ANDOVER, N. Y., AUGUST 12, 1891.

The Wyoming Legislature has made a law taxing bachelors $2 a year. If they refuse to pay the tax will they be sold at public auction?

A London physician claims to have discovered that opium-smoking is at least a partial remedy for consumption. It is an open question which is the least preferable, death by consumption or the opium habit.

The Republican County Convention will be held at Belmont on Monday, Aug. 31st, at two o'clock p. m. A county ticket will be nominated, and delegates to the State, Judicial and Senatorial Conventions will be elected.

A call has been issued to all reform associations in Allegany county to send delegates to a meeting to be held at Belmont on Monday, August 24th, to decide as to the advisability of nominating an independent ticket in this county this fall. It looks as if the decision would be favorable to the nomination of such a ticket. What makes it appear so is the fact that the delegates elected to this preliminary meeting must subscribe to the platform adopted by the People's Party at Cincinnati recently, and it is fair to assume that a man who endorses that platform in its entirety would naturally favor an independent ticket. This provision of the call is manifestly unfair if it is desired to get an honest expression of the views of members of all reform associations.

WISPS FROM WELLSVILLE.

DEAR NEWS: We have been long away and in the meantime various things have happened here in Wellsville. Bells have tolled and not a few have bidden Wellsville a long good-bye and gone to reside in the silent city outside our city limits. But Wellsville jogs on, no better, no worse for the solemn warning, only perhaps a few hearts sad and lonely. On the other hand, wedding bells have pealed forth joyous notes; tin pans have been beaten, horns blown and every kind of noise, earthly and unearthly, made. Four hearts that beat as two have been launched on the sea of matrimony, at least Stephie and his Mary have because he told us so and we heard the noise. There have been some shipwrecks on the same old sea, and two other hearts that once beat the same tattoo don't beat so any more. What wrecked their boat? Do you wonder?—want of ballast of course, and he wanders sad and lone in the wilds of Pennsylvania, and she has both pillows now with none to say her nay. Sad, yes, but such is life. But Wellsville don't mind, she is engrossed with other things just now, and when a trusted clerk went astray one day last week, or rather went astray some time ago, and was found out last week and brought to our princely place of confinement for a few hours, Wellsville simply looked over her shoulder and said, "Rough on Jack," and jogged on and on.

We are going to have the finest Firemen's parade possible and the boys will do their level best to make it the very best thing out, so come down and see. One little fellow said, "It will be the bestest fireman's torment (tournament) we's ever had in this old town, 'cause my brother, he's in it, and I am sure he is right."

The churches have been running to picnics for the last few weeks and have had a good time. The stockholders of the W. C. P. C. R. R. are to have one too; it has been postponed several times, why no one seems to know. Whether their families are out of town or they can't get enough together to get reduced rates, the *Reporter* saith not.

We are having out-of-door service in the Park on Sunday afternoons, under the auspices of Y. M. C. A., and the talk from Sec. Grant last Sunday was exceptionally good. Our Park is fine and we invite you all to come down, but come before we have a flood, as we don't wish to have our veracity doubted.

Mrs. Frank Macken, who has been seriously ill for the last few weeks, is very much better and seems on the sure road to health again.

Wellsvillians go out of town for health and comfort and from other places they come here to sail it—that means many are out of town who belong here and many are in town who do not.

Our police court is dull and his Honor finds recreation in overseeing the finishing up of his new house and it is really very pleasant to look upon and soon our police justice will be one flight further down the street. O.

Cosmopolitan Broadway.

You can see more curious costumes on Broadway than in any other city in the Union, and I know of no place in the world where they attract less attention. You can wear what you please. If you are in white flannel, flaming sash, polka dot hat and patent leather pumps it will be just the same as if you wore homespun jeans, a slouched hat and cowhide boots. Nobody will notice you particularly.

