(Continued on Editorial Page)

A box of oranges

Andrew Carnegie, one of the world's richest men, was the son of a poor Scotch weaver. He early learned the advantages of economy. At the age of ten he saved a few shillings—enough to buy a box of oranges — which he promptly peddled at a profit of 100 per cent.

At twelve he was brought to America and put to work in a mill. His earnings were 20 cents a day.

While still a young man he managed through thrift to accumulate $500, which he invested. His first dividend served as the inspiration for his remarkable achievements and financial power in later years.

But the seed of his prosperity was first sown when he invested the few shillings he had saved—in a box of oranges.

There are boxes of oranges all about us today--only they go under a different name. Wise men see them--invest, and reap the profits in success.

There are men--and women too--who sense the possibilities of small beginnings, even as Carnegie.

Get your box of oranges TODAY

OUR NATIONAL CAPITAL

Events of Interest From the Seat of Government by the News Special Correspondent, J. E. Jones.

A PHANTOM FROM OUT OF THE PAST

Washington, D. C., Mar. 1.—Eight years ago Gifford Pinchot was an evanescent politician on the political horizon of Washington, and when Secretary Ballinger brought forward the question of "conservation," Mr. Pinchot grew into fame and fervor by answering: "Boo!" Since that fateful day some of the most important of the natural National resources have been — in the language of Senator Jones of Washington, "mainly a sleeping and profitless assert, due solely and entirely to the inaction and inertia of Congress in turning a deaf ear to the voice and cry of the West, praying for the passage of laws under which its people can develop the energy contained in our falling waters."

Mr. Pinchot had a good deal to say about the loot of Alaska in those days. He demanded that developments by private interests within the Territory should be stopped. It is a long story to reach out of the past, but it may be observed that Mr. Pinchot had his way, with the result that there are fewer people in Alaska to-day than there were eight, ten or a dozen years ago. Senator Shaforth says that the situation in the Alaska coal fields, where it was supposed that capitalists would eagerly lease coal lands, has proven a failure since the law provided that all one's rights might be forfeited under many provisions of the lease; therefore, capital "will not lend money on such security."

"Conservation" evidently has been misunderstood all too long in the United States. In a recent issue of the Congressional Record an irate Westerner protests to his Senator after reading the news of the day which said that the water-power bill had reached a deadlock in Congress: He writes: "For years we have been reading just such rotten stuff. The House says we want it one way; the Senate says it won't do. Now, any blamed fool knows that some kind of contract could be made satisfactory to both sides, and it would not take ten or fifteen years to do it, either; but a few hundred of what is supposed to be the smartest and best-posted men of our country can't reach an agreement." The Senator who got this letter read it with the comment: "I am going to read it to the Senate, that we may 'see ourselves as others see us.'"

President Wilson has been insistent in demanding that Congress act upon water-power matters. All thru recent months leading members in both Houses have been busy with the legislation, and measures passed both branches.

Water-Power Maps

Maps are shown in the Senate that gave some very interesting facts. One of these gave the location of 54,000,000 water horse power contained in the United States and of which 5,000,000 horse power, or but ten per cent. had been developed. Seventy-two per cent. of all the water-power of the country is contained in the eleven far Western States of Washington, Oregon, California, Idaho, Montana, Nevada, Utah, Arizona, New Mexico, Wyoming and Colorado. The water-powers of these States are regarded as their greatest asset, and altho nature has furnished this great wealth to these new countries it has never been utilized to only a small extent. The politicians have for years been justifying their course of inaction on the ground that great private property interests were seeking to acquire the use of these natural resources. Therefore the rippling waters continued to murmur their sweet lullabys without ever having performed a day's honest work under the harness of industry.

"Conservation" Versus Water

Misnamed "conservation" of the water-power of the country has been defended on the ground that unusual profits might be realized from the operation of water-power plants. The United States Chamber of Commerce, in presenting its referendum concerning water-power development to the organizations thruout the Nation, submitted the report of a special committee on water-power development, made up of the best authorities of the country, and in this report showed that "the initial cost of a steam plant is in general but one-half to one-fifth that of a water-power plant of equal capacity," and that "because a steam plant can be more easily enlarged from time to time, the initial development of a water-power plant must, in general, be a much larger proportion of the ultimate contemplated development than in the case of steam plant."

