We hear it reported that Shaut & Brown are to open a new street near the cheese factory, and will, in the spring, build six tenant houses upon it. This is just what the town needs—a few men who will put up a number of good tenant houses.

At the special town meeting in Arcade, the town was bonded to buy the right of way through the town for the railroad from Arcade to Attica. There was a majority of 66 votes and $99,000 taxable property, in favor of bonding. —*Warsaw News Yorker.*

A lady witness said in a St. Louis court, "Give me the least grain of truth for a basis, and I can ruin the character of any woman in the world." Let gossips ponder this remark, and they will be brought to a realization of its truth.

The Buffalo Bar, in view of the retirement of Judge Marvin from the Beach, have written a letter to him requesting that he will permit a portrait to be taken by an artist employed by them, and to be placed in the Supreme Court room, in that city. The Judge, in reply, signifies his consent.

PROMPT.—Hanks & Son of Wellsville, Insurance Agents, with whom Mr. Robinson had his property insured, settled up and paid his claims in full on Saturday last, just five days after the fire. No agency has a better reputation as to promptness than the firm above alluded to. If you want your property insured give them a call.

A GOOD APPOINTMENT.—Maj. W. H. Withey was appointed one day last week by the Canal Board, as Superintendent of section 3, of the Genesee Valley Canal. The Board could have done no better. Mr. Withey is a man who will conduct the affairs under his supervision, honestly, and with credit to himself.

The Illustrated annual of Phrenology and Physiognomy, for 1872, by S. R. Wells, contains much interesting reading and useful information. It is illustrated with the heads of numerous great and small men, and of some women and idiots, showing in what respects they differ, and in which they agree. Address Samuel Wells, 389 Broadway, N. Y.

An action has been commenced in the U. S. Circuit Court against Brick Pomeroy, for breach of promise of marriage, by Miss Sadie E. Wilkinson, of New Haven, Ct. This lady claims $25,000 damages, for the reason that she has lost several opportunities to become a bride by reason of the breach of contract of the defendant.

Mark Twain's lecture has been very successful at the west. At Chicago he introduced a few new hits—bringing down the house with this: "A reporter has to lie a little, or they would discharge him. That is the only drawback to the profession. That is why I left it. [Laughter]. I am different from Washington; I have a higher and grander standard of principle.—Washington could not lie; I can lie, but I won't. [Prolonged laughter.]

FRIENDSHIP ITEMS.—Rev. Mr. Jackson, pastor of the Congregational Church, received $100 at a donation visit one evening last week.——Rev. Mr. Smith, of the M. E. Church, received $175; of this amount the Masons contributed $60.——Several brick stores are to be built there the coming season.——J. D. Kellogg, late Overseer of the County Poor House, has returned to Friendship.

There is no denying the fact that the party who can furnish best goods for least money, is entitled to the business. Upon this basis we invite a trial of our Teas in Canisters, and if not found desirable or as represented, you can return, and no charge made for that used in testing. We offer the following reasons in explanation:

1. Bought by most competent judges, and entirely upon merit.
2. Bought and sold for net cash only.
3. Canister desirable, its cost nominal.
4. Always full weight, and retains natural flavor and strength.
5. Our interest with the Consumer mutual, and as we establish the price and vouch for quality you are protected from extortion or imposition.
6. Owing to the very small profit afforded the Retailer, we give sale to but one party in each town, who accepts half the usual profit, with a view to greatly increased sales. Go to sign of Elk Horns. Sold only by Hunt & Burrows.

Fresh Oranges and Lemons at Benton & Crandall's.

Hunt & Burrows sell goods CHEAPER than those who *Pretend* to sell for Cash only.

We would call the attention of our readers to the advertisement of Burdick's Rotary Harrow, which will be found in another column.

