It's easier to prepare meals, isn't it, since you began to have fewer dishes, but plenty of the few things served?

Why is it that some songs are popular for a few weeks and then are heard no more and others live on? If this question interests you why not send to the State College of Agriculture at Ithaca and ask for a coup of "Songs That Live?" Ask for R. C. F. H. 77.

If you have a friend, who is a tailor, perhaps he will let you have some of his old woolen samples which you can stitch together and make a warm quilt. If the samples are of heavy material, only a backing will be necessary; cotton batting filling will not be needed.

AMATEURS

They have checked up on the war gardens. The crop estimate is placed at $525,000,000.00 according to the figures of the War Garden Commission.

National advertisers have a large totals in graphic form. "One year's output of Bunk's chewing gum stretched at full tension would reach to the moon." "The Stingo Soap Works ship enough carloads each day to shave the Bolsheviki." We would like to figure how many carrots and spinach can feed a given number, but it is more practical to guess how many gardeners contributed to the magnificent total.

Be good sports, you folks of Andover. Give the big cities some of the credit. Those flat-dwellers who did their share had more to learn than we had, and many must have felt that their contribution wouldn't make an appreciable difference. But you don't need an ophthalmologist to help you to read eleven figures in a row—an aggregation of assembled infinitesimals.

The amount would have been much larger if the amateurs had known that a garden needs preparation in the fall as much as in the spring. Ignorance of this has meant failure for many of the novices, and now is the time to do the tilling and fertilizing that will atone for the omissions of last year.

THE CHEERFUL CHERUB

They're selling bonds to win the war;
I've bought as many as I could
And now my pocket-book is light
But oh, my conscience feels so good.

Don't Waste Fuel

Don't waste fuel. It takes coal to make it.

Don't forget that one fire uses it will raise the temperature of a room 5 degrees.

Don't fail to put up storm doors and windows.

Don't fail to sift your ashes.

Don't burn coal when wood is available.

Don't fail to wrap your pipes with asbestos.

Don't fail to keep rooms moist; they heat easier.

Don't forget that moist air retains heat.

Don't forget that moist air retains heat.

Don't forget that dry air causes colds and catarrh.

Don't light up the house until well after sundown.

Don't waste gas — it is made from coal; and remember "The hand that shakes the grate saves the coal."

"The New York State Fuel Administration is not desirous of issuing an "order" to the people. It conceives its office to be that of a servant of the people. It is fully conscious of the power it derives from the Federal Government. It is loath to exercise that power and the avoidance of stringent measures can only be achieved thru the active interest of every one."

JOHN C. DARCY,
Allegany County
Fuel Administrator.

All roads lead to Rockwell Bros. & Co's. big department store Wellsville. Their Ladies' Ready-to-wear section is a veritable mecca for hundreds of the gentler sex who are seeking and finding suit and coat satisfaction.

A FARMER'S VIEW OF IT.

A farmer of Missouri who invested a carload of hogs in the third issue of Liberty Bonds said to a friend: "I took on the buying of these bonds just like helping out my own family. I made this investment just as I would if my own brother was in financial straits and needed an advance, and I'm going to come through again when the Fourth Liberty Loan opens. We're all one big family here, and what hurts one hurts all, and what helps one helps all."
