Livestock Showmanship Day At Alfred Saturday

The Horn and Hoof Club of the New York State Agricultural and Technical Institute at Alfred will sponsor a Showmanship Day on Saturday, April 28, at the school's state farm to give students an opportunity to obtain experience in fitting and showing cattle and swine.

Each student will have the opportunity to fit and show the type of livestock he wishes. In the dairy cattle class, Jerseys, Holsteins, and Ayrshires will be shown. Hereford and Angus beef cattle will also be shown. Swine will make their appearance this year for the first time on the showmanship program.

Two months ago students drew lots for their animals so that fitting procedures could be started. The steps in fitting include grooming, trimming the hoofs, combing and brushing the hair and polishing the horns.

The farm animals will be brought in by classes composed of the different breeds. Winners of the various classes will then compete to select the grand champion hoof and shower.

The day's program will be climaxed by a banquet to be held at the Fa[illegible] House in Wellsville.

Library News

Round the Bend, by Nevil Shute is an absorbing story. Some critics say that this is the best of the Shute books. Mr. Shute himself (whose real name is N. S. Norway) says that Round the Bend is an odd book, but one which he wanted to write. Tom Cutler and Connie Shaklin, a pleasant, yellow skinned young fellow, worked side by side as aviation mechanics in England. Connie was the son of a Chinese father and a Russian mother. The only odd thing about Connie was that he liked to go to church—any church.

Thirteen years later, Connie and Tom meet again in Asia. Tom had built up a solid business in charter planes, operating in Persia, Indo-China and India. Connie joined him as an expert mechanic. He gathered around him workmen of every faith for prayers. He preached that care of aeroplanes demanded men of pure and holy life. It wasn't long before he was known all through southern Asia as the workman's teacher. This then, is the story of modern Asiatic saint. The novelty of the theme holds your interest.

A Breath of Air, by Rumer Godden is a lively and charming story. It might be called a modern version of Shakespear's "Tempest."

A prominent play wright and his mechanic run out of gas and are forced to ditch their plane. They paddle in their rubber boat until they reach a tropical island. The island is owned by an eccentric Scottish Earl. He and his beautiful daughter, Charis, have lived here for many years. The natives are healthy and content and under the leadership of the white man they have made a tropical paradise. Of course to make the story complete the play wright and the beautiful Charis fall in love.

If the farmer gave away the wool in a $50 suit of men's clothing, the suit would still cost $40.50.