The License act which has just passed the Legislature of Illinois is remarkably stringent. Its leading provisions are as follows:

1. No selling without license.
2. No license until the applicant shall have given a bond for $3,000, with two freeholders as sureties, that he will pay all damages which any one may suffer by reason of his selling.
3. Suit to be brought in behalf of the State against any seller of liquor whereby injury is inflicted—whatever sum may be recovered to be appropriated for the redress of such injury.

Hall's new Gallery, next to the Howell House, is now completed and in running order. It is the largest and best furnished gallery in this State, with a splendid store in front, and the reception room and gallery all on the ground floor. Mr Hall, being a superior artist, has gained the reputation of making the best pictures in Allegany county. His gallery is the nicest and best located in Wellsville; he makes all kinds of pictures of any size or shape; and for lower prices than any other Artist in the county; he has the best sky light in the State, and is making better pictures now than ever before; he has the largest stock of frames and All ums that ever was brought in to Wellsville; he has several new kinds of pictures; he has all new instruments, also three new position chairs; one of them is the wonder of the world, he changes or makes from it five different chairs, all of them finished with the best of velvet. Go to his gallery at once and see for yourself.

NOTICE.

For the next 30 days we will sell Furs at lower figures than any other house in town. We have a large stock, and they **Must be Sold.** Buffalo Robes and Horse Blankets are in the **same fix.** Don't fail to secure a bargain. J. J. HARMAN & SON.
Jan. 23d, 1872.

A BEAUTIFUL WOMAN.—The perceptive faculty of women is usually keener than the phrenological organ in men. Women know that beauty rather than genius is worshipped by the stronger sex. A man may talk of the latter to his lady love, but the keenness of the woman knows that he is thinking of the former. Women are fond of admiration; hence one of their longings is to be beautiful. The grand secret of female beauty is health, the power to eat, digest and assimilate a proper quantity of wholesome food. Take Vinegar Bitters. It will cleanse the stomach, tone the vital organs, give a perfect digestion, purify the blood, clear up the complexion and produce a state of mental and physical electricity, which gives symmetry of form, bright eyes, white skin, glossy hair and a genuine type of female loveliness, which no cosmetic can produce. o165d

DISSOLUTION.

NOTICE is hereby given that the late firm of Shaut & Brown is dissolved by mutual consent, and that the matters left unsettled will carry on the General Hardware business on its own account, at the building lately occupied by them, at Andover.

ANSON D. BROWN.

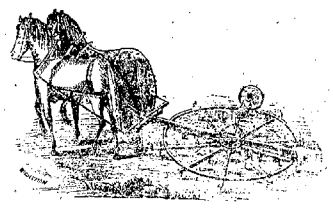
CHAMPION ROTARY HARROW.



"Time Saved is Money Made!"

Notices of the Press.

From the Independent, Fenton, (Mich.) August 9th, 1871.

Last Saturday, we had the pleasure of witnessing the operations of the above harrow by the side of the common square drag, on heavy clay soil, and must say it is all that is claimed.

It harrows the ground lengthwise as well as crosswise, and thereby pulverizes and levels the surface of the ground instead of leaving it in ridges, and ditcher for water to wash through.

It spreads manure, weeds and stubble, leaving them distributed over the field and not raked up in bunches. It will harrow around trees and stumps and make clean work without damaging or barking a tree or breaking the harrow. The importance of preparing the ground well to receive the seed to be sown, or planted, is something that all understand, and is oftener neglected for want of time than anything else. This implement saves time by doing as much work at once going over the ground as would be accomplished in going over it twice with a common square, or Scotch harrow, and leaves the surface in much better condition.

We think it the best harrow in use for the following reasons:

1st. The uniform draft, which will not cause soreness on the shoulders of the horse, which by the jerking of the common drag, on rough and stony ground.

2d. On account of the draft beam working on an axle, while turning around the work is performed equally by each horse, where is is done by one horse on the common drag, and also the driver and team are not in danger.

3d. We think this harrow going once over the surface will accomplish as much as any other harrow going twice over, as it thoroughly pulverizes, mixes and levels the soil.

