Centralization and Modern Trends

SOME of the greatest changes in our mode of living have taken place in the last 25 years. The automobile has come into its own in practically every family and accepted as a thing that must be. Electricity and its auxiliaries have taken the place of oil, gas lights and heat. Who would want to go back to the oil light method of achievement? Insulation from hot and cold and air-conditioning are being introduced and as we become familiar with these improvements and take advantage of them we wonder how we managed before these advantages were with us.

Do we find these advances to our liking for ourselves as well as for our families? The answer is yes, and no hesitancy.

In the same manner the educational side of living has been progressing, but have we given it the consideration it is really due? A short time ago a grant was given by the Government of $171,000 to be used for constructing a centralized school building in Andover. Following this grant, word was received from Albany that the Education Department had granted Andover the permission to centralize Andover schools and approved a four year high school course for Andover school.

This amount of money was given with no strings attached in any way. This is a gift to the community, to be used for a central school, and the people of Andover have the responsibility of accepting or rejecting this present opportunity for financial aid. If we delay, the entire burden may fall on the school district in the near future, with only regular aid from the state, and the department will not at it seems be in regard as to what Andover shall have in the way of a school setup.

This is our opportunity to establish a four-year high school, while if we wait the Department may redistrict this area and our high school children might be compelled to attend school in some other area.

Do you realize that that would mean to your community as a whole if centralization was opposed? There might be no high school here just a graded school all the high school certificates and graduations would be held in some other locality. Then with the redistricting of the entire state the community would have to assist in the same manner just the same whether we have centralization a not. Is it not important that the taxpayers of this area immediately and seriously consider the possibilities of this centralization plan and take advantage of approximately one quarter of a million dollars which is made available to us under the present plan.

Take the time and trouble to inform yourself completely on this question before you make a decision.

A magazine article is captioned: "Where Do We Get Our Prejudices?" We never do. It's always the other fellow. He has prejudices, we have only convictions.

Among the peculiar things of life is the woman who will pay $765.00 for a fur coat and grumble when meat goes up a cent a pound.

Keep on plugging. Remember, the first olive you succeed in fishing out of a bottle loosens up the others.

"Look out for the car of tomorrow!" suggests the editor of a motor magazine. Brother, will you please not bother us? We're too busy dodging the car of today.

For a Healthier Nation

RECOGNITION that the health of the people is a major concern of Government, and evidence of the intention of Government to take an active part in securing to it that medical services and hospitalization are brought within the means and reach of every citizen, and that Government activities in the field of preventive medicine will be accelerated, were made clear at the convention of the National Health Conference in Washington.

A ten-year national health program is proposed, at an estimated cost of $850,000,000 a year, of which half would be paid by the Federal Government and half by states and communities. The committee reported that such a program aimed toward control of various diseases and conditions, with facilities and services commensurate with the high standard of American medical practice made more generally available, the coming decade will see a major reduction in needless loss of life and suffering and an increasing prospect of longer years of productive, self-supporting life for the whole population.

To that objective every American will, we believe, say amen.

That it is no idle dream that the standards of health for all the people can be raised by concerted action, Dr. Thomas Panan, surgeon-general of the U. S. Public Health Service, assured the convention. He hailed the plan as a vital step toward the elimination of poverty, the relationship of which to disease is well known. Medicine can do more than economics to eliminate poverty, he said. The proved ability to prevent disease is far greater than the proved ability of economic science to control other causes of poverty.

There are physicians who resent and rebel against any effort of government to take a hand in the war on disease. The belief expressed in the Washington convention was that the public health is too vital a public concern to be left private initiative.

With that most people will agree.

An Authority Speaking

I CALL Franklin D. Roosevelt a conservative statesman just because of the social bent he gives to democracy. He is a true friend and a genuine servant of liberty, even when he limits and regulates it socialistically, for it is by such means that he takes the wind out of the sails of fascism and bolshevism.

Thomas Mann

The Dirigible Airship

THE United States will have a heavier than air flying ship, under the appropriation of 3.4 million dollars for that purpose made by the last Congress. It will not be as large as the ill fated "Hindenburg," but it will mark another effort on the part of this country to develop what has become the back of modern transportation.

