ROCKEFELLER FOUNDATION

Gave $5,000,000 to the Red Cross, and Other Millions to the Y. M. C. A., Knights of Columbus, Jewish Camp Welfare and Similar Organizations.

Total Disbursements for War Work, $5,944,969—World Wide Work of Public Health, Medical Education and Research Kept Up "for the Well-being of Mankind."

The review, soon to be published, of the work of the Rockefeller Foundation for 1917, written by the president, George E. Vincent, formerly president of the University of Minnesota, gives a general survey of the whole program and policy of the Foundation and devotes especial attention to its war work. President Vincent says in part:

"The trustees of the Rockefeller Foundation are deeply sensible of the immeasurable needs occasioned by the European war. The unit of adequate expenditure to meet even in a limited measure the enormous devastation is millions of dollars, where it was once thousands and hundreds.

Sphere of Science and Letters.

The co-operation of official commissions and boards, the Foundation was able to provide both within and without the army, gymnasia, concerts, recreation, social entertainments, educational opportunity, merry-andrews and identity influences for the American forces offers a striking example of genuine team-work. To nearly all of the units that make up this vast co-operation the Rockefeller Foundation has granted sums which aggregate four and a half millions, or seven and one-half per cent. of the total budget for the entire undertaking.

The following table enumerates the different organizations, together with the war budget of each and the amount appropriated to it by the Foundation:

Organization.	Budget.	Total Contributed by R. F.
Y. M. C. A.	$60,000,000	$3,500,000
Y. W. C. A.	5,000,000	650,000
Jewish Camp Welfare	1,000,000*	100,000
Knights of Columbus	2,000,000†	100,000
Camp Community Fund (Recreation Association)	4,000,000	220,000
Training Camps Commission	150,000‡	75,000
Special work with Commission of American Social Hygiene Association, etc.	153,000**	125,000
Total	$62,303,000	$4,770,000

*Part of a much larger general war fund raised by the Jewish Committee. The Foundation's gift was specifically to the camp work feature of that fund.

†This figure includes only subscriptions in 1917. The Knights of Columbus war work budget to the end of 1918 totals $7,500,000. To this enlarged budget the Foundation has, in 1918, made an additional contribution.

‡Not including $750,000 appropriation from Congress.

**This does not include services of men in many cases, contributed to this work by societies with which they are connected.

Improved Methods in War Surgery.

Another war service has been rendered with the aid of the Foundation funds through the Rockefeller Institute for Medical Research. During the summer of 1917 a portable military base hospital with a capacity of 90 beds was erected on the grounds of the institute in New York city. This hospital is completely equipped with operating room, laboratories, kitchen and laundry. It is built in sections and can be taken down and moved on motor trucks to any site. It embodies the features which French and British experience have proved to be essential in a base hospital. In this group of buildings the Carrel-Dakin method of sterilizing wounds by periodic irrigation with a germ destroying fluid is being demonstrated.

To the War Hospital at the Rockefeller Institute surgeons of the army and navy are being officially sent for special training in the Carrel-Dakin method of sterilizing wounds by periodic irrigation with a germ destroying fluid that does not injure the tissue.

Serums for Prevention of War Diseases

The preparation of serums by the institute and the distribution of them to the government hospitals have constituted another Foundation supported contribution to the war. During 1917 nearly 3,000 doses of serums were distributed. By far the largest amount was for combating meningitis. Arrangements have been made for greatly increasing the output of these serums, which are prepared with the utmost care, and are eagerly sought by the medical authorities of America and her allies.

Mental-Nervous Diseases in War.

The present war has shown strikingly that mental and nervous diseases play a prominent part in military medicine. The term "shell shock" has been applied upon to describe a wide variety of cases from what appears to slight to severe. The Rockefeller Institute and to treat successfully these serious disorders has become a pressing need.

In helping the surgeon general to recruit the medical officers for the army, the institute has made a special study of methods of selection, and has

Work in Public Health.

Meanwhile the Foundation has been developing its regular program of work for health, hoping to make a net in making the world a fit place to live in after the war.