Or you may go as a Turk, in loose trousers and fez; or as a Chinaman, with your shirt outside of your trousers and wooden shoes; or as a Texas cowboy, with leather leggings, beads on the seams of your trousers and a Mexican sombrero with bugles on the brim. It does not matter. On Broadway everything goes. In any other city a strange or bizarre costume will provoke disagreeable comment, attract a mob of boys, at least excite embarrassing manifestations of surprise and disapproval in some shape; nobody pays any attention to such things on Broadway.—New York Cor. Pittsburg Dispatch.

Dragon Flies as Mosquito Hawks.

The offer of a prize for the best essay on a method of destroying the mosquito brought out a large number of curious ideas on the subject. Dr. Lambern's idea of artificially rearing dragon flies for the purpose of exterminating flies and mosquitoes seems to have met with little favor. Mr. Weeks, to whom a prize was awarded, considered that any attempt to destroy flies and mosquitoes by the artificial propagation of dragon flies or any other insect would be "impossible, unadvisable and impracticable." Various methods of destruction have been proposed, among which are sprayed petroleum (for the larvæ and pupæ), flushing and grading of land, cultivation of fungoids, the employment of attracting lamps in the neighborhood of marshes, the rearing of fish and the encouragement of water fowl where fresh water is abundant.—New York Commercial Advertiser.

Of What Are We Made?

Take in your hand a crystal of quartz, a stick of deal, a daisy and an acorn and you will not find in them a single element of matter that is not also found in your physical frame.—Boston Globe.

A City on a Volcano.

"San Salvador is all on a volcano," said Senor Jose Fulano, of Pasolibre, at the Grand Pacific. "It has been three times destroyed by earthquakes, but the people get used to it and do not seem to mind it. It comes at intervals, and really while it makes one excessively nervous there is little danger to life. I have known the shocks to come as frequently as eighty times in an hour. The effects are quite peculiar. In the city of Salvador is a brick column nine feet high and three feet square. That was shoved some one hundred feet without losing its perpendicularity or cracking the mortar.

"The ground under the city of Salvador is full of caverns of unknown depth. A man was digging a well there. The last stroke he gave with his pick the bottom fell out, and he and his pick and all fell through, nobody knows where—to China, probably. There is a volcano not far from Salvador that some years ago discharged lava over a forest. The wood all burned, of course, but the lava being light and easily cooled hardened into long arcades through which one may walk, and as you go you can see the imprint of the trunks and branches of the trees in the now cooled lava."—Chicago Tribune.

AN INTERESTING LETTER.

Written from Andover—Strong Testimonial for Dr. Kilmer's Swamp Root.

ANDOVER, N. Y., May 3, 1891.

DR. KILMER:—

Dear Sir: I thought I would write you a few lines and tell you how much we think of your remedies. About three years ago my husband commenced to fail very rapidly with kidney trouble. He lost his appetite and became so weak that the least exertion would cause him to lie down. He could scarcely walk. He doctored with all the local physicians here, but without getting any relief. He gave up and said that he could not live three months. One day we received one of your "Guides to Health" through the mail, and I persuaded him to get a bottle of your Swamp Root and try it. Before he had taken the whole of the first bottle we could see a change for the better. He kept up the treatment for some time, until he was able to do considerable work, and to-day he is so much improved that it is not necessary for him to take the medicine all the time, and he can walk a mile and a half to the village and back.

We have also tried your Indian Cough Cure, and never found anything that could beat it. I noticed in our "Guide to Health" that you would send six beautiful cards and a picture of yourself. We would be very glad to get your picture, as we are certain he would have been in his grave, if it had not been for your Swamp Root. We recommend your medicines everychance we get.

It has been ascertained by experiment that if the tassels are removed from corn before they produce pollen an increased amount of grain is the result. It is reported that at the Cornell agricultural station, where the experiment was tried, rows of corn thus treated produced fifty per cent. more than those adjoining left to grow naturally. This is important if true.

It makes all the difference in the world which ox is gored. Because the farmers are advised to hold their crops in order to get the benefit of higher prices, newspapers representing interests which have fattened at the farmers' expense are shouting "trust." This is arrant nonsense. The farmer has been the under dog in the financial fight long enough, and if he can make a little money this year by holding on a little while for Heavy's sake let him do it in peace.—*Times.*
