**The Congregational Meeting**

Monday evening, Nov. 1, the congregation held its annual meeting in the church parlors. The rooms were delightfully decorated. At 7:30 a buffet supper was served to the very large group in the usual efficient manner and abundance of the King's Daughters. Musical features were delightfully rendered by Mrs. H. B. Williams, Mrs. Ray Williams, Mr. and Mrs. Harold Hardy and Mr. Claire Backus. An interesting business meeting under the direction of Mr. E. D. Baker showed the various socities to be in a flourishing condition. Reports were given from every department of the church. The attendance was beyond expectation, and a delightful evening was enjoyed by every one.

### A SAFE TEST

For those who are in need of a remedy for kidney troubles and backache, it is a good plan to try Doan's Kidney Pills. They are strongly recommended by Andover people. Ask your neighbor!

Mrs. M. F. Wykoff, Chestnut St., Andover, says: "I have all the faith in the world in Doan's Kidney Pills and cannot speak too highly of them. I used to suffer an awful lot with my kidneys. My back ached so badly I would have to press my hands upon the small of my back to ease the pain. I would get so weak I could hardly move and when I stooped over awful dizzy spells would come over me and spots would float before my eyes, blurring my sight. Doan's Kidney Pills completely cured me of every sign of the trouble and the cure has lasted. I most heartily endorse this old, reliable remedy."

Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills — the same that Mrs. Wykoff had. Foster-Milburn Co. Mfrs., Buffalo, N. Y.

### WEATHER PROPHECY

[illegible] Van Doo's Almanac Shows All Winter Weather or Mr. Lash's Scribe

Peter Zellus of No. 3619 Richmond Terrace, Holland Hook, S. I., predicts for New Yorkers a mild winter. His reasons follow:

"The bullfrogs in the pond near my home make night melodious with their croakings and their delicate notes. If the winter were to be severe they would be imbedded in the mud at the latter part of September and would not croak again until spring.

"The ground worms are crawling on the surface of my garden. If the winter were going to be a hard one they would have been five feet under ground three weeks ago.

"Garter snakes are as lively and frolicsome in the garden of my neighbor, David Jones, as they were in mid July. If the winter were going to be harsh you could not find one skirmishing around after the second week in October."

**Caterpillars' Markings Also Indicate Mild Winter**

Here is another mild winter sign, according to the farmers:

The black and brown caterpillars, so common in the fall in the suburbs, have only a narrow brown strige in the middle this year, with more than half of the front part black and short black tail markings. The observers say this is a sure indication of a long autumn, a short and late winter and an early spring.

A pair of scissors, purchased especially for the kitchen and hung on a convenient hook above the table or sink, will save many steps to the work basket.

Nov. [illegible] Harding.

Fred [illegible] of Andover, was a Hornell visitor Tuesday.

Mr. and Mrs. [illegible] Holmes are removing their household goods to Andover where they will reside this winter, and we regret to lose them as South Hill neighbors.

The first snow of the season Friday morning, an unsettled weather since has not been favorable for potato digging.

Leo Horan has been doing some plowing on the farm.

William Dean returned Friday from a few day's visit in Buffalo and Dunkirk.

Miss Anna Brown, guest of Mrs. Casey and family, has returned to her home in Oil City, Pa.

Mrs. Mila Fingrey, who has been helping her brother, A. M. Mingus, for a few weeks, returned to Andover Tuesday.

Farm study courses are an investment for these long winter evenings which may pay good dividends when you're rushed next summer. A postal card to the College of Agriculture, Ithaca, N. Y., brings full information.

A few minutes given at a definite time each day will keep a record of the farm business; and with accurate figures at the end of the season a man can see at a glance where he is making money and where he is losing it.

### COUNTY ORGANIZATION STARTS [illegible]

**Directors Elected for First Year—Will Choose County G. L. F. Agent**

The county-wide meeting, held at Belmont, to start the G. L. F. Organization was attended by representatives from nearly every community.

The plan of organization recommended by the organization manager, Mr. Weatherby, called for the election of three directors to serve one year, these directors to be representatives of the Grangé, Farm Bureau, and the Dairymen's League. - W. J. Rixford, of Wellsville, Fred L. Utter, of Friendship, and E. W. Montgomery, of Canaseraga, were elected.

This committee will choose some one to act as agent for the county. It will be this agent's duty to see that each community in the county has a local purchasing agent, and that a definite plan for handling orders is set up.

Two methods of handling are available, the warehouse and the car-door. The warehouse is the better and the cheaper, but until this is worked up everyone can make good use of the car-door.

Until the County Organization agent is appointed so that such section of the county has someone to take orders, the farmers may order direct to the G. L. F. at Syracuse. Orders should be collected by someone to make up carload lots.

Over 37,000 pounds of grass and clover seeds have already been ordered by the Farm Bureau members in this county. These will be shipped some time early in the winter. Each [illegible]

### COMMON COLDS

The general impression that a common "cold in the head" is an unavoidable harmless condition which can be safely ignored by the sufferer so far as care and treatment are concerned is somewhat upset by a recent statement issued by the State Department of Health. In the opinion of public health officials, common colds are as infectious as influenza and are not infrequently the starting point for pneumonia. They can be guarded against by avoiding excessive fatigue and by protecting the body from direct drafts, dampness, sudden chilling and other conditions which lower bodily resistance thus prevent- [illegible] in the mouth or actually put in pills or drinking cups which may have been wet with the saliva of others. Unprotected coughing and sneezing are also emphasized as methods by which the infective material is spread from person to person. Children should not associate with or be fanned by those having colds.

Bodily resistence to colds and other diseases can best be built up by taking pains to live so as to have plenty of fresh air, day and night, the proper kind and amount of exercise, good food, but not in excess, and a sufficient amount of rest.

Once a cold is contracted the best conditions for rapid recovery are complete rest and rapid elimination of the bacterial poisons by the use of laxatives. Prompt local medication under a physician's direction may shorten the duration of the disease, diminish the discomfort, and incidentally, lessen the period during which the sufferer is capable of carrying the infection to others.

Remember that standing timber will keep; it can wait over a period of low prices without rapid deterioration.

Most of the things put off till tomorrow should have been done yesterday. A careful planning of work this winter will enable you next spring to do to-day's job to-day.

Folks like it so much the State College of Agriculture at Ithaca had to get a second edition—"The Arrangement of Household Furnishings." Ask for H. 85 if you want a copy.