Of course the new U. S. airship will use safe helium gas instead of inflammable hydrogen for the lifting power. It is not yet beyond possibility that we may supply helium from our government controlled gas wells for the new German airship. Commander Rosendahl, our navy's foremost authority on such matters, has just returned from Germany and confirms the belief that the dirigible airship plays no part in military preparations over there. Its futility as a military machine was demonstrated in the World War. Its use in war, in effect, limited to service as a naval scout.

If the reports are true that gas wells containing helium have been discovered in Brazil, there is nothing to stop the Zeppelin company from resuming its transatlantic passenger service to this country. Those who believe in the great possibilities of the airship still not come that outcome.

Success: Moving to New York and making more money on you can pay 80 cents for a glass of orange juice.

A good "talkie" innovation is the unseen narrator who helps to explain the story. Hitherto this has been done by members of the audience.

Europeans complain that they never know what Great Britain's foreign policy is. The British can sympathize with them—they don't know either.

Potato Growers Vote August 19-24

All Allegany county producers who grow potatoes for market are eligible to vote, August 19 to 24, on whether they favor a potato marketing agreement.

If the agreement goes into effect, it will end July 31, 1941, unless previously terminated at the end of any crop year by a majority vote of producers in the areas affected. The program would apply to all counties in New York State.

The order requiring shippers to comply with the marketing agreement can be issued if two-thirds of the growers voting, by number or volume of potatoes produced, favor the action, and if the agreement is signed by 50 per cent of the shippers, or by shippers of 50 per cent of the volume of potatoes.

An Alternative

An order can also be issued, with the approval of the President, if the grower vote is favorable, even tho the required number of shippers do not sign the agreement, according to R. F. Fricke, assistant state leader of county agricultural agents in New York State.

Modifications in the plan as originally proposed were made after public hearings in June, attended by growers and handlers in all the states concerned. Under the modified program, major provisions call for the elimination of culls potatoes in interstate shipments, and require Federal-State inspection of potatoes in interstate shipments.

At no time would the program restrict shipment of potatoes grading U. S. Commercial, or better, in size; or potatoes more than one and one seventh inches in diameter; or, for the Burbank variety, potatoes of more than five ounces; or potatoes of any grade or size sold in the state where produced, those sold in foreign trade, or officially certified seed potatoes. All of these can be shipped without restriction.

Interstate shipments of 2,000 pounds or less will not be affected by the program. Potatoes for use in the manufacture of starch or other by products and potatoes chipped for distribution to persons on relief are also exempt from the regulations, says Mr. Fricke.

Turning Back the Pages of Andover History

TAKEN FROM THE FILES OF THE ANDOVER NEWS

FORTY YEARS AGO

AUG. 10, 1898

Mother & Greene, Editor & Publisher

G. A. R. Campfire

The Allegany County G. A. R. Association of which Comrade T. N. Boyd of Andover is president, met at Andover Tuesday for its annual campfire.

The village was beautifully decorated to receive the veterans. A parade formed at G. A. R. hall at 1:30, marched thru the principal streets, ending at the Prest opera house. A fine program including an address by Rev. P. M. MacLeod was enjoyed.

Music for the day was furnished by the Excelsior band of Andover and the Martial band of Scio.

The infant son of Mr. and Mrs. M. F. Livermore died Friday afternoon.

The Excelsior band of Andover will play at the Wellsville fair on Aug. 16-17-18.

Dr. P. B. Hardy of Tucemseh, Mich., is visiting in town.

Miss Margaret Wood is visiting friends in Canisteo.

Mrs. Scott Prest and Miss Flora Bundy are at Chautauqua.

Dr. John Common is attending the celebration at Angelica, today.

Mrs. M. L. Beebe went to Saginaw, Mich., last week, called there by the illness of her son, George Beebe.

Mr. and Mrs. John Swain of Canaseraga have been visiting in the "home town" the past week.

James Pardon of New York City is visiting in Andover.

WALT DISNEY

He Made a Fortune Out of a Mouse And Three Pigs

Not many years ago, Walt Disney, the man who created Mickey Mouse and the Three Little Pigs, was almost unknown. Today, he is one of the most famous men in America.

