Furniture Arrangement

Rearranging the furniture will sometimes lift your spirits as much as buying a new hat. And you'll get even more of a lift if you really improve the looks of the room.

Specialists at the New York State College of Home Economics at Cornell say that the color and texture of the background against which you place your furniture is important for pleasing results. If you have light colored walls and darker draperies or both light and dark walls in the same room, place your furniture against contrasting backgrounds. A graceful, curved traditional piece shows to good advantage against a plain background. The simple lines of an angular modern piece look well against figured wallpaper or brightly printed draperies.

If you have light wood and dark furniture in the same room, group either the light pieces together or the dark pieces together for a focal point. It's a good idea not to have an equal amount of light and dark furniture in a room but to let one of the woods predominate.

Hair Styles for Little Girls

"Mommie, I want to wear my hair like Jane's." And why shouldn't your youngster copy the hair style of her playmate if she feels more comfortable that way? Comfort and simplicity are the keynotes to good hair-dos for children, say specialists.

Hair should be fashioned to stay out of the eyes of the little miss. For attractiveness it should be shaped to her head. Bangs and braids are always style-right and usually easy to manage. Straight hair with the proper shaping and training may often be coaxed to curl just enough for a little girl. But straight-straight hair styles too may be as becoming as fluffy curls. Permanents should be used on children only as a last resort and never to satisfy mother's vanity.

To Keep the Juice in Pies

Those juicy fruit pies that your family so enjoys can be a problem when the juice leaks out during pie baking. Home economists suggest these solutions:

Shape the crust into a high fluted wall to keep the bubbling juice from dripping over the edge. Cut slits in the top crust large enough to allow plenty of steam to escape. It's the steam, held inside the pie, that forces out the juice.

Shirring

How many rows of shirring to use on that new summer dress will depend on the places to be shirred. Does your pattern call for shirring at the front shoulder, the waistline of the blouse, of the skirt?

For the front shoulder five or seven rows are usually used, say home economists. For fullness at the waistline two rows are enough; for front fullness in a skirt you may use anywhere from 10 to 15 rows. To be attractive these rows of stitching must be straight and evenly spaced. The wide presser foot on your sewing machine makes a good gauge, but you'll probably achieve better accuracy if you measure and mark your rows with tailor's chalk or basting before you stitch them.
