In spite of recent rains, the soil around evergreens on home grounds is still quite dry, and therefore should be thoroughly soaked for a depth of 18 inches or more during the next week or ten days, according to Dr. Ray R. Hirt, head of the department of forest botany at Syracuse University. Watering can be done up to the time the ground freezes.

Those who think it all right to tell white lies—very often grow color-blind.

TO REMIND YOU THAT
