Reds Converted Yalta Into Soviet Rest-Home

Yalta, secret rendezvous of the "Big Three," is accustomed to entertaining political leaders. The Black sea port on the southeastern shore of the Crimea was the site of the winter home of the Tsar and of high government officials before the Russian revolution, says the National Geographic society. Outstanding among the palatial winter homes and villas in and near Yalta is the Livadia, hundred-room winter residence built by Tsar Nicholas more than 50 years ago, at a cost of nearly a million dollars.

Shortly after the close of the revolution, Soviet leaders cast covetous eyes on Yalta. The Livadia and its spacious neighboring residences, set amid gardens of exotic flowers and luxurious trees, and overlooking the Black sea, they observed, would fit into the plan of the new government. So the gay winter resort of the Russian nobles became a vacation spot for ailing and tired Soviet workers.

The Livadia, once the scene of the pomp and splendor of the imperial Russian court, succumbed to the less lavish life of the proletariat. Only a few rooms were reserved to display their former furnishings. Other mansions went the way of the Livadia, or became hospitals and convalescent centers, except one which remained as a sort of museum of the luxury of the Tsarist regimes.

That tax on expenses at dance spots isn't costing us a penny.