Another most interesting feature of the report says that the present demand for the development of water-power comes, not from capitalists, but from communities which, on account of the high price and capacity of fuel, are desirous in their own interest, of inducing capital to make such development.

"Conservation" a Queer Bird

Americans have frequently been accused of being wasters. It has become apparent that the committee report of the National Chamber of Commerce, to which reference has already been made, speaks broad truths. In comparing water-power with other natural resources, the report says: "Conservation of other natural resources means restriction in its own use, for use means consumption, and permanent destruction. Every pound of coal burned is forever withdrawn from use. On the other hand, every horse-power of water-power, not used is lost, and horse-power conserved and used saves not only the horse-power but its equivalent in coal and may incidentally improve navigation."

Engineers of high standing have told Congress that the passage of a proper water-power development law would result in pioneer industrial activities in twenty-five states. Senator Jones made the statement that these hydroelectric developments in the West would have "an ultimate aggregate capacity of about 2,000,000 horse-power, requiring an investment of $250,000,000." He further stated that the industrial plants erected to use this vast amount of power would give permanent employment to 500,000 operatives.

Capitals and Titles Enter In

Under the law regulating water-power rights, authority has vested in the Secretary of the Interior to "recapture" private water-powers at any time he deemed the Government's interests demanded such action. The result was that private capital would not invest in water-powers.

Because of the Government inaction nothing was accomplished. Senator Shafroth says "that when you go to build one of these water-power sites you find enormous capital is required, sometimes as high as twenty- or thirty or forty million dollars." He goes on further to say that the promoter of water-power developments is always asked: "What title have you?" When the concession is made that the enterprise hangs upon a lease, and that lease may be forfeited, the whole matter comes to an abrupt end. Legislation in Washington during recent months has been moving along in the direction of providing for a commission with full powers over water-power development.

Prospects are good that the water-powers of the country are going to be developed. It seems probable, as a result, that great manufacturing districts will eventually be found in the West where these natural advantages principally exist.

Sign Boards on the Up-road

By Hamilton B. Williams

All spirit, all weighed . . .
Thine eyes are gates, beloved, fashioned of every gleam and color, shadows of dawn and golden glory of twilight, mid-night's mystery of starways across the gulfs of darkness and behind the portals Dream pipes adventure in every Garden of the universe.

All's Spirit, all weighed . . .
Thy mouth, beloved, is a flower, a flaming garnet, drenched in fragrance of a wild rose sea.

All's Spirit, all weighed . . .
Thy voice, beloved, is the sapphire changed to music, the violet that seems alway about to sing. It is the sound in the south-wind that we do not hear.

All's Spirit, all weighed . . .
Thy breast, beloved, is the tempest lifting the sea; it is the midday sky of September; it is the mountain robed in dazzling snow . . . magical its stirring and its rest . . . terrible its sanctity.

All's Spirit, all weighed . . .
Thou holiest, beloved, Myself, in the high mountain of thine unattainability. If I become Myself, I shall kneel to touch the place thy sandals touched along the highway of the stars.

All's Spirit, all weighed.

The possession of anything true, or that which we believe to be true makes sharing imperative. Whatever we ratify by personal interest is good for the other man state—nation—world! Whatever we ratify should therefore be capable of universe-extension.

In ratifying the religious idea of Jesus we show our belief in an idea that every one should have in his mental equipment.

If we set forth the idea of Christianity as the power of God unto—civilization, we are necessarily made couriers of the idea.

It must be the stamp upon all products—words, deeds, plans, politics, industrial bonds, and the Christ-idea should be discoverable in religion.

Civilization is not material advance, invention, literature, wealth, government, education, culture—but a spiritual ideal and program.

There is the sign of civilization: the idea of a fatherly deity, very friendly, very human, who is also the General of a universe-magnitude Purpose; the idea that human beings are essentially immortal; the idea that neighborliness is a normal relation; the idea that Life is to made supreme as the quest of this and all other countless places of existence. Life's a Long Trail lifting up along the starways.

