Andover Union School.

The spring term of this school opened April 17th, and there are 157 pupils registered at the present time, distributed in the different departments as follows: Primary—59; Intermediate—49; Senior—49.

The attendance has been quite regular with a few exceptions. To-day (Monday) every pupil in the Senior department has been present. A few have been irregular in their attendance, and the results of their examinations are proportionately low and unsatisfactory. A moment's reflection will convince any one that this must necessarily be the result in the great majority of cases. Two pupils of equal talents can accomplish a given amount of labor in the same time, and with the same industry; but, if one is deprived of one twelfth or one-sixth of his time, a difference of from 8 1/2 to 16 2/3 per cent. in the amount of work accomplished will almost invariably be the result. The father who imagines that his child can accomplish as much literary labor in one day as other children, equally intelligent, can in two, certainly manifests a high appreciation of his child's talents, while he makes a very poor display of his own.

The more sensible way is to act upon the supposition that all children are human, and have human abilities and capacities; and that whatever apparent differences may be discernible in them, are mostly attributable to the accidents of birth and education.

They are, after all, very much alike, and require much the same treatment. All need the constant watch-care of parents and teachers. All need to be stimulated and encouraged in their studies.

The lack of encouragement

is the chief cause of the

poor showing of the school.

If you wish a nice pair of summer shawls, look at them before buying elsewhere.

If you wish a nice Paisley shawl, Irish poplin or silk dress pattern it will pay you to go to C. H. & E. E. Simons, Wellsville, N. Y.

Merchants should go to G. H. Simons' Register, Wellsville, N. Y., and be supplied at New York jobbing prices.

In speaking of the Erie railway and its superior air accommodations, the Rochester Union says: "The cars of the Erie railway are excellent, the sleeping and drawing-room cars being of a superior quality. The trains make good time and are regular in their arrivals and departures. Those who take the 4 p. m. train arrive in New York the next morning at 7 o'clock. In the running of trains on this route the management is excellent."

The New York Standard of April 1st, in mentioning the arena performances given in the new show, calls attention to the character of the audience who have visited it in these words:

"A glances at the crowd, the through and all the passages, discovered the peculiar mark Mr. Barnum's show as far different from any common circus. The men, women, and children were those whose faces were familiar in making up the Sunday congregations who listen to wisdom from Beecher, Gallaudet, and Talmadge. Brooklyn's best citizens, most refined ladies, and most strictly trained children made up the mass of the audience of the school—seven of its members having reached 100 per cent., the other three obtaining, respectively, 95, 98, and 99 1/2 per cent."

ACCIDENT AT THE DEPOT.—The afternoon train from Mt. Morris on Friday last had some switching to do at this station, and while coupling cars a severe accident occurred to one of the brakemen. He was between the cars holding a very short coupling link, and failing to remove his hand in time the result was a very badly smashed hand. At first it was thought that he would lose it entirely, but it is now thought that it can be saved. The man's name is William Howe, and he resides in Mt. Morris. He is a steady, hard working man, and we regret that he has met with such ill fortune. With so many accidents of this kind occurring, we are surprised that there has not some means been brought forward to do away with the necessity of holding the coupling link with the hand.—*Livingston Republican.*
