10th and operate until July 17th. This camp is specially planned for boys and girls between the ages of ten and 21 who are not affiliated with other organized camping groups in this area. The camp is located at Eggleston Park on the Genesee river and is provided with spacious accommodations with large roomy cabins, lodge, dining hall and staff quarters.

Several courses of study are annually offered to the boys and girls attending this camp. These are in charge of trained counselors with many years camping experience. The courses include nature study, camping and woodcraft, first aid, social recreation, and crafts. In addition it is the promise of the camp staff to give instruction in swimming to all physically able boys and girls. The campers may qualify for the American Red Cross awards offered by the American Red Cross examiner. The water front at Eggleston Park has been materially improved and now offers excellent swimming facilities.

For complete information regarding this summer camp, you are invited to correspond with the 4-H Club office in Belmont.

Births

May 23.—To Mr. and Mrs. Adrian Lane of Friendship, a daughter.

May 26.— To Mr. and Mrs. Mark Brownell of Wellsville, a son.

May 26.—To Mr. and Mrs. Edwin Dickinson of Wellsville, a daughter.

May 24 —To Mr. and Mrs. Charles Reardslee of Fillmore, a daughter.

May 28. -To Mr. and Mrs. Joseph Rabbitt of Wellsville, a son.

May 30.—To Mr. and Mrs. Wayne Slack of Whitesville, a son.

Ned Stevens, 60, of Caneadea, at Fillmore hospital, May 25, the result of injuries received when he was struck by a car operated by Rev. Mann of Scio. His wife and six children survive. Services were held Saturday at Oramel.

Noted Carillonneur At Alfred Commencement

Alfred, June 1.—Kamiel Lefevere, carillonneur of the Riverside church, New York City and a graduate of the international School of Carillon Art, Mechlin, Belgium, will give the dedicatory concert on the Davis Memorial carillon at Alfred University on Sunday, June 12 at 3 o'clock, as part of the 102nd Commencement exercises.

Mr. Lefevere, a native of Belgium, is ranked as one of the leading carillonneurs of America, if not of the world. He studied under Jef Denyn, the world's greatest carillon player, and has played "by command" for the King of Belgium, and has appeared in special concerts for the King of England and for the President of France.

Recently, Mr. Lefevere spent two days at the Alfred campus adjusting and inspecting the Davis Carillon, and assisting Prof. Ray W. Wingate, who has been giving regular concerts this winter. Mr. Lefevere is very enthusiastic about the Alfred bells, saying that they are of very fine quality and tone.

"You are very fortunate to get these old Belgian bells (they all were cast between 1674 and 1784). The Belgian people regret that they have left the country," said Mr. Lefevere.

AROUND OUR HOUSE

MELTING THE ICE BILL

With warm weather and sunny days, many persons face the problem of keeping foods cold and paying for refrigeration. This can often be simplified by the homemaker who knows her refrigerator.

She doesn't melt good ice to keep cold paper bags, carrot tops, wrappings, the outside leaves of lettuce, and other things which will be discarded later. And she doesn't put into the refrigerator fruits and vegetables that are to be prepared almost immediately.

She is careful to cool all hot foods before putting them into the refrigerator; if she spills something in the ice-box floor she wipes it up with a cold or lukewarm damp cloth instead of a hot one. When preparing a meal or cooking, she removes at the same time all the ingredients needed so that she opens the refrigerator door as few times as possible.

She keeps the ice-box well stocked at all times, because it is more economical to put a chunk of ice into a cold place than into one that has been allowed to become warm. She knows it is false economy to wrap the cake of ice in paper or cloth, because altho such treatment may keep the ice longer, it also prevents adequate refrigeration and thus food is more likely to spoil. She does not crowd foods closely together, because a free circulation of air is needed for proper refrigeration.

And, whenever possible, she places her ice refrigerator where it is easily accessible to the ice man, and away from the stove and sunny walls, says the New York State College of Home Economics.

WAKE UP YOUR LIVER BILE—

Without Calomel—And You'll Jump Out of Bed in the Morning Ready to Go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food won't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Your whole system is poisoned and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't get at the cause. It takes those good, old Carter's Little Liver Pills to get three two pounds of bile flowing freely and make you feel "up and up." Harmless, gentle, yet amazing in making bile flow freely. Ask for Carter's Little Liver Pills by name. Eschewing refuse anything else.

ASBESTOS SIDEWALL SHINGLES

We are equipped to apply, and do a first class job.

We recommend Cork Back Weatherpad—provides double insulation—Warm in winter and cool in summer. A number of door-to-door salesmen are operating in this locality. We definitely know we can give you a better job at the same cost or less—in most cases our price is less.
