Our Farm and Kitchen.

FEEDING TOO MUCH CORN.—A correspondent of an eastern paper, referring to the fact that pork is sometimes found of a yellow color, says that it results from the too free use of corn for food. He says that about the time hogs are finished off, farmers often make a mistake in feeding too much unmixed grain. The result is bad digestion and yellow fat. Mixed food should be given to the last—roots or shine, apples, with corn. As a rule, can get them to eat more grain, take on more flesh than by a diet of rich food only.

The largest pig in England, if not the world, is now the property of Lloyd, of Bredon, Worcestershire, who purchased it of a neighbor, when two months old, for less than five dollars. This wonderful animal is now twenty-two months old, and measures nine and one-half feet from the end of the nose to the tip of the tail, five feet around the body, and stands four feet high.

A good garden is an appendage to a farm that no farmer can afford to be without; and in looking forward to the next summer-time, we suggest that each tiller of the soil plan to have some spot where a half hour at even[ing] spent among long rows of luxuriant vegetable growths shall give him a joy rarely found elsewhere.

TAX ON FARMERS'—Commissioner Delano of the Revenue Department has rendered a decision as to the liability of a tax on Farmers, substantially that if a farmer sells his products merely as an incident of his calling he is not subject to a tax. But if he engages as a huxster, making a business of selling his products, he ceases to be regarded as a farmer, and becomes a broker, in which capacity he is subject to taxation.

Some of the Canada farmers have struck a good idea; they have formed themselves into seed clubs, each one to raise choice seed of some kind for the rest of the members.

A correspondent of the Rural American produces many facts in support of the theory that rust is a disease permanently fixed in some varieties of wheat, as the consumption is in some families. He claims the Tappahannock with the desired varieties.

TO PREVENT COWS FROM HOLDING UP MILK.—Various means have been devised by which to cure cows of the ruinous and vexatious habit of holding up milk. One of the latest recommended is prescribed by a correspondent of the Cincinnati Gazette. His advice is to milk the forward teats perfectly dry, then change to the two hind teats, and milk very fast until the milk is entirely drawn. This will produce the desired effect. He does not recommend any instruments as to the philosophy of the process, but adds as to its efficiency, the statement that he has tried it on a cow possessing the obstinacy in this line, and with perfect success.—Another writer recommends as a better way, that two persons, each using fifteen or twenty pounds of force, tied together and hung across the cow's back while milking. He says the remedy will work like a charm, that he has tried it, and knows whereof he affirms.

TO PREVENT COWS KICKING.—The Southern Planter says:—Take a small chain, put it round the cow just back of the fore legs, and twist it. Every time she kicks add a turn or two with a stick; she will soon cease to kick, and after a few trials will not need it at all. We consider it a good thing and so far as I have heard, it is universally successful.

FOUNDER IN HORSES.—Take a large tablespoonful of pulverized alum, and a tablespoonful of pulverized saltpetre mixed. Moisten the dose and administer it by pulling out the tongue and placing the spoon back in the mouth as far as possible. Feed carefully and exercise gently every day. Repeat the dose every other day for seven days.

SCRATCHES IN HORSES.—The following ointment proves to be a sure cure: Take 4 oz. ointment of lard, 1-2 oz. of turpentine, 1-2 oz. oil of origanum, 1-2 oz. tincture of iodine, 1 1-2 pound [illegible]. Mix all well together. Wash the foot clean with castile soap and soft water and apply the ointment after the foot becomes dry. Once a day will be sufficient to apply the ointment.

MANGE IN HORSES.—All the many parts of the horse's body should be washed with an equal mixture of soft soap and ointment, and in twenty four hours should be washed off with warm water, and the horse carefully dried and blanketed afterwards. If one application is not sufficient, a second one should be made; but eight or ten days should intervene between each application.

When you perceive that your horses are inclined to rub their noses and tails feed them a little oil meal, say [illegible] at the same time [illegible] warm [illegible]

Furniture !!

W. H. COATES & SON,
WELLSVILLE, N. Y.,

Offer inducements to any one who will
CALL AT THEIR STORE
TO BUY THEIR
Household Furniture

They manufacture largely and sell LOW. They keep a very large stock to select from, and warrant very thing as recommended.

BURIAL CASES,
Caskets and Coffins

Full styles and kinds on hand at all times. All orders in this department will receive prompt attention. 31-39

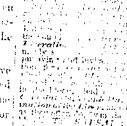
FOR PURIFYING THE BLOOD.

They were publicly exhibited, and in every case a radical cure was the result. In short, it every one who has been long afflicted with any of the scrofulous diseases that are caused by impure blood, will give this remedy a fair trial, the result will be a perfect cure.

Ayer's Cathartic Pills,
For all the purposes of a Laxative Medicine.



Old Reliable!

HATS, CAPS, FURS, BOOTS AND SHOES.

TRUNKS, VALISES, ROBES, &c.

The old reliable establishment of

I. E. SHARP, HORNELLSVILLE

Have one of the largest stocks ever produced in Western New York,

Our stock of Boots and Shoes is larger than ever before. WORK GOT UP TO ORDER on short notice.

We call special attention to our extensive stock of

BUFFALO ROBES.

The trade supplied at a liberal discount.
Remember the place, Sharp's old stand, 127 Main St.
R. J. BEST, Agent for the Estate.

WHY

is it that Trade at the Regulators increases every year?

BECAUSE

Simmons sells the best Goods, keeps the largest stock and buys all his goods for prompt Cash.

WHY

do customers after buying once at Simmon's continue as steady customers?

BECAUSE

they always get good goods, have a large assortment to select from, and save a nice per cent.

WHY

Can Simmon's afford to undersell, as it is universally acknowledged that he always has and always will?

Because

First, he knows how to buy Goods: he buys in large quantities; he pays no rents; he works himself and lives at home.

WHY

is Simmons Flour and Feed Depot acknowledged by all that use his Flour to be the place to buy the best in town?

Because

Simmons Headquarters has the choicest cuts from the best Michigan and Ohio Mills where they use the best wheat and have all the facilities for manufacturing the best Flour.

WHY

is Simmon's Wholesale Grocery the best place for Merchants to buy Goods outside of New York?

Because

our house has the largest Wholesale Stock, and does not have to make large [illegible] expenses, as the other business pays his way.

Special Notice!

J. SHAUT,

Has just added Cutting Establishment to the Department of

SUITS NOTES.

Juvenile Dress to a
Full Military Uniform

Subject to no Remodels by inexperienced young ones.

As it requires a good workman to make a Uniform coat, I do not Cut Coats, and just one that never made one.

THE STEP CUBBER CAN'T CUT A COAT FROM A

YARD OF CLOTH

Large enough for any Boy or Small enough for any Man.

By strict attention to the cutting may guarantee a perfect fit. Also Ladies' Shaut will attend to the wants of the Ladies at her residence. All work done with neatness and dispatch.

Wanted

An apprentice Girl who wishes to learn the Trade, and have a home for one year.

New York Fashions duly received and all cutting and making done in style.

J. SHAUT.

ANDOVER, 1868.
