Come on—lets strike.

* * *

Perk up, Christmas bills will soon be payable.

* * *

The cooties, however are not yet out on strike.

* * *

In times of peace, let us have peace—at home.

* * *

When lawyers agree to disagree, Editors get plenty of copy.

* * *

We might, of course, all get busy and outprofiteer the profiteer

* * *

The world was not made in a day—neither was a fortune—honestly

* * *

"Judge not,that ye may be judged" said the tramp to the court. It worked.

* * *

We have, unquestionably, two pastimes in America—profiteering and shooting craps.

* * *

Don't be a grouch until after you have made your pile. Then you are only eccentric.

* * *

When no longer able to make over that gown, sister, why not wear it at least a week as it is.

* * *

The world,they tell us, is all upside down. And from which it would seem, we are all human flies.

* * *

Step lively or the other fellow will step ahead of you. The early bird gets the big worm these days.

* * *

These be the days when a fellow hesitates to ask his friend to "have something." He might accept.

* * *

The trouble with most of these wars with capital and labor is that everybody wants to be general.

* * *

"It is a wonderful treaty"and "it is a conglomeration of treaties." All according to the way you look at it.

* * *

Whenever there is nothing else left in life that is funny,we can always squeeze a titter from our own jokes

* * *

Now just try saying something nice about your home town and see how delightfully bully you feel afterwards.

* * *

A western professor is soon to go up in the air 50,000 feet in an effort to communicate with Mars. Want to go along?

* * *

Many of these wonderful bargains the mail order houses advertise, are real bargains in fact—for the mail order man.

* * *

Our European friends are gay old birds. They do not want to starve to death, and neither do they want to go to work.

* * *

Now that London women have taken to smoking cigars, no doubt the men will turn to rouge and decolete shirts.

* * *

Strange, isn't it, that foreigners always tell us that our language is very hard to learn? We haven't found it a bit difficult.

* * *

Our office devil insists that beauty is only skin deep, as they claim, but, he adds, some people have a hide as thick as a walrus.

* * *

It costs money to make money, and you can't very well make money unless you have money. So there you are—go to it.

GOOD WORDS AND BAD

Often a good reputation is seriously impaired by careless, unguarded words said in jest and repeated in thoughtlessness. It is the same in Andover as in other communities.

Men and women cannot guard too well against their tongues in this respect. It is not good that our citizens be constantly exposed to the impairment of their good names because some other person in a moment of thoughtlessness or n a spirit of vindictiveness makes questionable allusions to them without the fact to substantiate such derogatory statements.

We are all interested in Andover and the surrounding territory. We want to see it grow, and thrive and blossom with prosperity. We want to see it a model community.

But it will never be other than just what we of the community make it.

If we insist on constantly hammering each other. we can only expect a battered wreck as the result.

But if we remember that in all people there is some good, and look to and speak of the best in life rather than the worst, it will have a wonderfully beneficial result.

If each of us will search out his own faults, and correct them, we will be doing quite as much as the Lord expects of individuals. He will take care of the other fellow.

If a stone must be cast withhold your arm: Let the constituted authorities handle the case. It is better than an discriminate shower of missils, whether they be verbal or otherwise.

This is OUR town.
Let us BOOST and not shove.

ICE CREAM

A tremulous lament has arisen from a victim of monopoly—or bolshevism, or plutocracy, or social sieso-mography—any way, he's the victim of something. And his complaint is that there are soda fountains which charge 40 cents for ice cream.

There are. And there are stores that charge $40 for a pair of shoes. They wouldn't charge such a price if they didn't know that there are plenty of people willing to pay it.

As long as there is a demand for ice cream soda at 40 cents a throw, so long will we find accommodating compounders of that soothing alimentive willing to dispense it at the price—or at a dollar, if there are sufficient enthusiasts willing to trade.

We have no kick. Theatres are always crowed; ice cream parlors are busy; cigar stores could in most cases handle twice as many lines and still find a market. It will soon be more of a distinction to be a pedestrian than an automobilist, every month a few more thousand of us climb in behind windshields and join the speedway parade.

The insitent and almost universal demand for luxuries is certainly one of the causes of the high cost of living. Necessities—such as wooden bedsteads—would be cheaper if they were more plentiful—if there were more people making them. But carpenters who used to make wooden bedsteads are needed to make pianos and talking machines; so the bedsteads became scarce and expensive.

Ice cream soda at 40 cents, would be a short lived institution if we all discovered that we did not need it. and your health will not suffer. Methuselah did without it longer than that, and he was an acive old bird, even in middle age. Our habit of extravagance is not the prime cause of high prices—but it is proof that we are not disposed to do much on our own account to bring them down.

Gosh! Japan has bobbed up again! Now it is a Japanese beetle that is menacing crops and causing sleepless nights over in Jersey.

* * *

Every day brings its payroll robbery and bank robbery in our large cities. The public has become so familiarized with the features which are standard in all the exploits that it hardly gives any recognition to the news. It merely compares the amount of the loot with that obtained yesterday and forgets about it. Why get excited? There'll be another tomorrow.