Hate is blasphemy.

Selfishness is the killer of joy, the strangler of souls, the digger of darkness—pits, the destroyer of the Garden of Life.

All selfishness is evil because is not good, true and beautiful.

No true, good and beautiful but is born of the Spirit of God. Lieut. Dawson has written (March McClures), the articles of the religion with which the soldiers are coming back. His ideas so clearly interpret the true idea of Jesus that it were well our minds become saturated with them.

Millions have had a birth from above, a spiritual vision. That is, they know life means service.

Listen:

"We're coming home . . . we learned at the front to live 24 hours at a time and to be grateful. Now we feel like beggars suddenly made millionaires. Our 24 hours have been changed into 40 years."

We learned . . . that it is the Spiritual that counts. We used to think it was money, society, position, good looks, charm, power, success, — anything, everything but the SPIRIT.

We saw failures by the old standard, slum-men, jail-birds, shy dreamers, failures of every sort go by way of the Christ-test to the stars.

We learned that God is normal . . . in the world . . everywhere. We learned we were fellows of the Nazarene because we fought like men . . .

We're coming back with a new religion . . . deeds.

We shall go to the end of life — sharing.

We survive because some shared lavishly — and died.

The life given to us — is ours to share.

Beyond all we have learned the glory of sacrifice. Once, we could not understand the broken Christ who climbed Calvary . . . Now!

We are coming back ravenous for laughter; we want to make the world merry, but we shant forget that happiness comes from the inside, evades those who seek it in the outside.

Thus this four-year veteran preaches the idea of the Christ. This evangel will sweep the human heart clear of narrowness, prejudice, false life-values, false quests of happiness, clannishness, exclusiveness, arrogant preemption of the Eternal-Big God, hate selfishness which same is darkness.

God is Love: Jesus is the Friendly Courier, Life is Truth, Goodness, Beauty; service and sacrifice are the soul in gallant action; joy is the sign that the great God has gathered from his Heart's Garden beautiful flowers and planted them in ours. Love is the Starway Trail.

A LIFETIME OF SUFFERING

Prevented By "Fruit-a-tives"
The Wonderful Fruit Medicine

(of Mannsville, N. Y., Rural)

"In my opinion, no other medicine is so good as 'Fruit-a-tives' for Indigestion and Constipation.

For years, I suffered with these dreaded diseases, trying all kinds of treatments until I was told I was incurable.

One day a friend told me to try 'Fruit-a-tives' (or *Fruit Liver Tablets*). To my surprise, I found this medicine gave immediate relief, and in a short time I was all right again". DONAT LALONDE

50c. a box, 6 for $2.50, trial size 25c. At dealers or from FRUIT-A-TIVES Limited, OGDENSBURG, N. Y.

SWEEPSTAKES PEDIGREE SEED CORN

Sweepstakes is the best ensilage corn on the market. It did especially well in Allegany County in 1918. It produces more and better ensilage than other kinds. Ask seed dealers to show Sweepstakes certificate. If he has no certificate, he has no Sweepstakes. Write for further information to International Consolidated Record Assn., Inc., Elmira, N. Y. —Advertisement, 6 and 10.

What used to be called—sometimes derivisely —"bargain-hunting" has evolved into the practice of intelligent buying. The advertisements make it possible.

HIGGINS BROTHERS
WELLSVILLE, N. Y.

Take Pleasure in Announcing the Opening of Their

Bargain Annex
Saturday Morning, March Eighth

The former John Brown Shoe Store, recently bought by us, will open Saturday morning as a BARGAIN STORE to be known as our BARGAIN ANNEX. Here the Buying Public will be enabled at all times to find exceptional values, marked regardless of cost. It will be the CLEARING HOUSE for our MAIN STORE of all unseasonable goods, slightly soiled or shop-worn merchandise, as well as absolutely new merchandise which our Buyer will comb the markets for frequently at Bargain Buys, for Cash.

A CONSTANT RUMMAGE SALE

All sales strictly cash in the BARGAIN ANNEX. No Phone or Mail Orders will be filled.
