RUSSIANS ARE BEATEN

Mikado's Troops Pursuing the Enemy

MANY PRISONERS TAKEN

Russians Officially Admit They had to Retire- Heavy Fighting in a Snowstorm- Both Armies well Supplied with Artillery Japanese Kind to Russian Prisoners.

Tokio.—Telegraphic advices received here from the Japanese headquarters in Manchuria say:

"Our detachment occupied Liutiaho and was twice counter-attacked by a superior force of the enemy.

"Our other detachment attacked the enemy in the neighborhood of Feitsihotzu, about two miles north of Hekoutai, and occupied the position.

"The enemy fiercely counter-attacked our force which assaulted Hekoutai, but was repulsed entirely. The enemy has retreated to the right bank of the Hun River and our force is now pursuing them. We captured 200 officers and men."

The snow is deep and it is bitterly cold, and the troops eagerly seek the protection of the villages which, in this district, have escaped destruction.

The Russians are massing at 65,000 troops on the Japanese left and are bombarding the left flank and center. Small forces of Russians are attacking all along the line.

St. Petersburg.—Just ad of confirmation of the report that Gen. Kuropatkin had broken through the Japanese left there has come Gen. Sakharoff's official admission that the Russians were compelled to retire from Sandepas on account of their inability to capture a redoubt.

It is significant that despatches from Russian correspondents at the front have again suddenly ceased, which is regarded as an indication of the failure of the operation, and strengthens the first impression that it was a demonstration undertaken to distract the people at home from the present situation.

There is more artillery on both sides than at any previous period of the war.

St. Petersburg. — Governor General Trepoff issued a proclamation which reveals the government's plan for breaking the strike throughout Russia.

The proclamation invites the strikers to return to work, promising them in the Emperor's name a revision of the general law so as to restrict the hours of labor, the institution of a plan for State insurance, and otherwise to meet their demands so far as the law will permit, and guarantees them protection against interference by agitators.

In addition to the horrors of the streets there is beginning to be a scarcity of food and other necessaries. Petroleum and sugar cannot now be bought. Famine is apprehended at no remote date.

St. Petersburg.—Grand Duke Vladimir, in an interview, said: "With this unhappy war upon our shoulders we are passing through a crisis. I will not attempt to conceal it; it cannot be concealed; but with the help of God we will emerge from it as we have emerged from other troubles in the past. In the interior there are many elements of discord, but the situation is not so bad as it is painted. The disorders at Warsaw, Kieff and elsewhere are largely industrial, produced by trade depression and consequent lack of employment on account of the war. They are not revolutionary at the base.

Tokio.—The Japanese are taking good care that the Russian rank and file are not left uninformed regarding the disturbances in Russia. They are carrying on a regular campaign to spread sedition and discouragement among the troops.

Letters are daily thrown within the Russian lines declaring that all Russia is aflame with riot and revolt, arguing that the soldiers are shedding their blood in vain, and calling on them to surrender or desert. The soldiers eagerly read and discuss these communications.

London.—According to a Tokio despatch, Russian cavalry is from the interior are concentrated at Lake Baikal, owing to the fact that the railway east of that point is blocked by snow.

The Japanese flew a large kite into the Russian lines. The kite was covered with photographs showing the treatment of Russian prisoners in Japan.

St. Petersburg.—The annual ceremony of blessing the waters in front of the Winter Palace was performed by Emperor Nicholas. During the ceremony several shots were fired from across the Neva, and bullets entered windows of the palace. No one was hurt. There was a great throng gathered about the palace and surrounding the Czar were members of the royal household cabinet officers, church dignitaries and other notables.

Japanese See End of War.

Tokio.—Two Japanese are kept by watching the development at St. Petersburg. The newspapers publishing extras with accounts of the riots are eagerly read. The people were shocked at the death toll, and there is a widespread feeling that the bureaucracy will be powerless to stem the tide and that the downfall of the bureaucratic system must end the war.

Shamokin, Pa.—The Philadelphia and Reading Coal and Iron Co. refused to pay the heirs of Frank Panjorsky $364 death benefit funds, asserting he had been murdered instead of having met with an accident. A Pole knocked him down a chute and then disappeared.

POLITICAL.

Albany.—The first real day's work of the Legislature brought a fine exhibit of political lawyers, professional lobbyists and politicians who look after things in the way of offices. The chief work of the Legislature for the week was the appearance of a large number of gentlemen who turned up every night this week to confer on York State Jobs. Fifty per cent. of them were lawyers. The New York State offices and interests of the Legislature in the last best of organization are mostly railroads.

