REMARKS ON THE STATE OF THE COUNTRY.
The country is in a state of general depression. The price of grain is low, and the demand for labor is small. The farmers are suffering from the want of money, and the merchants are suffering from the want of goods. The government is in a state of confusion, and the people are in a state of discontent.

Hats & Caps.

Also a full line of

GROCERIES.

Cash paid for Tub and 100 Butter.

Dried Apples, Dried Berries, Eggs &c., taken

at the highest market price.

P. Vansickle.

Why Tilden Should be Defeated.
Mr. Samuel J. Tilden represents a party whose success would be disastrous to the State and the nation. In 1872 he would restore the corrupt and ruinous management of the public finances. In the nation it would stimulate the rebellious element of the South to renewed violence, and would disturb all the political and financial settlements which have been so carefully established. If the Democratic party should carry this State alone, it would stop all the splendid work accomplished by Governor Dix and would directly encourage the worst lawlessness at the South. This simple fact is sufficient to show that the State should be chosen Governor. But, besides the general political considerations, there are the most conclusive special and personal reasons why Mr. Tilden of all others should not be elected.

The first of these reasons is the fact that Mr. Tilden gave his countenance and support to the Tammany Ring down to the very period of its overthrow. We are not disposed to deny him his credit as a man, but we must not forget that he was not only a member of the Ring, but he was one of its most active members. He was one of its most active members. He was one of its most active members. He was one of its most active members.

The second reason why Mr. Tilden should not be elected is the fact that he has never exhibited any high public spirit. He has never shown any interest in the welfare of the State, or in the interests of the people. He has never shown any interest in the welfare of the State, or in the interests of the people. He has never shown any interest in the welfare of the State, or in the interests of the people.

The third reason why Mr. Tilden should not be elected is the fact that he is a man of low character. He is a man of low character. He is a man of low character. He is a man of low character. He is a man of low character. He is a man of low character.

The fourth reason why Mr. Tilden should not be elected is the fact that he is a man of low character. He is a man of low character. He is a man of low character. He is a man of low character. He is a man of low character. He is a man of low character.

The fifth reason why Mr. Tilden should not be elected is the fact that he is a man of low character. He is a man of low character. He is a man of low character. He is a man of low character. He is a man of low character. He is a man of low character.

The sixth reason why Mr. Tilden should not be elected is the fact that he is a man of low character. He is a man of low character. He is a man of low character. He is a man of low character. He is a man of low character. He is a man of low character.

The seventh reason why Mr. Tilden should not be elected is the fact that he is a man of low character. He is a man of low character. He is a man of low character. He is a man of low character. He is a man of low character. He is a man of low character.

The eighth reason why Mr. Tilden should not be elected is the fact that he is a man of low character. He is a man of low character. He is a man of low character. He is a man of low character. He is a man of low character. He is a man of low character.

party has ever in the same length of time done more to correct abuses of administration and to vindicate the principles of justice. When we took possession of the Government, there was a deficiency of \$2,000,000 in the Treasury. Moreover, we found that \$11,000,000 belonging to the sinking fund of the State, solemnly pledged to the public creditors, had been plundered and consumed in paying the current expenditures of the Government, in flagrant violation of the provisions of the Constitution. The deficiency referred to has been made up by taxation. The \$11,000,000 found in the sinking fund has been restored. The \$18,000,000 which constituted the capital of those funds at the close of the last fiscal year are intact. We have done much to put an end to local and special legislation, to check the multiplication of corporate privileges in derogation of the rights of the people, to withhold the application of the money levied by taxation upon the State at large of objects of local improvements, and to arrest the current of reckless expenditure which was encouraged and stimulated by fraudulent and dishonest transactions on the part of the municipal authorities of the city of New York, and the extravagant and unscrupulous appropriations of money by the Legislature, in excess of our revenues, which went out of existence in 1872. The question presented to the people of the State is whether the administration of that party shall be re-elected, or whether the Republican Party, which has extricated them, shall be continued in power to complete the reforms it has commenced and is laboring to accomplish, and which have given the State an honorable standing among disinterested men of all parties throughout the country. I cannot doubt that the popular will will be in favor of the Republican Party, and that we are laboring on the part to reduce the tax by payment and the other rigid economy in expenditures with our record for the last two years before the people. I do not fear that they will be misled by the representations of our political adversaries, or that they will be beguiled into their support by any promises of amendment in that quarter. In carrying out the system of reform in which we are engaged, we shall be greatly aided if the amendments to the Constitution, to be submitted to the people, receive their approval, more especially those which limit the powers of the Legislature, and which are so carefully considered in reference to this important subject. You need not be astonished, fellow citizens, of the importance of the coming election in other respects. The interests of the State are not alone involved in it. We are a United States Senator and members of Congress to elect. On the result will depend our ability to promote the welfare of the Union in its present and well-extended efforts to preserve the welfare of the country, to maintain its tranquility at home and to preserve its power on the world. The Congress to be elected will control the legislation of the country during the two remaining years of its administration, and it would be deeply to be approved if the people would support from us which we may need in any emergency that may hereafter arise, or in accomplishing any great measure which the public good may require. It is not a matter of course, State and National, at stake, no effort should be spared on our part to sustain the action of the Republican Convention at Utica, and to carry out the pledge contained in its address to the people. Standing on that platform, I am confident that, with proper exertion, we cannot fail to secure a triumphant victory.

What's the Matter?
The matter is that the country is in a state of general depression. The price of grain is low, and the demand for labor is small. The farmers are suffering from the want of money, and the merchants are suffering from the want of goods. The government is in a state of confusion, and the people are in a state of discontent.
