TO OUR READERS.

We are obliged to issue a half sheet this week, owing to our being absent making arrangements to enlarge the Advertiser and improve it otherwise.

We shall try and issue it next week, somewhat improved as well as enlarged. The change requires a good deal of labor as well as a large outlay of money, but we are in hopes to please our readers in the change that they will be glad to help us increase our circulation.

AN APPEAL.

The enlargement of our paper is costing us a large amount of money, and we want all who are owing us on subscription, advertising and job work, to call and settle the same immediately, as we must have what is due us forthwith. We mean business in this appeal. Let us hear from you immediately.

A Good Word for the Centennial.

The License Question before a Grand Jury.

Jon. Wm. Murray, of the Third Judicial District of the Supreme Court of this State, is holding a Circuit at Grand Island village. In his charge to the Grand Jury last Monday he told them there were but two kinds of licenses under the excise law of this State. One was to be drunk upon the premises, and did conform to the statute, and did not interfere with the peace of the community, and the other was to be drunk upon the premises, but who could sell to hotel or inn keepers, who could sell by the glass to be drunk upon the premises, the other applied to dealers who did not keep hotels, but who could sell in quantities less than five gallons, not to be drunk upon the premises. He charged the jury specially that if they found hotel keepers selling liquor or intoxicating drinks to be carried away from the premises to be drunk upon the premises, they must indict the persons so doing, as it was a violation of the statute. He therefore charged the jury that all saloon keepers who did not provide for guests in keepers, whether licensed or not, were, in his opinion, violators of the law, and must be indicted; that no license could protect a saloon keeper in the sale of intoxicating drinks, as there was no law to uphold them, and that this class of persons were the most dangerous to the community, being the places where young men for most part commenced their intoxication. He again stated that those persons should be indicted and their places closed.

History of the Grange Movement.

Among the many remarkable events of the year which is just drawing to a close, none is more worthy of patient and careful study than the important movement among the agriculturalists of the United States, which has been popularly termed the Grange Movement.

The rapid and astonishing growth of this movement, the formation of Farmers' Granges in every part of the Union, and the remarkable success that has attended every step of the Order of Patrons of Husbandry, have made it the most widely and anxiously observed of any of the movements of the day.

The people of the United States are deeply interested in it, and on all sides there is a growing desire to know more of it. Men cannot help regarding with a deep interest an organization which bids fair to embrace the whole agricultural population of an entire country, and which proposes to exert the enormous strength and power of this class of our countrymen as a compact and united force for the accomplishment of a definite object.

They naturally desire to know if this new and powerful element in our public affairs is to exert its power for good, or evil; whether it is to work for the good of the whole country, with a view to the welfare of the whole of our countrymen, as a compact and united force for the accomplishment of a definite object.
