Mr. and Mrs. Herbert Burdick of Rochester were week-end guests of Andover relatives.

Mrs. T. R. Bassett of Albany is visiting at the home of her son, Mr. and Mrs. Earl Bassett.

Frank O'Leary of Sugar Grove O., is in Andover this week looking after his mother's property on Pingrey Hill which was badly damaged by the cyclone.

HEALTH FOR ALL

This column is sponsored, in the interest of better health, by the Allegany Health & Tuberculosis Association, 44 Schuyler St., Belmont, N. Y.

Beating the Heat

If the heat doesn't bother you, you may find it hard to understand those who feel and look miserable during the summer months and especially during an intense heat wave.

There are peole who "feel the heat" more than others, and suffer from it no matter how they try to keep cool. But many of us could be more comfortable during the stifling days with a little more attention to "summer health" rules.

Our eating habits these days can do much to restore energy as well as comfort. Everybody needs a well balanced diet no matter what the season. But heavy meals are difficult to digest in hot weather. More fruits and vegetables can be included in meals for hot days. They are easy to digest and are also rich in the vitamins and minerals necessary to well-being.

Perspiration is the body's cooling system, and since the body loses more moisture in hot and humid weather, it is wise to drink plenty of water throughout the day to replace the liquid. Fruit juices also help replace the lost moisture in the body and nourish it at the same time.

Frequent bathing is more important in the summer than at any other time. Extra baths not only keep the skin clean, but also remove the wastes that cause unpleasant orders and eliminate the dirt that clings to the skin in summer and makes it vulnerable to infection.

Loose, light clothing is the best type for summer months. The body "cools off" as the perspiration evaporates on the surface of the skin. Heavy or tight clothing hinders this evaporation.

Everyone should suit his own summer exercise to his particular health and strength. But no one should exercise strenuously in the hottest part of the day or around mealtime. Physical exercise in moderation, out of the direct rays of the sun, is the safer rule.

Sufficient amounts of restful sleep make the hot days more bearable. Many people find trouble sleeping on hot nights, but keeping regular bedtime hours in the summer usually helps.

Those who have reason to doubt their physical stamina—children who have had rheumatic fever, adults who have had serious illness, for example—do well to check with their doctors before indulging in summer sports.

Rate of Freezing Foods Studied

Rapid freezing of fruits, vegetables, and meats is not essential to high quality and good keeping of the frozen product, according to findings by food scientists at the Experiment Station at Geneva.

Extensive comparisons of rapid freezing such as practiced by commercial processors with the slower rate of freezing encountered in home freezing cabinets have shown no important differences in the physical characteristics of the products nor in their flavor, color, nutritive value or keeping qualities after six months storage at zero Fahrenheit.

"Certain precautions are necessary, however, to avoid excessively slow freezing, which might permit microorganisms to develop and result in an unsatisfactory product," warn the Station scientists.

"In applying these findnigs to home freezing cabinets the housewife must take into account that these cabinets do not freeze foods rapidly in the commercial sense and therefore should not be overloaded with packages of unfrozen foods.

"Not more than 25 pint or pound packages of unfrozen food should be placed in a home unit of 20 cubic foot capacity at one time. Also, these packages should be placed so that each one comes in contact with the bottom or side of the cabinet and with an air space between them. Unfrozen packages should not be placed on top of or against frozen packages. Better yet, when a large number of packages are to be frozen at one time, have them frozen in a commercial locker plant, then store them in the home cabinet. Once freezing is completed, packages can be stacked together tightly in the freezing storage compartment."

Jealousy

"Say, Tubby, why did the foreman dock you yesterday?"

"Well, you know, a foreman is the fellow who stands around and watches his men work."

"Yes, I know that; but what's that got to do with your getting docked?"

"Why, he got jealous of me. People thought I was the foreman."

Some persons can speak, see, and hear while sleep-walking, according to the Encyclopaedia Brittanica.

It's wise to fill your coal bin NOW!

- BETTER CHOICE OF COAL
- SAVE MONEY AT LOWER SUMMER PRICES
- BE SURE OF HEAT NEXT WINTER

Folks who put in their coal *now* will be glad they did so when a northeaster howls around the house next winter!

Besides, when you buy now you get a *choice* of the coal you want. You buy it at lower prices because of summer discounts. Coal is safe to store for months.

Coal in your bin now is like money in the bank—you know you're safe and it's there when you need it!

We suggest you call your rail coal dealer right away and ask him to fill up your coal bin. You have every advantage on your side when you do it now!

CHURCH SERVICES

ST. ANDREW'S EPISCOPAL MISSION
Dr. Stephen Clark, Lay Reader

10:00 a. m., Sunday, Archdeacon Charles B. Persell will celebrate Holy Communion. A farewell picnic in honor of Archdeacon Persell will be held directly after the morning service.