Only a study of the report of the general director of the International Health Board can make one fully realize the detail and value of the work which is being carried on by its staff of 650 persons widely scattered over the world.

This work from the beginning has been carried out in co-operation with the state and local departments of health, and while at first undertaken largely by the Foundation, it is now being gradually assumed by the states and counties themselves.

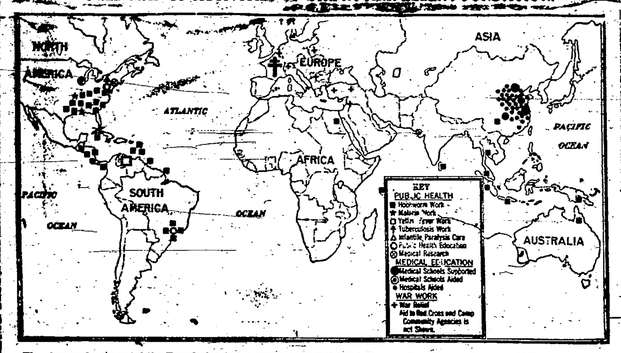
Anti-Tuberculosis in France.

Interesting items of the public health work of the year include the anti-tuberculosis campaign being carried out in France. The Foundation's commission is headed by Dr. Livingston Farrand, formerly executive secretary of the National Association for the Study and Prevention of Tuberculosis, now president of the University of Colorado.

Infantile Paralysis Care in New York.

To the after-care of the New York children who in the epidemic of 1916 were victims of infantile paralysis, the Foundation has made contributions through a special committee for New York city and through the State Charities Aid Society.

WORLD MAP OF ACTIVITIES OF THE ROCKEFELLER FOUNDATION.



The chartered purpose of the Foundation is "to promote the wellbeing of mankind throughout the world." Work carried on by funds, totaling several billion dollars, given to the American Red Cross and to agencies for American and Allied Camp Welfare, is not indicated on this map. In the Fiji Islands, not shown on the map, Hookworm work is also going on.

"The resources of the Foundation, measured by such needs, are relatively limited.

"Widely disbursed in aid of a large number of existing agencies the income would have little appreciable effect. Only by concentrating its funds upon a few convincing demonstrations and statesmanlike programs can the Foundation justify its existence, and constructively attain its chartered purpose, 'to promote the well-being of mankind throughout the world.'"

War Work.

The well-being of mankind so obviously depends upon the winning of the war by the forces of freedom, that the Foundation is devoting by far the largest part of its available resources to the support of war work.

At the same time, activities which are promoting public health, and thus contributing to human progress, are maintained in many parts of the world. The special projects described in this review are all parts of a program which aims at helping to win the war, and at making a better world after the war.

The Foundation's war work has had to do with the three main fields of

1. Humanitarian aid.
2. The welfare of American and Allied soldiers and sailors.
3. Improved war surgery and medical care.

In order to carry on this war work the Foundation is expending not only its income; it also appropriated last year five million dollars of its principal fund and voted to expend a new gift of five and a half millions received from the founder at the close of the year.

Five Millions to the Red Cross.

With the entrance of the United States into the war the Foundation decided to withdraw its War Relief Commission from Europe and to put $5,000,000 at the disposal of the American Red Cross, which, reorganized under a War Council, entered upon a comprehensive program of military and civilian relief in America and the war-stricken countries of Europe.

Negotiations were also opened with the organization with a view to its assuming responsibility for the care of the five hundred Belgian children whom the Foundation had been maintaining in Switzerland since 1915. The cost of this care will in any event continue to be paid by the Rockefeller Foundation.

The only work which the Foundation is actively administering in Europe is in the Belgian relief work, which

Foundation's gift was specifically to the camp work feature of that fund.

†This figure includes only subscriptions in 1917. The Knights of Columbus war work budget to the end of 1918 totals $7,500,000. To this enlarged budget the Foundation has, in 1918, made an additional contribution.

‡Not including $750,000 appropriation from Congress.

**This does not include services of men in many cases, contributed to this work by societies with which they are connected.

