Margery Eccleston Painfully Injured

Margery Eccleston, seven-year-old daughter of Mr. and Mrs. Martin Eccleston of Pingrey Hill was painfully injured Saturday afternoon when a trapdoor fell on her head.

The Eccleston children were playing and chasing the chickens about the yard. The chickens ran into an outside cellarway of the house and the children raised a trapdoor which was not fastened with hinges and laid it upright against the wall. The girl and a younger brother laid down on the cement floor to look into the cellar for the chickens when the door fell, striking the girl on the back of the head, driving her chin into the cement.

A neighbor, Mrs. George Blank took her to Jones Memorial hospital where examination showed lacerations of the chin and lower lip, two lower teeth and one upper tooth knocked out. It required 27 stitches to close the wounds.

Steel Holding Up Second Street Bridge Repair

Two weeks ago the superintendent of highways and the supervisor were forced to close the bridge on Second street for all traffic because of the condition of the bridge.

On examination of the bridge by the county highway authorities, it has been found that the steel beams which were supporting the bridge had rusted in several places and there was great danger of the bridge collapsing if any heavy traffic went over it, so the bridge was closed.

However, Reginald J. Sootheran supervisor, has received a communication from Harry C. Craig, that he is making every effort to find the steel shapes necessary for the repair of the bridge and it will be repaired and reopened as soon as the material is available.

Price of July Milk Estimated at $4.90

A uniform price to dairymen of $4.90 per hundredweight for their July deliveries to pool-approved plants in the New York milkshed is forecast by Dr. A. J. Pollard, acting market administrator of the New York metropolitan milk marketing area.

At the same time he estimated that the producer butterfat differential for July would be 7.8 cents for each tenth of a pound of fat above or below the 3.5 per cent standard.

The price forecast, Dr. Pollard said, is based on an estimated production for the month of 550 million pounds. This would mean an average of 392 pounds a day by the estimated 45,300 producers in the milkshed.
