GREENWOOD LOCAL BRIEFS

Now that Germany, who bitterly opposed the peace treaty, has accepted it, it is probable that the Senate that also opposed it, may follow suit.

W. L. Lippert of the Navy is spending his vacation in Greenwood.

The sentiments expressed in the great speech of President Wilson make the petty attacks of the small politicians look cheap.

Our nation with our Allies have fought the greatest war in the world's history to a successful termination. It was a war on which the liberties of the world hung for a long time in the balance. Had the warlords of Germany succeeded the consequences would have been too terrible for the world to contemplate. The arch enemy is hoping for a time to unsheathe its sword again and the question is shall we let the opportunity to secure the safety of the principles for which the war was waged by an organized for mutual defense or just to beat our President, use party majority to defeat the liberties of the world?

NOTICE TO NATURAL GAS CONSUMERS

During the past two years the cost of everything used in the production and marketing of natural gas has increased materially and to help meet our increased expenses we find it necessary to advance the selling price of gas five cents per thousand cubic feet.

The new rate will be in effect on the regular reading of the meter in July 1919 will be 45 cents per thousand cubic feet, subject to a discount of 3 cents per thousand cubic feet if settlement is made during the usual discount period as heretofore.

The procuring of a sufficient supply of natural gas for our consumers during the winter months is more difficult each year and economy in its consumption has become a matter of importance as the extent of the future supply depends very largely upon its conservation.

THIS SALE CASH ONLY

Annual July Silk Sale

Sale Ends Saturday, July 26th

Importance of This Event

A sale of the proportion of this one, we think, will prove one of absorbing interest to all our patrons because of present and certain future conditions in the Silk market. Rapidly advancing prices on raw silk, shortage of production, increase in cost of manufacture, and others have been the legitimate causes of rapid advance in prices for future selling. This is too well known to necessitate further comment on our part. The fact that we are able to offer this year a Sale of Silks of large proportions is important in the face of conditions mentioned above. At the eleventh hour we made a large purchase of Silks from one of the largest mills in this country at less than two-thirds their actual value. A close out at the end of their season's business, This enables us to pass this rare opportunity on to you at a proportionate reduction in price from their present value and at a still greater reduction from their value for Fall. All perfect merchandise, all high grade. Look quotations over carefully.