4th. The rotary motion allows this implement to clear itself of anything that will clog harrow teeth and in doing so does not leave a trail, and will free itself from stumps or last rocks.

5th. No soils need be uncovered by its action, as the rotary motion can be changed.

6th. The teeth wear out all alike which does not require the process of sharpening.

7th. A person possessing one of these drags has the irons with which he can reconstruct one by the use of a few auger bits, a saw and wrench.

8th. By the use of this harrow in tilling, the crops of the country might be greatly increased.

August 15th, 1871.

Last Saturday we had an opportunity, together with other experienced farmers, of witnessing the operation of the Burdick Rotary Harrow, on the farm of F. Z. Fairbank, Esq., near Linden.

The land was, in all respects adapted for the Severe Trial of the rotary by the side of a good large harrow.

Such a trial was made.

The result was entirely satisfactory; showing, as we think, that your "eight reasons" why Burdick's Rotary Harrow" is the best, were all "correct."

The same opinion was expressed by all present, of whom as many as fifty were practical, appreciating farmers.

We like to see a good thing progress.

Yours respectfully

M. McCreery, Flint; H. Henley D. N. Roberts, A. Hopkins, David Brooks, T. S. Belden, Argentine; O. Gurney, F. H. Wright, J. Pratt, E. Larned, B. S. McCrasker, E. Wakeman, Fenten; J. Z. Fairbank, Linden.

Aug. 21st, 1871.

We are credibly informed that, the working of the Rotary Harrow at Grand Blanc, last Saturday, was an entire success; bringing down the farmers there about, in the way of orders for the Rotary Harrow so that the proprietors of the "right for several counties," have made arrangements for making them in this village at present and express their desire to make this their place of manufacture, if they could only be assured of the Michigan Midland R. R. reaching here and thus open a way of transport to rich agricultural districts, not now infested with good patent farm implements.

In the language of another, we would say "what" is our Railroad Spirit?

A trial of the above harrow will be made one mile south of Rose corners, next Saturday, at 2 o'clock P. M. on the farm of Lewis Beach.

(Milwaukee Sentinel, Oct. 9, 1871.)

THE CHAMPION ROTARY HARROW,

manufactured by W. J. Burdick & Co., Andover, N. Y., is exhibited here by Mr. Burdick, who is the inventor.—This harrow is on an improved and entirely new principle, which, by its revolving movement while in motion enables it to do three times more work than the ordinary harrow with the same labor, and at the same time leaves the soil in a better condition. As it revolves continually while in operation, nothing can clog it. It has an equal as a pulverizer and mixer of the soil, and at the same time covering the grain more evenly than is possible with any other harrow, it has the advantage of avoiding all dragging and cross dragging. This harrow comes here for introduction to our farmers, highly recommended by numerous testimonials. It has had a test trial at this Fair, and a first premium has been awarded for the two-horse and a like for the three-horse size. Arrangements are being made to manufacture these harrows either at Oshkosh or Fond du Lac.

Testimonials.

Doty's Corners, Steuben Co., N. Y. Sept. 10, 1870.

My Friend Burdick,—As you requested of me a statement respecting your Rotary Harrows I feel safe in saying that it surpasses anything I have seen as a pulverizer of the soil. I think it equal to the Cultivator and as light of draft as any thirty-tooth harrow that I ever used. I can safely recommend it to any lover of a good farm implement. Wishing you success I remain your friend and well-wisher,

George G. Babcock.

CANANDAIGUA, N.Y. Sept. 10th, 1870.

Mr. BURDICK.—As you request a statement of the working of your Patent Rotary Harrow, I do not hesitate in saying that is superior to any harrow that I ever saw in use; and it more than meets your recommend.—For preparing sod ground for planting, it cannot be excelled; and upon a side hill it will work as thorough as upon level ground. I have no doubt than it will soon become the principal harrow

D. H. Bennett.

DOTY'S CORNERS, Sept. 12th, 1870.