Not so long ago, Walt Disney was "broke." Today he is wealthy. He could spank about in a glittering Rolls Royce, if he wanted to; but instead he uses an old car that he bought second-hand. He takes all of his profits and plows them back into his business. He says that making better pictures is costing him more than piling up millions.

Walt Disney used to live in Kansas City, and he was ambitious to be an artist; so, one day, he went to the Kansas City Star to get a job. The editor examined his drawings, told him he didn't have any real talent, discouraged him, and sent him away with a broken heart.

Finally he got a poorly paid job making drawings for churches. He couldn't afford to rent an office, so he had to use his father's garage for his studio. He thought at the time it was hardship, but he realizes now that, working amidst the grease and gasoline smells of that garage gave him an idea that was worth a million dollars.

It happened this way: One day, a mouse started playing on the floor of the wooden garage. Disney stopped and looked at him, and then went into the house and got some crumbs and fed him.

As the days went by, that mouse became so friendly that he would climb up on top of Disney's drawing board.

Disney finally went to Hollywood and started a series of animated cartoons called "Oswald the Rabbit" but that was a flat failure. So again he found himself without money and without a job.

One day, he was sitting in a rooming house, trying to think up an idea, when suddenly there popped into his mind the mouse who used to climb on his drawing board back in the Kansas City garage.

Instantly, he started to sketch a mouse—and that's how Mickey Mouse was born. That mouse in Kansas City, long since dead and gone, was the great grandfather of the most famous motion picture actor the world has ever known. Mickey Mouse gets more fan letters than any other actor in the films; and he frolics across the screen in more different countries than any other actor in the world.

Walt Disney himself devotes all of his time to thinking up ideas for pictures; and when he gets an idea, he discusses it with his staff of 12 assistants in the story department. One day about two years ago, he suggested to his staff that they make a picture out of a nursery story that his mother had read to him as a child—the story of the Three Little Pigs and the Big, Bad Wolf.

His assistants shook their heads, and turned down their thumbs. Disney says he tried to forget about the idea; but he simply couldn't. However, every time he suggested it, his staff warned him it would be a "flop."

Finally, the staff said: "All right. Let's go ahead with it," but they didn't have much faith in it.

It takes 90 days to make a Mickey Mouse film; but they didn't propose to waste that much time on Three Little Pigs, so they rushed it out in 60 days. No one in the studio thought it would amount to much. Yet it took the country by storm.

It was a sensational success. Everyone from the cotton fields of Georgia to the apple orchards of Oregon, was soon singing "Who's Afraid of the Big Bad Wolf, the Big Bad Wolf, the Big Bad Wolf?"

He plays baseball every day at noon, and he occasionally plays polo but he says he gets more of a real thrill out of his work than he does out of his play.

STOP THAT ITCH

DON'T SUFFER ANOTHER MINUTE
Evons' Oxylin Ointment absolutely new and different, not a messy liquid. Grease less, vanishing, non-poisonous, healing, pain-relieving, antiseptic. Short Comment on Current Affairs at Home and Abroad Affecting New York Agriculture

Prepared personally by
HOLTON V. NOYES
Commissioner of Agriculture and Markets New York State

JUSTICE FOR MILK PRODUCERS

So much is said, from time to time, about the so-called Law of Supply and Demand, and there is so great an inclination on the part of the public to think that this is some great law of nature which determines the price of most of the necessities of life, that I feel once in a while we should inquire into the general question of just how this law works in actual practice.

Without doubt there is a general relationship between available supply and immediate demand, which, to a certain extent, regulates the price of any commodity. However, in most industries there is no supply if there is no demand. The successful manufacturer produces only what he can sell at a satisfactory price. If he finds this impossible, he shuts down the factory.

The power and light companies, which have the potentiality of an endless supply of electric current available, set the price to their consumers and then produce only as much power as their consumers demand. The same general principle applies to the transportation industry. Transportation for the public or the movement of merchandise is provided at a price set by the operators of these common carriers, subject to approval by quasi-judicial commissions of the state and federal governments. If there is a demand for more transportation, an extra train is placed in operation. If the demand declines, one or more trains are removed from the schedule.

In many particular instances in history, the law of supply and demand has been manipulated to such an extent that the supply of the necessities of life got into private hands, to the very great detriment of the general public. These were the days when "corners" in wheat and corn did result in enormous fortunes to the certain individuals or groups of individuals, all at the expense of either the producers of these commodities or the consumers of them.