Albany.—State Engineer Van Alstyne returned to Albany, having been one of a party of guests at "Bull Run," the Adirondack camp of ex-Lieut.-Gov. T. L. Woodruff. He said that a topic discussed by the party was a proposed vehicle and automobile road through the Adirondacks, which, if constructed, will form a loop, winding from Utica through the Black lake district to Saratoga.

Albany.—To prevent so-called fake mining companies not located in this State from offering their stock for sale to people in New York, Senator Allen has introduced a bill prohibiting the sale of any mining and oil shares of any company whose plant is not located in New York State, and that amount of the financial standing to be assigned to the company, and the whole plant of the company has been filed with the Secretary of State.

Washington.—The President has sent two messages to Congress. One of them called attention to the fact that no statistics on marriage and divorce laws have been collected in years, and urged legislation to remedy the lack, to the end that uniform divorce laws may be made possible. The other message referred to the laxity of corporation laws for the District of Columbia.

Gov. Higgins has been a familiar figure at Albany since 1894. D. Cady Herrick, Mr. Higgins' opponent in the gubernatorial campaign last fall, for a lifetime has been a resident of Albany, and Gov. Higgins and ex-Judge Herrick have never met nor even seen each other. Their first meeting is to be at the Amen Corner dinner at the Fifth Avenue Hotel on Feb. 18.

Senators Lodge and Spooner in the United States Senate, attacked the amendment to the Army Appropriation bill designed to cut down General Miles' pay.

Austin, Texas.—The two houses of the Texas Legislature in joint session formally elected Charles A. Culberson to the U. S. Senate.

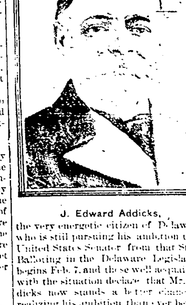
The House Judiciary Committee has agreed to report favorably a resolution directing the Secretary of Commerce to investigate the Steel Trust.

Charleston, W. Va.—In joint session the Legislature formally re-elected Senator Nathan B. Scott.

Canada Invites Immigrants.

Washington.—According to a communication received at the State Department, the Canadian authorities intend to start a vigorous campaign in New York and Pennsylvania to secure settlers for Canadian territory. The advertising displayed at the World's Fair, the communication says, has caused a lively interest throughout the United States and is likely to be followed by an increased flow of immigration to the Canadian West. The report says:

"It is intended to carry on a vigorous propaganda in New York State and Pennsylvania. Substantial results are expected from the movements through Great Britain of travelling cars, decorated with trophies emblematic of Canadian agriculture. Lastly, it is hoped by making a really first-class exhibit at Liege, Belgium, in the very midst of a frugal and industrious people, well drilled in agriculture, to attract to the dominion some of the best elements of Europe."



J. Edward Addicks,

the very energetic citizen of Delaware, who is still pursuing his ambition to be United States Senator from that State. Balloting in the Delaware Legislature begins Feb. 7, and the sore will be opened with the situation develop that Mr. Addicks now stands a better chance of realizing his ambition than ever before.

Mrs. Chadwick Bankrupt.

Cleveland, Ohio.—Mrs. Chadwick has been adjudged a bankrupt by Judge Wing in the United States District Court. The time set for her to file an answer to the charge of bankruptcy expired, and the entry of bankruptcy was recorded at once in default.

The creditors will now meet and elect a trustee to take charge of the property and distribute it among the creditors. There are no indications at present what the estate will pay, but it is expected that the distribution will be as low as five per cent. No further effort was made to obtain bail for the woman.

REFLECTIONS

About all the [illegible] in this [illegible] is to contribute to a [illegible] fund.

Some men's [illegible] are [illegible] to contribute to a [illegible] fund.

The new woman [illegible] a lady he came there were two new men to match.

The average man has a better opinion of himself than the Lord has of him.

It is easier for an orator to make a speech than it is for the speech to make him.

When a man flatters you put on your spectacles and look around for the ax he has to grind.

No Cordelia an indulgent husband doesn't always come home early. Sometimes he's too full to get home.

After walking home from the race-track a man is in the humor to sneer at his wife for taking chances on the prize cake at a church fair.

Quinine in India.

