"ON TIPTOE"

(Continued from Page 3.)

Burton. "It almost hurts. But I shall never forget it."

They began to chat, to make disjointed remarks, swinging back and forth from the wide arc of ecstasy to the starting point of everyday things. In a little while Davenport was talking eagerly, openly. The subject was his battery.

"It ought to be tremendously valuable. You'll probably make a million or so out of it. I hope you do," the girl said.

"Yes, of course. I'd like to make something out of it. But that isn't the real point. Do you mind if I talk a little about it?"

"Oh, please!" she begged.

"Don't you see what it will mean to the world," he said, "the poor struggling old world? What a burden it does carry. Lord, what a task it has assumed just in feeding itself and clothing itself and keeping itself warm. And it has to hustle just to do that."

He twisted on the log more nearly to face her. "Look here, he demanded, "what is the greatest material need, the very greatest need of the world?"

"Davenport's batteries," she replied promptly.

He threw his head back and laughed boyishly.

"I was getting rather preachy, wasn't I? Well, the thing the world needs most is breathing-time, time to play more and to soak up the things that never come to a man when he's in a hurry or surrounded by the buzz-flies of detail. What the work-a-day world needs most is leisure, a little leisure."

"The trouble is," said Burton, "people are never satisfied. If they'd be contented to go without so many frills they'd have leisure enough."

"No, you're wrong. They should have frills. The frills represent the grace and beauty of life. We all have an instinct for frills; and real instincts should be gratified—in proportion. But the point is, frills are too hard to get. A living is too hard to get. Heaven forbid we should ever get anything without working for it; that is absolutely fatal. But there's no sense in having to preform soul-deadening and grinding toil for it."

"But what has the battery to do with this?"

"Why don't you see? Every invention that reduces the labor necessary to produce things is a step toward that leisure for the race. It's a step toward supplying more frills, with the same amount of labor."

With vivid sentences he sketched the world as he saw it: a reorganized world, free to put its energies into the positive creation of those things which men's true instincts crave; producing its abundance by honest, sincere, necessary labor, but accomplishing the production without the exhaustion of squalor.

It was no impossible Utopia; it was no absurd dream of an impossible "equality"; but it was a world of opportunity released from pressure. What men did with the opportunity would still be, as it had always been a matter for themselves.

But no longer would there be any reason or necessity for the submergence under inexorable circumstance of the man whose hands reached toward the stars.

That is what he visioned; and that is what Burton, kindling to his ideas, saw too. And as she had not lived with the idea, as he had he, and was unaccustomed to it, she was the more eagerly afire.

They sat silent for a time.

"Tell me about yourself?" she said suddenly.

"I was born of poor but honest parents and my friends call me Larry," he began.

"You're not the Lawrence Davenport?" she gasped.

"I'm the only one I know about. There may be others I know not of, but be quiet. O Lady, they are nothing but sparkling fountains."

"Why, I've read all your books and I've just loved them."

"Long and patient study has not yet revealed to me the suitable answer to one who claims she loves your books," sadly confessed Davenport.

Burton began to chuckle, then to laugh aloud.

"I'm thinking of the joke on us," she explained, "of Dad. We thought you were a garage mechanic!"

"And me with such gentlemanly manners," he mourned, "and my diction, faulty as it is, yet observes the rules of grammar."

"Your funny little car misled us, I suppose," she explained, "and then you were so handy about everything."

"You relieve me. The car was the cheapest I could get for a pure experiment."

"And the battery?"

"Came to me just like a story, a little at a time. I'm no mechanic. There could be worse fitted than I to be an inventor. But I couldn't help noticing from time to time the incredible going to waste, and the battery day when I was filling the starter jar of my car—I have got it in mind, I wondered if we could't get a battery that would work with air."

"And then you figured it out."

"I did not," he disclaimed. "I merely kept it in mind, the way I do a story, and it worked out its own plot, bit by bit. It took me some time to tumble to the fact that the plates had to be put exactly so far apart. But at last I got it to work and to work hard for a long time. One horrible thought occurred to me: that maybe it will only work near electric plants already in operation under the old methods."

"Stealing what's already been made! I see!"

"That's why I'm up in this wild country, bag and baggage. I'm going to find out. It seems to be alright, though."

"You don't know how I appreciate your telling me all this, Mr. Davenport," then said she.

"I told you my friends call me Larry," he pointed out; then at her slight withdrawal, "Now, really, look at me. Am I a Larry looking person or a Davenport looking person?" He cocked his eye comically in her direction.

"You're right—Larry," said she. (To be continued Next Week)

WOMAN EATS ONLY BABY FOOD 3 YEARS

"For three years I ate only baby food, everything else turned me sick. Now, thanks to Adlerika, I eat everything and enjoy life."—Mrs. M. Gunn.

Even the FIRST spoonful of Adlerika relieves gas on the stomach and removes astonishing amounts of old waste matter from the system. Makes you enjoy your meals and sleep better. No matter what you have tried for your stomach and bowels, Adlerika will surprise you. BRUNDAGE DRUG CO.

Curdled soft custard may be made smooth by placing the upper part of a double boiler holding the custard in a pan of cold water and then beating the custard at once with a dover egg beater.