Serums for Prevention of War Diseases

The preparation of serums by the institute and the distribution of them to the government hospitals have constituted another Foundation supported contribution to the war. During 1917 nearly 3,000 doses of serums were distributed. By far the largest amount was for combating meningitis. Arrangements have been made for greatly increasing the output of these serums, which are prepared with the utmost care, and are eagerly sought by the medical authorities of America and her allies.

Mental-Nervous Diseases in War.

The present war has shown strikingly that mental and nervous diseases play a prominent part in military medicine. The term "shell shock" has been applied upon to describe a wide variety of cases from what appears to slight to severe. The Rockefeller Institute and to treat successfully these serious disorders has become a pressing need.

In helping the surgeon general to recruit the medical officers for the army, the institute has made a special study of methods of selection, and has

Hookworm Control in Many Lands.

Efforts for the control of hookworm disease were extended during the year 1917 to three of the states of Brazil, to Siam, the Fiji Islands, Seychelles Islands and to four additional states of the Union—Alabama, Arkansas, Georgia and Maryland. In one country, Antigua, the work which had been undertaken was completed. The board was at work during the year in 37 areas, which included 25 foreign countries and 12 American states.

Malaria and Yellow Fever.

The Foundation's International Health Board recently began demonstrations in the control of malaria and of yellow fever. It seems possible that in the fight against this latter disease yellow fever may be completely eradicated from the earth.

Medical Education and Research.

The Foundation has supported medical research and medical education, particularly the development of centers of training for hygiene and public health, as, for example, the School of Hygiene and Public Health at Johns Hopkins University, which the Foundation is maintaining, and the department of hygiene and public health at São Paulo University in Brazil, to which the Foundation is contributing.

In some countries the whole state of medical science and medical education is such that the development of strong medical centers and the fostering of medical instruction and improved standards seem to offer a most direct approach to the ends desired. This consideration has led the Foundation to undertake, through its China Medical Board, the establishment and maintenance in China, at Peking and Shanghai, of medical centers of the first rank and to support quite generally medical schools and hospitals already existing in that country.

An International Force.

On result of the work for bettering the conditions of human life in all countries of the world may prove to be some advance in a common understanding and a common sympathy between all these peoples. When at last peace comes it cannot quickly bring universal confidence and good will. There may be years of suspicion and bitterness, of misunderstanding and recrimination. Years is sure to be keen industrial and commercial competition. It is too much to hope that such work as the Foundation is doing in many parts of the world may build at home a foundation for common interests of mankind, in lasting friction from the misunderstanding and clashing had the beginning of peace.

Class expects to raise $100 for its war service fund.

Belgian Boy's Dog Wants Son taken over by the government.

Manchester business men will work on the state road each Saturday.

Ontario County, under the state distribution, gets $44,314 for highways.

There is talk at Hornell of extending the Erie division to Mansfield, Pa.

At Silver Springs 313 women enrolled as Republicans and 49 as Democrats.

Owners of vacant lots in Canandaigua must clear them of weeds or pay a fine of $10.

It is believed 7,000 women have been enrolled as voters in Erie county.

In Rochester a United States ordnance optical school will be established.

E. J. Putnam of Tuscarora has been named as deputy sheriff of Steuben county.

Allegany county firemen will hold their convention in Angelica on July 3 and 4.

Jay Aills, well-known orchardist, says the Orleans county fruit crop will be good.

About 450 delegates will attend the Western New York firemen's convention at La Salle.

James G. Cutler has resigned as chairman of the Monroe county home defense committee.

The American Bridge Works company of Elmira is to turn out fabricated steel for ships.

Frank J. Kunz of Rochester was elected treasurer of the state Moose at the Olean convention.

Miss Ruth Purdy of Ovid will represent Seneca county at the spelling contest at the state fair.

Geneva Cutlery company, just incorporated, has $2,000,000 cumulative and $600,000 common stock.

On Aug. 22 in Canandaigua will be held reunions of the 126th and 148th regiments, New York volunteers.

Governor Whitman will speak at the Tri-county fair at Caledonia on Aug. 15. The fair will begin the 13th.