BAPTIST

10:30 a. m., Worship service. Sermon by Don Sanford.
11:30 a. m., Sunday School.
We are glad to announce that Rev. Tweedy has accepted a call and will become our pastor September 1st.

CHRISTIAN & MISSIONARY ALLIANCE
Edward D. Poser, Pastor

Revival meetings begin this Sunday. Great evangelists are moving America toward God. Come and hear Evangelist Rev. H. P. Young at 11:30 a. m., or 7:30 p. m. this Sunday.
10 a. m., Morning prayer meeting.
11:30 a. m., Sunday School.
11:30 a. m., Rev. H. P. Young.
6:30 p. m., Young People's meeting.
7:30 p. m., Rev. H. P. Young.
Every night, 7:30 Monday through Friday the meetings will be held, including special music.
Invite your friends and bring the whole family.

METHODIST
Chester W. Whitt, Minister

Services for Sunday, Aug. 13.
10:30 a. m. Morning worship. The Rev. Merlyn Vantran, pastor of the Scio Methodist church will speak on the subject, "Who Is This?" Mr. Vantran is a senior at Colgate-Rochester Divinity School.
11:30 a. m. Sunday school.
A very important meeting of the church Board of Education will be held at the parsonage on Monday evening, August 14, at 8 o'clock. All members are urged to be present.

SEVENTH DAY BAPTIST

Services Saturday afternoon at 2:30. Don Sanford, supply pastor in charge.
Sabbath School at 3:30. Clifford Burdick, superintendent.

Control Woody Shrubs In Pastures

Woody shrubs in pastures, such as wild apple, thornapple, and tag alder, need no longer be a menace to good pasturage, according to Prof. J. A. Cope, extension forester in the conservation department at Cornell.

This is due to the advances made in "dendrocides", he says. With woody growth under three feet, death is achieved cheaply and effectively by a summer time spray of the foliage. Taller trees can be cut at the ground level and the stumps painted with the same solution.

The Cornell Tree Killing Tool, invented some years ago by Cope is effective in killing small trees like thornapple and wild apple. The tool can also be used in the farm woodlot to control vigorous weeds such as ironwood and beach suckers.

He recommended the tapping machine used by maple sirup makers in trees over 12 inches. Three to four-inch holes should be drilled tangentially in the sapwood at ten to twelve inch intervals around the trunk.

Agricultural News

Ira Blixt, County Agent

C. R. "Bob" Martin, who has had twenty-two years of experience selling beef cattle at the Buffalo Terminal Market, is now working with farmers on a statewide marketing program, according to an announcement today by Raymond V. Hemming, general manager of Empire Livestock Marketing Cooperative. Before coming with the Producers Cooperative Commission Association in Buffalo twenty-two years ago, Bob Martin worked with Producers Cooperatives on the St. Louis and Kansas City Terminal Markets.

Hemming terms Bob Martin's appointment as supervisor of the beef cattle operations for Producers Cooperative Commission Association and Empire Livestock Marketing Cooperative "a forward step in developing better marketing outlets for beef type steers and heifers produced in New York." Martin will work with beef cattle producers to procure feeder cattle as well as help them develop better markets for their steers and heifers.

The appointment of Bob Martin, who is generally recognized as "the top man in the Northeast when it comes to knowledge of values of beef cattle," is the culmination of a meeting of beef cattle producers at last spring's Cornell Farm and Home Week. During that meeting, farmers and marketing specialists criticized the marketing situation for beef-type steers and heifers. As a result, a marketing committee of fourteen leading beef producers was named to take action to improve the marketing of top quality beef in the state.

This Beef Producers' Marketing Committee is already undertaking a comprehensive survey of beef cattle producers through the cooperation of county agricultural agents to determine the number and location of beef animals in the state, and when they will be ready to market. Information gained from this survey will be used to establish marketing procedures which will develop dependable outlets for New York State produced cattle at going market prices. In the past, beef type animals in the state have gone to market so irregularly and in such small numbers that quality could not be rewarded by packers who need a steady supply of beef animals. Martins' job will be to coordinate these marketings so that the producer and packer can benefit from orderly marketing.

Be Comfortable When Ironing

"Lady, be seated"—that's a smart thing to say to yourself when it's time to do the family ironing.

You can save up to a fourth of your energy by sitting down to do this job, say home management specialists at Cornell's College of Home Economics. And energy saved means more energy to spend on such activities as family games in the evening.

To make a comfortable arrangement for sitting down to iron, study the equipment you have. You may be able to sit on a high stool and iron comfortably at the board you've been using if it's a good, sturdy board and one you hate to discard. The stool should have a back rest, though, or you may find yourself with a backache. Another possibility is to buy or have built a special, low board for sit-down ironing. Try various styles and heights before deciding on the board and make sure it is just right for you.

Proof

Mother: "Which one of you children ate the grapes I had in the refrigerator? There's no use denying it, because I saw the skins and seeds on the floor."

Janey: "It wasn't me, mother, 'cause I ate skins, seeds and all."