In general, I think, it is becoming more and more recognized that the law of supply and demand under modern conditions is so susceptible of manipulation that it cannot be left to itself; that there must be regulation, particularly in certain branches of industry, to protect the public interest by offsetting this artificial interference of selfish and interested individuals or companies with the free working of supply and demand.

This, I believe, is true of the dairy industry in particular in this state. Milk is a necessity of life. The milk industry should be so regulated that people living in the cities should always have available an ample supply in the best sanitary condition at a fair and reasonable price.

At the same time, this regulation or control should be such that those who produce milk efficiently are reasonably assured of a decent living from their investment and labor. It should also permit those who distribute milk efficiently to be reasonably assured of a fair return upon capital invested and reimbursement for fair wages paid to those they employ.

Recently, the uncontrolled law of supply and demand has been working at its savage worst in this industry. I have on my desk several photographs of store windows in New York City with large advertisements painted on them offering milk of a certain reputable brand at three cents a quart.

We learn from investigations that have been made from time to time that the actual cost of processing and delivering milk is not far from five cents per quart. It is perfectly evident that when it is sold at three cents per quart that is less than cost and is done for some unfair, sinister purpose; perhaps to put some competitor out of business. This would not be a matter of so great concern if it were simply a fight between two dealers. But price-cutting inevitably reacts to the disadvantage of the producer who is the least able to suffer this loss and in no way responsible for it.

The attempt on the part of a few dealers to buy cheap milk to carry on a savage fight such as this in the retail market results in a generally much lower price for all milk. During the past several months much more milk in fluid form has been offered for sale in New York City than the market, under recent economic conditions could absorb. The result has been that the producers who are unorganized and unregulated, are suffering from the lowest prices experienced in many years.

The law of supply and demand has brought the milk producers of New York State very close to ruin. While we have been nearly 50 years trying to find some way to make the law of supply and demand operate to produce its greatest benefits, it is difficult to see where any great progress has been made. One of the purposes of government is to regulate relationships between factors of industries having to do with the necessities of life.

If there were no differences of opinion between people and groups in this world, there would be very little need for government of any sort. The purpose of government is to so govern that the interests of each group are fairly considered and to so regulate the affairs of individuals and groups that the best interests of all groups are served.

When the price of milk gets too low, the farmer cannot simply shut off the supply. When the supply of milk is too little, the farmer cannot thru any immediate action, very greatly increase the supply. Therefore, the source of supply must be so regulated that in periods of shortage there is still enough to supply the needs of the public in order to insure a proper supply for the public during the shortage period there will always inevitably be a surplus during the flush period.

Milk is a commodity which can be used for purposes other than sale as fluid milk, and the possible thing, of course, is to remove from the fluid milk market any surplus above needs. This can only be done by a general movement on the part of the farmers and such unity of effort is entirely dependent upon organization and cooperation which are not possible except under government regulation.

It seems to me entirely natural and proper that in such a case as milk, the government should take responsibility for enforcing such rules as the industry itself may suggest to cure the evils of uncontrolled operation of the law of supply and demand, providing such rules are fair to all factors of the industry.

I feel very definitely that this is a natural and proper function of government. To me it does not appear like government regulation so much as government cooperation to secure justice thruout the industry.

The worst BODY ODOR is P.O.

The worst body odor comes from P.O.—perspiration odor under the arms.

Take 1 minute to use Yodora—new, cream deodorant cream that works directly on perspiration. Normally stops odor 1 to 3 days. Yodora also reduces amount of perspiration.

"Made without lard"—Yodora is utterly different from other cream deodorants. It contains no soap, no gritty particles. (1) Doesn't rot dress. (2) Leaves no stinging sensation in underarm skin. (3) Doesn't dry out in jar. Doesn't harden. Yodora is not a soap. Trial size FREE. Get it at any drug or toilet goods counter.

OUR CHURCHES

BAPTIST

Rev. W. C. Gates, stated supply

Sunday, 10:30, morning worship. Sermon by Rev. W. C. Gates.
11:45, Bible school.
6:30, Christian Endeavor.
Prayer meeting Thursday evening.

