WANDERING with "WILLIE"

THE POND proposition plans according to what we hear, sound better than they have in years. The local Gun and Rod Clubbers in putting "Pete" Howland at the helm of the dam business (that is the pond dam business) have a guy in there that understands what makes what and why and with the backing of the State in the restocking of the ponds Allegany county fishermen should have a doggone nice future of fishing in store for them.

While we are on the subject of Allegany county fishermen — we've observed cars from all over up at the ponds during the summer months and we know they took home the bacon (if fish have bacon) and it was the Andover boys who kept the place in shape for visiting fishermen—always glad to welcome them.

But, and here is where the other clubs of the county will stop reading, why not take a couple of bucks that are being saved up for a clam bake and pass it on to the Andover club to help in this new project? After all, bulldozers and pile drivers cost mazooma!

THIS is the time of year the farmers don't think much of, but us "city slickers" just love—that is, Daylight Saving Time. The farm fellers rather have their cow time, but if they were cooped up between four walls all day and suddenly had an extra hour of sunshine thrown to them oh what a different story it would be. (And besides, after talking to our chickens the last couple of mornings and evenings they seem to like the daylight saving idea too. Probably because they get fed earlier in the A. M.

And the youngsters like it better because the Andover Athletic Field never seems to come to life until after daylight saving goes into effect, and then things really boom up that way.
