A-Great Engineering Project

One of the most prodigious engineer. ing: projects now on the tapin, in that for tunnelling the Rocky mountains under Tray's Peak, which rises no less than 14,441 feet above the level of the see, It is stated that at 4,441 feet below the peak, by tunnelling from east to week for 25,000 feet, direct communication could be opened between the valleys on the Atlantic slope and those on the P cific side. This would shorten the distance between Denver in Colorado and Salt Lake City in Utah, and consequently the distance between the Mis-The weatherwise, who claim to Philadelphia, made an assignment Francisco, nearly 300 miles, and there would be little more required in the way. of ascending or descending or tunneling mountains. Part of the work has already been accomplished. The conntry from the Missouri to the foot of the Rockies rises gradually in rolling prairie until an elevation is reached of 5200 feet exceeding 11,000 feet. Of the twentymost famous passes, only seven are below 10,000 feet, while five are upwards from which it is proposed to tunnel is sixty miles west from Denver, and, although one of the highest peaks, it is by far the narrowest in the great back-

Trades for Boys.

The following from the Altoona Tribune is worth careful perusal: "Nothing that a parent can do for his boy-Along with the trade there should be a fair education if possible, but the training of the hands is of more importance Queen Victoria is writing another than mere book knowledge. If a boy is in a fair way to become independent, Intellectual training alone, unless he possesses a good heart and more than will discover, if he does not already know, that four-fifths of their inmates have some sort of an education; they She can at least read and write. But he They were permitted to grow up in idleness, and from idleness it is but one step into vice and another into crime. The . R. ability to use one's hands is of the first His consequence. The young man who has a trade, whose moral and religious education has been carefully looked after by a good mother, and who has mastertion, is very likely to make a success of

Interesting to Labor and Capital:

The Boston Post says that an experiment in that phase of co-operation known as profit sharing has been in operation during the past year in the Westerly granite quarries of J. G. Batter-At Chicago last week coal advanced son, of Hartford. The yearly accounts predicted, and a large coal operator detailed statement-in dollars and cents upon the industry is declared by the proprietor after a year's trial to be very satisfactory. There have been na Seven hundred dollars have been strikes, the men have looked out for one another's work, which has consequently been well done; there has been no question as to the employment of union or and thus saved expense, and there has been no trouble with contracts.

In an instance when the unskilled laing granted with the understanding that it should be deducted from their statement of the financial result in The steamer Alesia, which arrived awaited with interest, as the plan seems in the lower bay at New York Friday of the difficulties in the relations in