Mr. BURDICK.—I have used the Improved Rotary Harrow for two seasons, and find it the best pulverizer I ever used. It makes everything level, fill up the dead furrows, keeps itself clear from all roots, sods, stone and stubble, and covers all grain better than any I have used. I have used Mine is an 8 foot, 40 to th harrow, drafts as light as any large square harrow, and gives perfect satisfaction in every place. Elias Fritz'

WAUKESHA, Nov. 20th, 1870.

This is to certify that I have given Burdick's Rotary Harrow several trials and on different kinds of soil. It is so far ahead of any other harrow I ever saw or used, that I am satisfied it will pay the farmer to throw away the drag now in use, and buy Burdick's Rotary Harrow.

Samuel Thomas.

SENECA FALLS, Nov. 12, 1870.

This is to certify that I have given Burdick's Rotary Harrow a severe trial on corn stubble, and am satisfied it will pay me well to throw away all my other harrows and buy the Rotary.

J. E. Burroughs.

SKANEATELES, April 6 1871.

I have had Burdick's Rotary Harrow at work on corn stubble and sod, I have as good a square as I ever saw. I have had my harrow and Burdick's both at work at the same time, and Burdick's Rotary does more than twice the work mine does and remains in fact, my harrow is hardly any comparison to Burdick's. W. H. Stuart.

This certifies that I have used Burdick's Improved Rotary Harrow on my farm in covering grain sown broadcast, and it is the most perfect implement in the form of a harrow I ever saw.—I have harrowed several acres sown with barley and oats and am satisfied it is the interest of farmers to purchase Burdick's Improved Rotary Harrow as they can with it pulverize, mix, level the soil, and cover more grain than with two square harrows like the one I have, which is a new, square thirty-tooth harrow. It covers the grain evenly and does not draw the grain into bunches as other harrows do, but revolves continually, and having every obstruction behind that clog other harrows. Draft as light as my square harrow. Jasper Deland.

We, the undersigned, have seen the working of Burdick's Rotary Harrow on the farm of Mr. DeLand and fully endorse this statement. C. A. Branch

Ogden Shaw.

OMRO, Wis., Sept 13, 1871.

We the undersigned have witnessed the working of Burdick's Rotary Harrow on new breaking opening, and loose prairie soil, and it does twice the work of our ordinary harrows now in use and cannot notice any difference in draft. Also mixes and levels the soil better and fills up dead furrows. We consider it a great improvement on harrows.

Charles Rosenthal, Francis Poe, John Ross, T. Rogers.

ROCHELLE, Ill., Nov. 3, 1871.

I have witnessed the working of Burdick's Rotary Harrow on Mr. Minkler's farm, on a piece of ground that is more rough than ordinary breaking. I have never seen any implement that would pulverize or cultivate ground as fast as this does. It's a decided improvement on all drags heretofore invented.

David Boyle.

I endorse the above statement

Ross Boyle.

I have witnessed the operation of Burdick's Rotary Harrow on plowed sod which I considered a severe test. It does twice the work of other drags with the same labor, and leaves the soil in much better condition.

R. McCreery, Flint, Mich.

Every farmer who has witnessed its operations was at once satisfied of its practical utility. It revolves continually while in operation, so that stones, corn butts, or any obstruction of the kind can not clog it. The reason of this is the rapid rotary motion of the teeth. Therefore, as a pulverizer, soil mixer and grain coverer it has no equal. The ordinary harrow is simply a drag (whatever its form) and can, by dragging and cross dragging, cover the grain but partially and unevenly. We earnestly invite all farmers mechanics and business men to examine this harrow, feeling assured that it cannot fail to meet their highest approval.

For further particulars address

W. J. BURDICK,
Andover, N. Y.

Down they go!!!

Hunt & Burrows, at the Elk-horn Store, offer to the trade for the next thirty days, the following articles:

Ladies' Felt Skirts, sold at	$3,	for 2,25
