Notice

Dependent parents of deceased World War II servicemen are urged to get in touch with the Social Security Administration in a statement issued by Roy Grove, Manager of the Olean field office.

A dependent parent is one who was receiving half or more of his or her support from the son or daughter at the time of the veteran's death. Benefit payments start when the parent is 65, but proof of dependency must be filed within two years of the son's or daughter's death. Time for filing proof of dependency was extended to June 30, 1951. If a dependent parent fails to file proof of dependency by June 30, he cannot receive payments later as a dependent parent.

For further information write the Social Security Administration, 139 North First st., Olean.

May Milk Price Announced at $3.93.

A uniform price of $3.93 for May deliveries in the New York milkshed is announcer by Dr. C. J. Blanford. The uniform price in April was $4.14 and in May a year ago was $3.28 per hundred.

The producer butterfat differential for May was announced at 6.4 cents for each tenth of a pound of fat above or below the 3.5 percent standard.

Milk production in May Dr. Blanford reported, was the heaviest for any month since the federal-state marketing orders were established in 1938. Totalling 774,501,805 pounds, it bettered by 11,306,803 pounds, the previous high set in the same month a year ago.

Total farm value of last month's production is $31,025,512.98.

June Milk Estimated at $3.88

New York, June 20—A uniform price of $3.88 per hundredweight will be paid to dairy farmers for their June deliveries to pool-approved plants in the New York milkshed, according to a forcast released today by Dr. C. J. Blandford, Market Administrator of the New York metropolitan milk marketing area.

He estimated at the same time that the producer butterfat differential for June would be 6.6 cents for each tenth of a pound of fat above or below the 3.5 percent standard.

Dr. Blanford said the forecast is based on a production estimate of 770 million pounds for the month. This would mean an average daily output of 512 pounds by each of the estimated 50,100 producers in the milkshed.

Peach and Vegetable Crops are Heavy

Albany, June 18—The peach, strawberry and sour cherry crops in New York state this year are expected to be heavier than in 1950.

Vegetable crops also have "developed well" a state agriculture bulletin states.

The harvest of apples will be "excellent." barring unfavorable weather, the report said. It also predicted that pears and sweet cherries would be less plentiful than in 1950.

Hay and pasture crops were a little below average, as of June 1, but now improved with the help of June rains.

The survey estimated the winter wheat crop at 12,204,000 bushels, about two per cent under the 1950 crop, but 47 per cent above the 1940-49 average.