PRESBYTERIAN

Rev. Lucien H. Kerns, Pastor

Morning worship at 11:30. Sermon, "Wrestling with the Secret of Existence."

The annual festival of Harvest Home will be held on the lawn of the church Thursday, August 18. Dinner will be served at 11:30 a. m.

METHODIST EPISCOPAL

Edward J. Cory, Minister

10:30 a. m., Public Worship. Sermon by the pastor.
11:45 a. m., Church school.

The last local conference for the year will be held tonight (Thursday) at 7:30 p. m. District Supt. W. W. Dailey will preside. All members of the conference are asked to attend.

SEVENTH DAY BAPTIST

Walter L. Greene, Pastor

Sabbath services at 2:00 p. m. Sermon by the pastor. Subject: "The Secular Person."
Bible School at 3:00. C. J. Bardick, superintendent.
There will be no regular services in this church on August 20 and 27 Independence.
Morning worship and sermon by the pastor at 10:30
Sabbath School at 11:45. Mrs. F. Clarke, superintendent.
According to the vote of the church last week, there will be no regular church services on the 2nd 27th of August. We shall be [illegible] you all on Sabbath.

CONGREGATIONAL AND METHODIST ALLIANCE

Rev. D. F. Wilson, Pastor

Saturday is the long looked for day by the children and the older folks as well it is the day of the picnic of the Sunday school. Gathering at the Grange Hall at 9 o'clock and bringing a basket lunch and a lemon, and then the lunches will be put together and everyone will enjoy the lunch together. Transportation will be furnished and a grand day and time is being looked for by everyone. All are cordially invited to come and enjoy this time of fellowship with us at Island park, Wellsville.

Sunday afternoon at 1:45 p. m. is the regular Sunday school time, and a temperance lesson is under consideration for this coming Sunday. Topic, "The Relation of Temperance to Character."

Public worship at 3 p. m. Once more we will have Missionary Sunday, and the pastor will bring a message, topic: "God's Great Gift," (11 Cor. 9:15).

The attendance has been good during the summer and we are looking for it to keep up.

Evangelistic service at 7:30 p. m. A rousing old fashioned song service. Topic, "Lot Lingered." Wonderful has been the spirit of these evening meetings and great the attendance. We cordially invite and urge you to come and worship with us.

Mid-week prayer and Bible study at the home of Will Chase, Thursday evening at 7:30 p. m. Continuing our studies in the Epistle to the Romans, written by that great man, the Apostle Paul. This week we will continue our review of the first eight chapters on the Doctrine of Sanctification. Come and bring your Bible and paper and pencil, so you can take notes on this wonderful and vital book.

Young people's meeting at the home of the pastor on Dyke street, Friday evening at 7:30 p. m. The leader this week will be Mrs. H. E. Wilson, and a very interesting study on the "Diety of the Holy Spirit."

NEW KIDNEY TREATMENT

New European Discovery, praised by thousands, gives quick relief and lasting benefit. A new and different kind of treatment called NEF-TEX. Not a kidney stimulant but an internal antiseptic which soothes and heals irritated membranes. If functional Kidney or Bladder disorders make you suffer from getting up nights, nervousness, loss of pep, dizziness, acidity, burning, smarting or itching you should get this modern treatment at once. Convenient tablet form. Works fast, safe and sure. Brings new vitality. Is guaranteed and costs only 6 cents a dose. Remember the name NEF-TEX TABLETS in brown bottle.

HOW, WHAT AND WHY?

Special to the Andover News

The Andover News has arranged with the Office of Information of the New York State Colleges of Agriculture and Home Economics to answer questions about problems of farm and home. If you enclose a self-addressed, stamped envelope and mention the name of this paper, you will receive a direct reply to your query from the colleges. Do not ask more than one question in one letter or on one postcard. Ask as many questions as you like, but make each one a separate communication.

Good Vines, No Melons

W. C. Webster asks: "Why am I getting so few muskmelons? The vines are five to six feet apart and the ground is well fertilized. I have a good growth of vine, plenty of blossoms, but very few melons."

Dr. G. J. Raleigh of the department of vegetable crops replies: "The first flowers produced on melon vines bear pollen only and can not develop into melons.