The inhabitants of malarious regions in India can now purchase quinine at practically cost price. It is put up in small packages by the government and sold at the rate of 1 cent for ten grains.

You Must Sleep.

If you cannot, it is due to an irritated or congested state of the brain, which will soon develope into nervous prostration.

Nature demands sleep, and it is as important as food; it is a part of her building and sustaining process. This period of unconsciousness relaxes the mental and physical strain, and allows nature to restore exhausted vitality.

Dr. Miles' Nervine brings refreshing sleep, because it soothes the irritation and removes the congestion.

It is also a nerve builder; it nourishes and strengthens every nerve in your body, and creates energy in all the organs.

Nothing will give strength and vitality as surely and quickly as Dr. Miles' Nervine.

"During the past winter I had two attacks of La Grippe which left me very weak, and in bad condition, was so nervous I could not sleep. My wife, after trying different remedies, went for a doctor. The doctor was out, and a neighbor recommended Dr. Miles' Nervine, and she brought home a bottle. I had not slept for some time, and had terrible pains in my head. After taking a few doses of Nervine the pain was not so severe, and I slept. I am now taking the second bottle, and am very much improved."

HENRY M. SMITH, Underhill, Vt.

Dr. Miles' Nervine is sold by your druggist, who will guarantee that the first bottle will benefit. If it fails, he will refund your money.

THE OSBORNE,

WITH BRAINARD & MARVIN.

Euchre Party.

Friday evening Mr. and Mrs. E. M. Allsted entertained the Greenwood Progressive Euchre Club.

The invitations bore the request that the guests wear calico costumes and altho the mercury hovered about the zero point the request brought a motley dressed crowd arrayed in cotton made and calico. Nine tables were kept busy with the pasteboard battles until near the hour that ghosts come out when the company laid aside their weapons of war and sat as friends set at a festive board at which was served a delicious repast. Quite a number were present from near by towns and it was unanimously voted a good time.

Extravagance In Town Affairs.

The Times has called attention from time to time to what has seemed to us to be a too lavish expenditure of the people's money in town affairs. The article in last week's Times has called at another on the same subject which is published in this issue. It will be seen that the Times is not standing alone on the subject.

Team Ran Away.

Three men, Messrs. Jackson, Marbott and Talbot met with a runaway accident at Cameron, leaving all three in a most critical condition. All were kicked up unconscious. One had his jaw broken and a part of his jaw bone was removed with some of the teeth in the same.

Important Sale of Real Estate

Charles Van Schaick has sold his fine farm, of 230 acres in Jasper to Mr. Keiff of West Union, consideration $5,000. This is one of the best farms in West Jasper and is finely located. Mr. Keiff is a desirable citizen and good farmer.

Stuck in the Snow.

Wednesday the blizzard raged with great force and by night it had piled the snow to suit the taste of Æolus. At the cut near D. Putman's the freight train got stalled, delaying the passenger train until long after midnight in reaching Greenwood.

When You Have a Cold.

The first action when you have a cold should be to relieve the lungs This is best accomplished by the free use of Chamberlain's Cough Remedy. This remedy liquefies the tough mucus and causes its expulsion from the air cells of the lungs, produces free expectoration, and opens the secretions. A complete cure follows. This remedy will cure a severe cold in less time than any other treatment and it leaves the system in a natural and healthy condition. It counteracts any tendency toward pneumonia. For sale by O E Vars & Son, Andover, and N. E Coston, Greenwood.

Hurt Switching.

Conductor F. Reed was injured while switching cars at Canisteo Saturday. We are glad to learn his injuries are not serious.

Grave Trouble Foreseen.

It needs but little foresight, to tell, that when your stomach and liver are badly affected, grave trouble is ahead, unless you take the proper medicine for your disease, as Mrs. John A. Young of Clay, N. Y., did She says: "I had neuralgia of the liver and stomach, my heart was weakened, and I could not eat. I was very bad for a long time, but in Electric Bitters, I found just what I needed, for they quickly relieved and cured me." Best medicine for weak women Sold under guarantee by O. E. Vars & Son's, Andover, and N. E. Coston's, Greenwood, drug stores, 25c, guaranteed, druggists, at 50c a bottle.

EXPENSE INCREASING

A Comparison of Previous Expenses With Those of Later Years by L. G. Burton.