No classes in German will be started at the Chatauqua public school this year. French will be substituted.

Herkimer county's Republican committee has indorsed Governor Whitman's candidacy for renomination.

A ton of trout were taken from Keuka and Seneca lakes and sold to Penn Yan residents at 25 cents a pound.

To assist farmers in the vicinity of Fredonia a committee of 20 is being organized among the business men.

Mrs. W. L. S. Olmstead of Geneseo has organized a Livingston county unit of council of national defense.

Houseil's canning factory at Lyndonville has put up 1,000 cases of pork and beans for the United States army.

Niagara Falls sharbers are at odds over the proposed boost to 50 cents for a haircut and 20 cents for a shave.

The annual convention of the New York State Press association will be held in Rochester on June 26, 27 and 28.

P. E. Crowley, recently appointed vice president of the New York Central railroad, is a native of Cattaraugus village.

Geneva's rest room report for the past month shows a total attendance of 1,287; business women for lunch, 216; girls, 63.

How to get the forthcoming grape crop shipped, with no lake steamers, now troubles growers along the Lake Keuka region.

Women have requested Contractor Samper to put them to work on the state road job between Canandaigua and Manchester.

There are about 3,000 drafted men drilling at Fort Niagara for the United States guard. They are men unfit for overseas service.

Early crops in Ontario and Yates counties were damaged by a killing frost last week. The thermometer registered 34 degrees.

Employes of the American Can company of Geneva are to receive an increase of 10 per cent in wages, commencing this week.

Over 1,000 grammar school graduates from various points of the state will be given war work training in Buffalo beginning July 1.

Dr. W. E. Decal of Watertown, the newly appointed superintendent of the Niagara county tuberculosis sanitarium, will get $3,000 a year.

Stapleton Brothers of Akron have shipped bean cleaning machines to Japan and Java, which will be used by the natives to scour coffee.

C. G. Davidson of Geneva is erecting a $30,000 elevator, to have a storage capacity for 25,000 bushels of grain.

Distribution of $2,041,516.27 as the state's annual contribution for the maintenance and repair of town highways was made last week. Appropriations for Western New York counties are as follows: Allegany, $43,836; Cattaraugus, $49,846.39; Chautauqua, $64,445.49; Erie, $80,502.48; Genesee, $34,762.78; Livingston, $31,576.36; Monroe, $66,949.80; Niagara, $36,264.96; Orleans, $19,824.57; Wyoming, $36,375.

Why Swift & Company Has Grown

The fact that a business organization has grown steadily for forty years proves that it has kept continually meeting a vital business demand.

It must have kept "fit" or it could not have stood the strain of ever-shifting conditions.

Swift & Company has been trained in the school of experience.

Every day of its forty years of service has solved some new problem of value to its customers.

Every year has proved its ability to learn by experience, and to use this knowledge for the benefit of those with whom it deals.

Swift & Company, U.S.A.

ALLEGANY COUNTY RIVERS ON HIGH WATER MARK WILL MAKE

On Tuesday, July 9, the ladies of the Allegany county committee are invited to meet with the Executive Committee of Home Economics at Belmont Morning and afternoon sessions will be held. The subjects to be discussed in the afternoon session will be the "Preservation of Garden Crops." Miss Grace Chichester, will discuss the use of the pressure canner and will demonstrate by means of an exhibit the process of drying fruits and vegetables. A demonstration in the use of the pressure canner will be given by one of the state leaders of demonstration agents for the state will be present. Every lady who should plan to be at this meeting Picnic lunch at noon. Come and bring your basket.

BAD WATER BRINGS ON KIDNEY TROUBLE

Are your kidneys giving you trouble? Back feels lame and achy? Do you Suffer kidney irregularities? Do Passages painful or too frequent?

Hard water is hard on the kidneys.

Alkaline water is especially bad.

Give the kidneys help.

Help to overcome the effects of bad water.

Use Doan's Kidney Pills.

You can depend on Doan's. Andover people recommend it.