"Flowers that may develop into melons are born singly in the first or second axils of the fruiting branches which are produced after the vine has made some growth. Because the pollin-bearing flowers are very abundant, it is natural to question whether the plant is growing properly because so few melons seem to set during early growing stages of the vine.

"By carefully examining flowers on a melon vine, it is possible to tell which flowers may develop into melons."

Leaves Curl, Small Berries

Mrs. T. M., Lyndonville asks: "Can you please tell me what to do for Cuthbert red berry bushes when the leaves curl up and the berries do not grow to normal size?"

W. D. Mills of the plant pathology department answers: "We regret we cannot make a definite diagnosis of your trouble without first seeing specimens of the diseased bushes. We will be glad to do this if you send samples.

A copy of Council bulletin S 306 has been sent to you. It tells about diseases and insect pests of the Cuthbert red raspberry.

Dr. R. H. Wilson of the department of entomology answers: "We have sent you information on the habits of fleas and their control.

"You may be interested to know that there is a rather general infestation by this pest in this state at the present time."

Notice to Creditors

Pursuant to an order of the Honorable Ward M. Hopkins, the Surrogate of the County of Alegany, Surrogate's Court, notice is hereby given that all persons having claims against Sara R. Cannon, late of the Village of Andover, in said County of Allegany, N. Y., deceased, are required to exhibit the same, with the vouchers thereof, to the undersigned, the administrators of the estate of said decedent, at the Andover National Bank, in the Village of Andover, in said County of Allegany, N. Y., on or before September 1, 1938.

PAY YOUR GAS BILLS on or before the 20th of month and save discount. Bring your gas card to be recupited. EMPIRE GAS & FUEL CO., Ltd.

Watch Your Kidneys!

Help Them Cleanse the Blood of Harmful Body Waste

Your kidneys are doubtedly working overtime to free the blood of excess acids and poisonous waste matter. You can't feel these efforts of your kidneys. It is only when kidneys get badly overworked or disease sets in that you may suffer from kidney and bladder disorders.

Symptoms that may be nagging backache, persistent headache, attacks of dizziness, rheumatic pains, leg pains, loss of vigor and vitality, nervous tension, sometimes with scanty or too frequent flow of urine.

There should be no doubt that prompt attention to these first warnings of kidney trouble from Doan's Pills, a stimulant diuretic, should help the kidneys to flush out poisonous waste from the blood. They have a country-wide reputation. Ask your neighbor!

Doan's Pills are recommended by users everywhere. Ask your neighbor!

DOAN'S PILLS

Births

Aug. 3.—To Mr. and Mrs. Joseph Tetu, Alfred, a daughter.

July 25.—To Mr. and Mrs. Martin Butts, West Clarksville, a daughter.

Aug. 3.—To Mr. and Mrs. Cleo Gary, Wellsville, a daughter.

Aug. 4.—To Mr. and Mrs. John Burch, Alma, a daughter.

Aug. 2.—To Mr. and Mrs. Richard Bartlett, Hornell, a son. Mrs. Bartlett was formerly Miss Angie Sprong of Wellsville.

Aug. 6.—To Mr. and Mrs. Richard Appier, Wellsville, a daughter.

Aug. 7.—To Mr. and Mrs. Francis Joyce, Wellsville, a daughter.

Aug. 5.—To Mr. and Mrs. Ward Eldridge, Wellsville, a son.

Aug. 10.—To Mr. and Mrs. Robert Clair, Greenwood, a son.

Aug. 7.—To Mr. and Mrs. Chas. Davis, Canacadea, twin sons. Mrs. Davis was formerly Florence Sanford of Angelica.

Aug. 8.—To Mr. and Mrs. Linley VanRiper, Almond, a son.

Marriages

July 29.—Frank Moses, Richburg to Miss Bernice Ann Palmquist of Olean. The couple will reside in Bolivar.

July 20.—Miss Bernice Adams of Bolivar to Marshall G. Wood of Eldred, Pa. The couple will reside in Bolivar.

Aug. 1.—Miss Elouise Elizabeth Hayes, Portville, to Philip Skeps, Clymer, N. Y.

July 30.—Miss Mary Della Madison, Belfast, to Werner Samuel Morl, Pultney Road.

