Andover Agent Hox Exposed—Let Us Tell You the Man who Cut the Block.

The following letter appears in the Chicago Tribune:

TOWN EDISON OF THE CHICAGO TERRITORIES.—The statement made in the "Chicago Tribune" of yesterday evening, that the "Chicago Tribune" was instrumental in Chicago's loss of one of Mr. Volk's workers and myself cut it out of a block of gypsum, in a barn near Lincoln park, during the months of July, August, September and October, in 1868. George Hull, one of the directors of the gypsum, made an arrangement with Mr. Volk, who was then working for Volk, and myself, to cut out a statue, and he agreed to pay us either \$100 or to allow us a share in the money derived from exhibiting it after being dug from the earth. We concluded to take the cash, but he has never paid us—He received \$40 but I did not get even a penny. He has now got out of the part of the agreement. I do not think it right for me to remain quiet any longer, but think the aviators should be exposed. When Hull came to us he said he had a block of gypsum, which he had obtained from Tom Dodge, Iowa, and that it was in a barn near the place. He and myself took our tools to the place, and found it, whereupon we had an opportunity to work two days in a week, and on Sundays. We had a model about three feet long. Beer was supplied, and there was no necessity for us leaving place while at work for a drink. The gypsum was well prepared, and was furnished by a man named Morris, who was a person interested in the gypsum. It was about eleven feet in length, four feet wide by three thick, and weighed nicely. I did not calculate its weight, but it was about 1000 lbs. The figure was pronounced completed in the latter part of October. Hull was anxious to have the work progressed. His hand had been seared on the hand and a band on the shin. Hull did not like this when he saw it, and said he would see about it. When he came the next time, he told us that he had consulted with a geologist, and was advised that he would not perish. So he ordered it to be clipped off, and we shared the gypsum. Several needles were tried to make the figure look odd, and at last one was invented. Quite a number of needles were placed in lead, with their points protruding, and the figure was pricked over with this. The day was occupied in this work, as the hands were cracked, so some which had to be offered by this slow process of pricking. Some vitriol, sulphur acid and English ink were next procured and rubbed on, which gave the antiquated look required. Hull thought at first it would be best to put on a skin cover, but concluded it had better be done as it was. The object of the gypsum was to be buried might be different. He was undecided where to bury it at first, and suggested Mexico. I told him I thought that would not be a good place, but finally concluded not to take it there, as the distance was so great. A box was obtained of a man who was making boxes down on North Clark street, just south of Adams to the old city cemetery. How to get the figure into the box puzzled Hull; but we hit upon a plan which was successful. A derrick was erected, bands were placed beneath the head, legs and body, and when raised to a sufficient elevation the box was shoved underneath, and hoisted up in it in a moment. During the course of the next week a truck was engrossed, and the box taken to the Michigan depot. It went over that road, so I was told, and was buried, how, or by whom, I do not know, on Newell's farm. Hull at once proposed that we should insert in the box a note, the purport of which was to be taken off, leaving the thickness of the body six inches less than it should have been. Hull was in Chicago about two weeks ago, and told us that he had and his interest in the figure were transferred to Sells and I wrote to him about it. It is well known that Newell, another interested party had the notes and hid them away with them. We wrote to Hull and asked him why he had deceived us, and have not yet received an answer. The beams of which we made the derrick are in the yard near the barn, and the derrick is still standing. It is owned by Hull, or the parties now in possession of the plant, deny the truth of what I say. Sells and myself are willing to make affidavit that the facts given are true. Addvisors of other persons who are engaged in similar circumstances connected with the building of statues, be preserved, and the great project to be what it is, as every intelligent person knows a humbug and a swindle.

Respectfully,
F. MÖRMAN,
Number 140 North Water Street,
Chicago, February 10, 1870.

Wellsville Insurance Agency.

FIRE! FIRE!! FIRE!

A few dollars will insure your dwelling as safe as hundred dollars. The underwritten represents that ever before to this particular agent, we have not had cause for any establishment in New York.

North American of Phila. \$2,500,000

The trade supplied at a liberal discount.

Remember the place, Sharp's old stand, 127 Main St.

J. D. BLACK, Agent for the Ratner,

—O—O—

WHY

Is that Trade at the Regulators increases every year?

BECAUSE

Simmons sells the best Goods, keeps the largest stock and buys all his goods for prompt Cash.

WHY

Do customers after buying once at Simmon's continue as steady customers?

BECAUSE

They always get good goods, have a large assortment to select from, and save a nice per cent.

WHY

Can Simmons afford to undersell, as it is universally acknowledged that he always has and always will?

Because

First, he knows how to buy Goods; he buys in large quantities; he pays no rent; he works himself and lives at home.

WHY

Is Simmons Flour and Feed Depot acknowledged by all that use his Flour to be the place to buy the best in town?

Because

He buys from Headquarters, has the entire sale from the best Michigan and Ohio Mills where they use the best wheat and have all the facilities for manufacturing the best Flour.

WHY

Is Simmons' Wholesale Grocery the best place for Merchants to buy Goods this side of New York?

Because

Simmons has the largest Wholesale Stock, and does not have to make profits to pay rents and other expenses, as his other business pays his way.

Special Notice!

J. SHAUT,

Has removed his Clothing Establishment at the corner of Main and Church Streets.

Where to may be found during all business hours to cut and make up anything in cloth or silk.

Juvenile Dress to a Full Military Uniform.

Subject to Remodel by experienced young ones.

As it requires a good workman to make a White out of a Bad Cut Coat, and not one that never abides one.

THE SUBSCRIBER CAN GET A COAT FROM A

YARD OF CLOTH Large enough for any Boy or Small enough for any Man.

By arrangement he can furnish any garment ordered. Also Mr. Sharp will attend to the wants of the Little folks at her Residence. All work done with neatness and dispatch.

Wanted An apprentice Girl who wishes to learn the Trade, and have a home for one year.

New York. Fashionably dressed and all cutting and making done in style.

MRS. WHEELERS CONFECTIONERY

It is here respectfully and sincerely, but I am afraid, to let you know up your old dress, and make it fit you again.

This is the method of doing it, and it is the only method of doing it.

It is the only method of doing it.
