

Public instruction, still after several weeks, will be the more apparent... The Albany Express (rep) says of it: "In its present shape, the most appropriate title for the bill would be an act of self-education on the part of the Legislature." It seems to us an absurdity to say that the Legislature is not so competent to choose a Superintendent of Public Instruction as the Board of Regents.

Five years ago the sense of rectitude would have resulted at the suggestion of a committee of public opinion, but persistence in wrong and injustice rarely fail to reacquire further wrong to the thought first, and to the purpose afterwards. It is spreading away all the teachings of history and trampling under foot all maxims of moral government. To degrade the career and at the same time compel the people to receive it as equivalent to a virtue, would be a most tyrannical exercise and abuse of financial power, by a civilized government has ever been guilty in time of peace.

The millions of depressed, irremediable poverty, if treated as proposed, will be the law of distribution, which no human power can control, he ported in the city of New York, to abolish and substitute stock gambling, to bid the channels of industry with false tokens of value, an embargo on all honest transactions of business, to cause reactions in various departments of labor, by which the working classes are thrown out of employment, and the stake to its foundation the fabric of public credit.

It is a wonder that invades long faith all species, when so many wretched people are suffering from the cure of various diseases, but which when tried are found wanting. We have yet to see the result of the failure of Dr. Wistar's Balsam of Wild Cherry, to cure coughs, colds, and pulmonary disease. And all this time, while we thought we were curing the disease, the patient is being led to the Blackwell's Island, and has been a distinguished guest, with a great deal of attention, in the electric, it is infamous (Rochester Express).
