Laventions Patented by Women. That women can invent and can patent their inventions is shown by a review of the pater's issued to them. That three women should have patented three kinds of corsets, and four more should have unexpected when one finds that a woman has natented a new and user plumber's trap to prevent sewer gas from escaping into a house from a washborn But when it is found, as the fact in that press, and another a machine for miking , barrels, the right for which has been purchased by a great barrel making corrors tion, it becomes apparent that woman's intellect can grasp intricate mechanical movements, and combine them for the

benefit of the race. - New York Sun.
