Shrine Circus Next Week in Buffalo

The Shrine Circus, largest indoor big top in the world, has been almost completely revised for its performances at Memorial Auditorium, Buffalo, March 26, through March 31, according to Justice George T. Vandermeulen of Supreme Court, Illustrious Potentate of Ismailia Temple.

The 17th annual show is presented in order to raise funds for charitable purposes. It also provides an opportunity for Shriners to entertain more than 25,000 underprivileged children, hospitalized veterans and orphans.

Justice Vandermeulen and Willis L. Jackson, chairman of the circus committee, said the big top "is 90 per cent new and features 40 all-star thrillers in human acts." Performances will be given each afternoon and evening.

Library News

"Life of An American Workman" is the informal down to earth story of Walter Chrysler and his life as an American workman. It's a tale about a boy in love with machines and machinery.

Starting as a 10 cent an-hour sweeper in a railroad shop he rose to a million a year executive. You will enjoy this story of a 17 year old boy who made his own set of precision tools when he was working as a railroad mechanic. Then came his later experience in making automobiles and his ultimate great success. This book has a message for all who believe in America.

"Foxfire" by Anya Seton: Amanda Lawrence was a charming sheltered girl brought up in New York. She met and married Johnathan Dartland who had a fine education as a mining engineer. He was one-fourth Apache and loved the vastness of the Arizona desert. The story tells of their life in a shack in a grim mining town; of Amanda's struggle to cope with the hardships; of intrigue and conspiracy and of their search for a lost treasure in a mysterious Indian cliff dwelling. Their hope of gaining wealth was as false as fox fire, the luminous glow on the desert, but the enchantment of the wilderness brought peace and understanding.

March Milk Price Is Forecast At $4.40

New York, Mar. 21—A uniform price of $4.40 per hundred will be paid to dairy farmers for their March deliveries to pool-approved plants in the New York milkshed, according to a forecast today by Dr. C. J. Blanford, Market Administrator.

He estimated at the same time that the producer butterfat differential for March would be 5.8 cents for each tenth of a pound of fat above or below the 3.5 standard.

Dr. Blanford said the forecast is based on a production estimate of 596 million pounds for the month. This would mean an average daily output of 385 pounds by each of the estimated 49,999 producers in the milkshed.

Frozen fish should not be soaked in water as this causes a loss in flavorful juices.