Mr. Editor:

In your issue of Jan. 20, 1905 I was much interested in your table of comparison of town charges for twelve years past, made in two periods of six years each, showing an average small increase of about eleven hundred dollars. While these figures are a surprise and seem incredible to some, yet, had you went a step farther in your investigation you would have found a greater surprise. Your table does not include the two thousand and four hundred dollars the town owes for the school house and Woodward Hollow bridges. This amount added to the last six year period would make the average annual increase, over sixteen hundred dollars. Astonishing as these figures are, yet had the twelve years been divided in two periods, as follows: one of seven years and one of five years, (as I think they should be) the figures will be still more astonishing. My reason for saying they "should be" so divide is this: During the seven years 1893 to 1899, inclusive, there were expenses outside the ordinary and regular town expenses, viz: the opposition to the proposed Guinn Highway in 1895 cost the town two hundred and fifty-three dollars, the expense of the three commissioners of ninety dollars and the cost of the opposition to the Highway to the N. Y. & P. Depot of sixty-five dollars and forty-five cents making a total of one hundred fifty-five dollars and forty-five cents. In 1898, and the payment of one thousand and sixty dollars for the land for Highway to the depot in 1899. There has been no extraordinary expenses since 1899 to my knowledge. What I mean by ordinary and regular town expenses is Expense of Bridges and established Highways, Support of Poor, Fees and Salary of town offices, G. A. R. appropriations, Hall (and Office?) rent. With the twelve years divided into a seven and five year period there would be an average annual increase in the ordinary and regular town expenses of over eighteen hundred dollars, or in other words, five years of the latter period has cost the town of Greenwood over nine thousand dollars more than five years of the former period, nearly one third as much as our R. H. & P. C. R R. bonds.

Agonizing Burns.

are instantly relieved, and perfectly healed, by Bucklen's Arnica Salve. C. Rivenbark, Jr. of Norfolk, Va., writes: "I burnt my knee dreadfully; that it blistered all over. Bucklen's Arnica Salve stopped the pain, and healed it without a scar." Also heals all wounds, sores, 25c at O. E. Vars & Son's, Andover, and N. E. Coston, Greenwood, druggists.

Poisons in Food.

Perhaps you don't realize that many pain poisons originate in your food, but some day you may feel a twinge of dyspepsia that will convince you. Dr King's New Life Pills are guaranteed to cure all sickness due to poisons or undigested food—or money back. 25 at O.E. Vars & Son's, Andover, and N E Coston's, Greenwood, drug stores.

Try them.

Celery King is woman's greatest friend because it cures every year more cases of female weakness than all other remedies combined. Price 25 cents.

MAKING MAN-O'-WAR'S-MEN.

Prior to the Spanish-American War the United States recruited practically all the seamen for their war vessels in the cities on the Atlantic and Pacific coasts, often, it may be noted, enrolling blue-jackets in the proportion of twenty foreigners to one American-born citizen. After the conflict with Spain, Uncle Sam's assumption of the role of a World Power and the consequent increase in the navy at first threatened a famine of man-o'-war's-men. The Navy Department turned its eyes inland, with the result that the recruiting officers soon were enrolling in the Middle West many bright boys who were not only anxious to serve on the big ironclads but superior in intellectual and physical caliber to the majority of recruits secured on the seaboard. Now these young men of the interior are to have an opportunity to learn sea customs and naval discipline at their very doors, as it were. The establishment of the projected naval training station on the Great Lakes will mark a new epoch in the crusade to gain an ideal personnel in the American Navy.

WALL STREET FORTUNES.

Many fortunes are made in Wall street every month. What the newspapers tell the public about these is true. But what we never see in the newspapers are accounts of the large fortunes lost in the same place in the same length of time. The fact cannot be too strongly impressed upon the minds of speculators that for every dollar gained in Wall street a dollar is lost and as the people who gain the dollars are always well known old timers in the business it follows clearly that the people who lose the dollars are the newcomers.

GRAFT AND CORRUPTION.

It is time for us of the United States to wake up. We cannot go on corrupting the youth by examples of graft unchecked, permitting the gambling habit to take possession alike of society and the slums, tolerating even with a claim the acquisition of great fortunes stolen by lifties from the very poor. We cannot permit all this without endangering the foundations of a republican form of government because a republic is possible, as Napoleon said, only to a people of high intelligence and character.

THE EFFECT OF ALTITUDE.