LONG HOURS

An argument submitted on behalf of the striking steel workers made the point that "working hours have been too long in the past. When work is arduous, we are told that it is prejudicial to a man's health to work more than eight hours, one day after another.

There seems to be sense to this. Many of the jobs in steel mills are ingularly arduous. Of course the farmer works longer hours, but they say the grind is not killing. And it is bad economics—also morally wrong—to let men continue working under conditions which hurt their health.

On the other hand,most steel workers draw exceedingly high wages. A few of them even make as much as $60 to $80 a day, which is a pretty good sum to drag down, even if the day's work is tiring. This, however, is no argument for making a working day long enough to be prejudicial to health.

Both sides are wrong. Some way of shortening the working day would, one would think, be easy to work out. According to some of the chemical experts at the mills, a shorter day would not be consistent with the manufacture of certain grades of steel. Extraordinary conditions are necessary in the construction of it. This may be true, but the war has taught us how to accomplish nearly everything that is chemically and anatomically impossible, and here is one more chance for a high-flying savant. This, however, would not satisfy the strikers. They want an enforcement of their rule forbidding any man to work at their trade without their consent. And in a free country it should be every man's privilege to work, if he likes, whenever an employer can use him. Let any man who wants join a union; but let those who prefer to stay out do so without being penalized for their independence.

BE COMFORTABLE

Statistics have proven that by economy and industry—exercised continually, not sporadically—any wage earner or salaried man can make himself financially independent long before he is old.

But how many of us do?

The reason why we don't is that "a man only lives once." We have only one chance to be young and if we don't get all of the fun out of life in our youth our appetites may be dulled by the lapse of time before we are able to indulge them at leisure.

So we don't controll our appetites. We refuse to blend our industry with consistent economy. We go the pace in our youth, and feel the lack of affluence in the decline of life.

If we could make the two virtues—industry and economy—inherent, permanent and universal in Andover, we as a community would then indeed set a pace—a different pace—a pace of prosperity and happiness which would shed the radience of peace and joy from the beginning to the end of life.

And such a thing is possible right in Andover, among ourselves.

DANGER EITHER WAY

Trades unionism is an excellent thing, it is a weapon against the tyranny of capital.

Capital is a necessary thing; without it no industry can develop.

But the overdevelopment of either is dangrous to democracy—and democracy must survive and must rule when either of them attempts to be master rather than servant of the body politic, our freedom and our national existence is menaced by a disaster as grave as invasion by a foreign foe.

Radicalism either way will accomplish no good results.

"Music hath charm," etc.—when it is music. But some of the stuff they dish up these days would discount the groan of a sick billygoat.

* * *

If every newspaper in the country would stop printing a word about those interminable strikes and lockouts and squabbles generally, there would soon be an end to the whole troublesome mess. Publicity is the life of strikes.

—As the leaves begin to fall it will be a handy thing to have around the yard. Their possibilities are only appreciated by those who pass by—after using.

* * *

No, Samuel, you should never judge the quality of the rouge by the blush on a woman's face. You can never tell how much of it is genuine.

* * *

Confirmation veiling at John E. Cannon Co.

—It will save you about one half on your 1920 fencing, if you get War Barbed Wire now being offered by Baker Bros.

With the opening of the deer season in the Adirondacks last week, two important changes in the deer law, enacted at the last session of the legislature, became effective. The first provides that hunters may kill one deer of either sex, whether buck or doe. The second provides that no deer or part thereof may be transported unless evidence of sex remains attached to the carcass or part thereof; and further, that the untanned hide of any deer shall not be dressed, trimmed or cut in such a manner as to destroy evidence of sex, except in the actual process of tanning.

Wanted—A Barber

BARBER SHOP

I have opened a Barber Shop in the Miner Pool Room, Andover, N. Y., and will do my best to please you. Special atten to children.

Thos. F. Gilmore

CONTRACT LET

Supervisor John Common notifies the News that the contract for the erection of the new steel and concrete bridge across Dyke Creek in the village of Andover has been let to the Cory Bridge Co., of Cory Pa.

The contract price is $4,370 which includes the entire job, material and all.

—Baker Bros are booking orders for War Barbed Wire at very low prices while the stock lasts, get yours in at once if you want some.

AGRIGRAPHS

Peonies may be divided and reset in October.

Farm machinery is so high in price that a machine shed will soon pay for itself.

A cow that ranks with the best of her herd is worth a half-a-dozen average cows.

On many New York farms this is a good time for those who expect to use concrete fence posts to get busy making them.

A store that didn't re-stock as fast as it sold its goods would fail. Land is the same way; don't keep taking from its fertility without restoring some

The use of artificial light to stimulate egg production can do no harm to the hen if the practice is not overdone, because a longer winter day is normal to the descendents of the jungle fowl.

A Kentucky philosopher says that a farmer who can afford to own an automobile can afford to send his son or daughter to college, because money put into a machine can never pay as well as money invested in trained brains. What about the short course at Cornell? Tuition is free to resident of New York.

Among Our Churches

SEVENTH-DAY BAPTIST
