New York State's 50,000 industrial concerns buy a larger volume of raw material and semi-processed goods than are purchased in any other location in the world.

VETERANS NEWS LETTER

Gold Star widows and parents of World War II will have to wait a little while longer before they can obtain the lapel button which was voted them by the 80th Congress.

Inquiries concerning the issuance of the lapel buttons authorized by Public Law 306 revealed that regulations governing the buttons' issuance haven't been drawn up, nor has the design of the button been selected.

Under the law one Gold Star lapel button shall be furnished, without cost, to the widow and to each of the parents of a member of the Armed Forces of the United States who lost his life in the Armed Forces of the United States in World War II.

Upon application and payment of an amount sufficient to cover the cost of manufacture and distribution, the gold star lapel button may also be issued to the children, brothers, sisters, half brothers and half sisters of the deceased servicemen.

Members of Army and Air Force Organized Reserve units soon will receive one-thirtieth of active duty base pay and longevity pay for each drill period they attend. President Truman signed the new drill pay law into effect recently and regulations to put it into effect are now being prepared. The National Guard bureau is also processing regulations to add longevity pay to drill pay of its members, under authority of the new law. Provisions of the Alien Fiancees Law have been extended until June 30th. Law provides for the admission of fiancees of servicemen and honorably discharged veterans into the U. S., for a period of three months, with a passport visa as a non-immigrant visitor, with a bona fide intention of being married to a citizen of the U. S. within aforesaid three-month period.

Jet planes were first flown off and on a carrier by the Navy in August, 1946, almost two years ago, when the FD-1 Phantom, operated off and on the aircraft carrier Franklin D. Roosevelt.

State Postpones Fair to Prevent County Conflicts

Albany, March 27.—Decision to postpone the limited 1948 State Fair at Syracuse until one week later than the dates originally selected, has been made by Commissioner C. Chester Du Mond of the New York State Department of Agriculture and Markets.

The change in dates brings the fair within the week of September 13 to 18. Dates first selected were in Labor Day Week September 6 to 11.

Inasmuch as the fair will be for exhibition purposes only and will include a cattle show, junior agricultural projects and possibly exhibits sponsored by the New York State Grange, Commissioner Du Mond said the postponement of one week will assure larger participation by these exhibitors. The change likewise avoids conflict with ten or more of the larger county fairs, many of which had already assumed obligations for Labor Day week.

Sufficient Postage

"Here, your letter is overweight," said a post office clerk in a South of Ireland office to Pat.

"Over what weight?" asked the native.

"It's too heavy; you'll have to put another stamp on it," explained the clerk.

"Get out wid yer foolin'. Sure if I put another stamp on it won't it be heavier again?" And Pat beamed in triumph at his superior knowledge of postal regulations.

Must Obtain Permit When Building Driveway

Albany, April 6. — Persons wishing to construct or reconstruct private driveways leading from their property to State highways must first obtain permits from the State Department of Public Works for that portion of the project which lies within State highway rights of way. This was explained here today by Charles H. Sells, State Superintendent of Public Works, as being a requirement of State law.

Construction of driveway entrances which do not follow contours of highway roadsides interferes with proper highway drainage and also constitutes a potential hazard to traffic, said Superintendent Sells. This is especially true, he explained, at points where driveways descend to highway levels.

Persons applying for permits to undertake such work, he said, are given engineering advice on proper methods of construction by department forces. Applications for permits for such work in this area should be filed with H. F. Brumm, District Engineer, New York State Department of Public Works at Hornell.