Read this Andover woman's experience:

Mrs. J. A. Swink, Second St., says: "I think the bad drinking water I used when living on a farm affected my kidneys. It caused lame back. At times I felt worn out and tired easily. The chief trouble, however, was with my kidneys acting irregularly and caused me considerable annoyance. I got Doan's Kidney Pills from the Brundage Drug Co. and they cured me of the trouble. I felt like a different woman."

Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Swink had. Foster-Milburn Co., Mfgrs., Buffalo, N. Y.

SUGAR HOARDING

The Food Administration allowance of sugar is still three pounds per month for each member of the family, and any family having more than that amount on hand (exclusive of sugar purchased on the certificate plan for canning) is evading the law and liable to the penalty for hoarding. It has come to my notice that many families are buying sugar at three or four stores, and are therefore laying themselves liable to serious trouble. This practice is unpatriotic, and will be dealt with.

GEO. C. ROSA,
Deputy Food Administrator for Allegany County.

Energy is ...the most valuable ...thing in the world. ...You need energy ...every day, every ...minute of the day. ...It is the same behind ...the lines in the work ...shop, and on the farm. What is most needed is iron in the blood. Every man should have as much iron in his body as is contained in an ordinary "tenpenny" nail. If your blood is thin, watery, your face pale and anemic, or pimply, you feel depressed, blue, without energy to complete your daily tasks. It's time to heed the warning. Make fresh, clean blood in your veins, take "Ironite" tablets, a new combination of soluble iron and herbal extracts discovered by Dr. Pierce and his Physicians of the Surgical Institute in Buffalo, N. Y. It gives one snap, pep, vim and vigor to have this iron in the blood. "Ironite" is a blood maker, a strength builder and a nerve tonic. You can obtain "Ironite" at most drug stores for sixty cents the vial, or you can obtain a test package by sending ten cents to the Invalids' Hotel and Surgical Institute in Buffalo, N. Y.

...Ringling Bros. Mammoth Show and Great Spectacle Will Soon Be Close at Hand

"Ringling Day," the big holiday for which young and old impatiently wait at this season of the year, promises to eclipse all other events on the calendar at Hornell, Saturday, July 6th. Exhibitions will be given both afternoon and night. It would seem as the everybody in this locality was planning to attend. Those who do will see many wonders. There will be the great street parade—more than three miles long this year—no end of strange and remarkable wild animals in the gigantic Five-Continent Menagerie, and whole hours of sensations in the mammoth main tent. This season the Ringling Brothers are opening their program with a wonderful spectacle entitled "In Days of Old." More than 1,200 actors take part in the great production, which tells the story of the days "when knighthood was in flower." There is a ballet of 300 dancing girls and no end of other striking features. Following the spectacle

---

...Washington in past years has accepted summer vacations as an institution. The Government has given all its clerks thirty days annual leave, with pay. Congress has accepted a vacation as its right. But war has changed it all and no one from the President down to the most inconspicuous employee of Uncle Sam will have a real vacation this summer. The President will likely take "week-end trips" on the Mayflower, as he did last year. It is said he breaks all the rules of the labor unions in the number of hours he works while on these trips—it is rather his chance to be alone, and take up problems of state without being interrupted.

One reason why no one will leave Washington this year is because they may not be able to get their living quarters back if they give them up, and Congressmen are somewhat inclined to growl because the President and Secretary McAdoo have insisted that they remain on the job, but they are settling down to the task of making up a revenue bill, and the thing will likely not be done before fall.

How About the Elections?

The professional politicians are fairly aching for a campaign this fall. The Democratic Congressmen in Washington have an idea that their cause will be strengthened by remaining at the Capital, on the job. The Republican slogan, boiled down, is: "We could have done things better—give us a chance and we will lick the kaiser quicker than anyone else." Meanwhile reports from the country at large clearly show that the people of these United States don't give a whoop for any kind of politics this year. Those who have been Democrats are still Democrats, and those who have been Republicans are still Republicans. They aren't changing their politics any faster than Methodists, Baptists and Catholics are their religion. "Politics is adjourned." In consequence elections will be rather perfunctory.