Most overworked, debilitated, anaemic individuals sleep better on coming to a higher altitude, while the full-blooded, high strung, nervous person sleeps better at sea-level. Convalescence after illness in general is apt to be more prompt at high altitudes because of the greater possibility of being in the open air and sunshine. People who rarely go from a low to a higher altitude are more easily fatigued.

WAR SHIP ARMAMENT.

The tendency toward the installation of heavier intermediate batteries in war vessels is illustrated by the changes made in the original sketch plans of the new British battle ships.

In order to satisfy a misdirected public opinion an official attempt will be made to reduce the displacement of the new ships. This, of course, can be easily arranged, providing Great Britain is willing to accept the inevitable reduction of fighting strength that must accompany it.

MILK ADULTERATION.

A milkman in Berlin, Germany, was recently convicted of watering his milk, fined $20 and it was ordered that his name with details of the case be printed on a placard two feet square and posted on the city advertisement boarding nearest his place of business. That milkman ought to come to the United States, as he seems to understand the business well enough to make a success.

WORLD'S BEST TIMEKEEPER.

The world's best timekeeper is said to be the electric clock in the basement of the Berlin observatory, which was installed by Prof. Foerster in 865. It is enclosed in an airtight glass cylinder and has frequently run for periods of two or three months with an average deviation of only 15-1,000 second.

HUMAN ODORS.

That the Caucasian odor may be odious to other races has never occurred to the lordly Anglo-Saxon but it is a fact and a Japanese physician has published a learned treatise on the western odor and its cause. This holds that each race has its peculiar odor, that it is partly racial but is in a measure influenced by dietary and other conditions.

RIGHTS OF ROAD USERS.

The opposition to automobiles on country roads will never cease, but will grow hoffer all the time, until laws are passed in every state requiring all drivers of such machines to keep their rate of speed within reasonable bounds, to fetch up at the side of the road and halt when they meet teams, stop their engines and do whatever is within their power to avoid accidents and to conserve the lives of those who drive horses.

$5,000,000 DIAMOND FOUND.

It will Probably be Split into Smaller Stones.

New York.—Maiden Lane went into excitement over the news that a monster diamond, weighing 3,032 carats, had been discovered in the Premier mine, in the Transvaal. The news was confirmed by a cable received by Mr. Jefferson M. Levy, of this city, who is one of the heavy owners in the company. The message assured Mr. Levy that the diamond is worth $5,000,000.

Mr. Levy was not particularly impressed by the size of the stone, save that it might be cut up into a given number of smaller stones, for to-day, he said, there is no demand for the huge gems which the rulers of the earth formerly coveted. It is doubtful if a stone as big as the Koohi-noor will ever again be cut in its entirety. The day of that sort of thing is past.

The shares of the company advanced about fifteen per cent. when the news of the find was authenticated. The shares sold at £81 ten days ago.

"Mr. George F. Kunz, the famous diamond expert of Tiffany's said: "This is by far the largest diamond ever discovered, that is, white diamond. Not long ago a black diamond was found in Brazil which weighed 3,800 carats, but the only use it could be put to was to cut it up into little squares for drill points.

"This diamond which has been found in the Premier mine weighs about twenty Troy ounces, or, roughly, a pound and a half avoirdupois, and would be about as big as a four-pound weight used by grocers."

GREAT BLIZZARD IN NEW YORK.

The Severest Snow Storm Since that of March, 1888.

New York.—Shut off from nearly all communication with the outside world, its harbor deserted save for storm-bound vessels, New York emerges from a week with the worst blizzard since the famous one of 1888. Only telegraph and telephone service has remained unimpaired.

For more than 24 hours a 65-mile gale drove the snow in immense piles on the sidewalks. All the railroads leading into the city were blocked. The surface lines of cars were completely tied up. A great scarcity of coal and provisions prevails. More than 15,000 men are employed clearing the streets of snow. The thermometer indicates the coldest weather of the winter.

John L. Sullivan,

the former champion pugilist of the world, as he appears on the lecture platform.

Tokio. — The casualties during the fighting at Chenchiehpaoand Heikoutai are estimated at 5,000 on the side of the Japanese and 10,000 on the Russian side.

DENTISTS IN THE BRONZE AGE.

Reiser, a Berlin scientist and dentist, who has been examining the remains of prehistoric men, has discovered that decayed teeth were not uncommon in the bronze age. Reiser also says he saw indications that in those early times there were dentists who filled cavities.

THE EARTH'S HEAT.

