Mrs. Ralph Kemp was called to Fort Wayne, Ind., this week by the illness of her mother.

Leon Bloss and son Lawrence of Sayre, Pa., were calling on Andover relatives and friends Monday and Tuesday.

Brockport to Give Summer Teachers Course

As an emergency measure to meet the unprecedented demand for teachers in the elementary grades of New York State schools the Brockport State Teachers College has been authorized by the State Board of Regents to institute a training program during the summer session whereby a graduate of an accredited college may qualify for appointment as a teacher in September, 1948.

Temporary teaching certificates will be issued in the successful completion of six credit hours of work this summer. All work taken in the summer sessions will be credited towards the Master's Degree in Education and the permanent teaching certificate.

By communicating with Dr. Blaine M. DeLancey, Director of Admissions, State Teachers College, Brockport, N. Y., prospective candidates may secure more detailed information about the program to begin this July.

Uniform Price for May Estimated at $4.66

Dr. C. J. Blanford, market administrator of the New York metropolitan milk marketing area forecast Monday a uniform price to producers of $4.66 per hundredweight for their May deliveries to pool-approved plants in the New York milkshed.

At the same time he estimated that the producer butterfat differential for May would be seven cents for each tenth of a pound of fat above or below 3.5.

The forecast is based, Dr. Blanford said, on a production estimate of 600 million pounds for the month, which would mean an average daily output of 430 pounds by the estimated 45,000 producers in the milkshed.

CORSET DEPARTMENT
SECOND FLOOR

THE "FASHIONED FRONT" identifies a TREO origination from which have developed the most desired styles in modern corseting . . . The very ingenious designing of the "FASHIONED FRONT" has made ideal figure control possible with soft, light-weight materials—entirely free of boning . . . The nature of the fashioning results in a gentle, concave pressure which effectually holds in bulges even when the wearer sits or bends . . . All this with complete wearing comfort and easy action-freedom.