DEATHS

Roscoe Easton, former resident of Richburg, Aug. 3, at Willard State hospital. Services were held Saturday afternoon with burial in Portville cemetery.

Mrs. Alfred Goss, Portville, July 29, following a lingering illness. She is survived by her husband, one daughter, one son, her mother, five sisters, one brother and two grandchildren. Burial in Olean cemetery.

Olin J. Dawson, 39, Portville, Aug. 3. His wife, one sister and one brother survive. Private funeral service was held Saturday at the home. Burial in Portville cemetery.

William Theodore Reuse, 57, Scio, Aug. 7 at the home of his son, Philander Reuse. Surviving are three sons and one daughter, 16 grandchildren and several great grandchildren. Services were held Saturday. Burial in Maple Grove cemetery, Friendship.

L. C. Main, 63, Fillmore, Aug. 3, following a lingering illness. Surviving are his widow, two daughters, one son, two sisters and two brothers. Funeral services were held Friday. Burial in Pine Grove cemetery, Fillmore.

Mrs. Katherine M. Peck, 85, formerly of Belmont, Aug. 6, at Akron, Ohio. Surviving are three daughters, one son and one stepson. Services were held Tuesday afternoon at Belmont. Burial in Belmont cemetery.

Change Time of Hornell Parade

The time for the big parade in connection with the Hornell field day next Wednesday, August 17, put on by the Hornell Welfare Association has been changed from 1 o'clock to 6 p. m.

Firemen from three counties, four troops of National guardsmen and numerous floats will be seen in the parade.

The program for the day starts at 12:30 and continues thruout the afternoon and evening. Riding demonstrations by the State police from Sidney and the annual policemen's and firemen's ball game are the highlights of the afternoon program.

In the evening a concert by the Park band, Arkport firemen's drill team, demonstrations of jumping horses by the National guard cavalry of Genesco and a sham battle by Company K are the chief attractions.

Allegany County Asso. To Meet in Rochester

The 25th annual picnic of the Allegany County Association will be held at picnic grounds No. 3, Genesee Valley park, Rochester, Saturday afternoon. Supper at 5:30.

Bring family lunch. Association will furnish coffee, orangeade, and ice cream. Please notify secretary if you plan to come.—Reggie Barber Swetland, secretary, 85 Juniper St., Rochester, N. Y.

Operator Licenses to Be Issued Monday

Beginning Monday, August 15, operator and junior operator license will be issued for the renewal of licenses expiring Sept 30, 1938. Commissioner of Motor Vehicles Chas. A. Harnett, announced today.

Renewal blanks may be obtained at all issuing offices of the Motor Vehicle Bureau thruout the State and at County Clerk offices which are agencies of the commissioner.

A doctor received an urgent telephone call from a farmer, the call his small son had taken. The farmer said:

"I'd come at once, but I'm busy. Give Willie some castor oil."

"But, doctor," said the boy, "Pop wants you to come."

"I'll come at once," said the doctor. "When you get home, give Willie the castor oil."

A traveler said to the conductor of a slow American train: "Does this railroad allow passengers to give advice?"

The conductor replied gruffly that he thought so.

"It occurred to me," said the traveler, "that it would be as well to detach the cow-catcher from the front of the engine and bolt it on the rear, for what is to prevent a cow from strolling into this car and biting one of the passengers?"

WAKE UP YOUR LIVER BILE—

Without Calomel—And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas blows up your stomach. You get constipated. Your whole system is poisoned and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't get at the cause. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up." Harmless, gentle, yet amazing in making bile flow freely. Ask for Carter's Little Liver Pills by name. Sold everywhere. 25c.

What Do You Know About Health?
By FISHER BROWN and NAT FALK

Answers: 1. Just after the French Revolution, Pinel made the plea that insane persons were entitled to humane treatment. He subsequently demonstrated that the insane did not have to be chained and caged like wild beasts, as was then the practice, but would respond to decent, kindly treatment.

2. Dr. Clarence A. Mills, professor of experimental medicine at the University of Cincinnati, has, through his experiments, revealed that the affairs of "voice and men" alike are ruled by certain weather conditions and that we are either indebted to or jeopardized by climate.

3. No. It should not be necessary to "break in" any shoe. The shoe that is properly fitted to the foot is comfortable from the very beginning.