The latest theory is that radium is the cause of the earth's heat, which is not attributable to the theory of a molten mass which has been slowly cooling for a million years, but to the presence of radium.

Exclusive of commuters, the English railways carried during 1903 1,194,833,000 passengers, and collected in railroad fares $239,760,000. The income from the freight service was about equal to that from the passenger traffic. The gross earnings of 167 American roads during the same period were $1,733,784,055.

PAVING MATERIALS.

What are the best paving materials for streets and avenues in the modern city and town?

There are a few pavements which, when skill, factory in quality and properly constructed, are well adapted to their special uses. Granite, brick bitulithic, asphalt and wood are at present the favorites in America and Europe.

Each pavement has its particular utility, and each is good therein. The few pavements most used are those which are generally used at this time, and which seem to be the best. But a pavement is not good unless it has a strong foundation, is well laid and well maintained. A few property owners have exercised the city for selecting the pavements that have been built in the past few years. The experience of other cities shows, however, that St. Louis is in the advance in developing modern ideas as to good streets.

COMPOSITE TYPE OF ENGINES.

A first class toredo boat, just built in England by the Yarrow company, has been successfully using both ordinary and turbine engines for its motive power. The reciprocating type drives the central shaft at slow speeds and the turbines actuate the side shaftings when high pressures are required. This composite system worked with great harmony during the trials and a speed of twenty-five knots was attained under three-quarter pressure.

THE FARMER THEN AND NOW.

An Iowa farmer who was bred in New England, after making a visit to the old farm, remarks that he observes an absence of the oldtime thrift and application that once existed among the farmers of New England. He admits that the New England farmer can make more dollars from an acre of corn than they can in the west, but that the western farmer makes it up by having more acres under cultivation.

A RACE OF DEGENERATES.

Is it any wonder we are breeding a race of dozen rates? Gaseous poisons are evolved by all sorts of modern lamps and heating contrivances, by chemical factories, sewer traps, fat-rendering establishments, dye works, slum tenements, stockyards, stables and cess pools. We eat, drink and breathe poisons, our cities are shrouded in an atmosphere of poison fumes.

WOMAN IN LABRADOR.

Labrador is hard on women. When the husband is drowned, mothers are often left with a dozen or more children on their hands and hard is their lot indeed in a country, where, until ten years ago there was no medical assistance of any kind to be had. Their future looks to them like a great blank wall of ice and though their lives are necessarily sordid and hopeless, they are greatly attached to their bleak northern homes.

HAPPINESS AND MONEY.

All this talk about the happiness of being poor is largely rot. Of course there are people who are miserable under any and all circumstances and there are others who are cheerful and apparently content if they have not a cent, but money adds greatly to the sum of human happiness and poverty while not necessarily a disgrace is mighty uncomfortable and often productive of disease and premature death.

THE BIGGEST TREE.

If the measurements taken of the sequoia in Oshow Valley, California, are true, it is doubtless the largest vegetable in all the world. Its thickness is said to be 36 feet and its height 400.

"Incurable" Heart Disease Soon Cured!

By the Great Specialist in Treating Chronic Disease, Franklin Miles, M. D., L. L. D.

Will Send $2.50 Worth of His Personal Treatment free as a trial

To the sufferer he offers a curative agent of rare merit, new and superior treatment by which heart disease, kidneys, stomach, liver or kidneys, shall be cured, pain in the side, palpitation, smothering spells, pulling of the muscles or drops. Dr Miles will send $2.50 worth free to all who will send name and stating where they saw this advertisement.

His treatments are the result of twenty five years of careful study, expensive research, and remarkable success. So astonishing are the results of his complete system, treatment that he does not hesitate to offer all persons a trial free.

Few physicians have such confidence in their remedies. There is no reason why all afflicted persons should not avail themselves of this exceedingly liberal offer, as they may never have such another opportunity.

The Doctor has discovered a scientific method of treating the heart, kidneys, stomach and nerve centers by means of a curious electric blood tablets, eliminating pills and a compound strengthening plaster. The different ingredients are carefully adapted to each case.

A thousand references to, and testimonials from Bishops, Clergymen, Bankers, Farmers and their wives will be sent upon request.

Send a careful description of your case at once for Book and Treatment Free. Address, Franklin Miles, M. D., LL. B., Dept. H. Grand Dispensary, 200 to 206 Main st., Elkhart, Ind.
