

**THE ANDOVER NEWS.**  
ONE DOLLAR A YEAR.

HAMILTON C. NORRIS, EDITOR  
ANDOVER, N. Y., March 20, 1895.

Patriotic organizations threaten to become more plentiful than patriotic.

There is more dirty linen, in proportion, among the "400," than there is among the 4,000,000.

Some of the new parties which bloom with the early spring flowers will not outlive those flowers.

John L. Sullivan says he is going to turn farmer and raise corn, potatoes, etc., instead of what he has been raising.

The ex-Congressmen do not get so much fun out of hunting—for jobs—as President Cleveland does out of hunting for ducks.

The causes which produce revolutions in South and Central America merely result in the formation of new political parties in the United States.

It is quite plain that Carnegie, the Cramps, and others who profit by the building of battle ships, are well up in the art of manipulating Congressional legislation.

The corporations have few complaints to make against the Fifty-third Congress; they got almost all they wanted, and prevented action upon much they didn't want.

North Carolina is credited with producing more moonshine whiskey than any other State; likewise with having a larger per cent. of illiterates. Perhaps there is a connection between the two.

The much vaunted Cleveland backbone should be brought into play in connection with the law authorizing tariff retaliation against those countries which discriminate against American products.

The depleted condition of the Treasury seems to have "cut no ice" with Congress. To look at the appropriations made, one would suppose that, instead of being a borrower, the country had more money than it knew what to do with.

Although there are lots of people who say the municipal system by which Washington is governed—a board of commissioners appointed by the President—is the best in this country, no attempt has been made to apply it to other cities. Whatever that system may be, it is certainly un-American.

The people will have a chance to vote on the question of issuing \$3,000,000 worth of bonds for improving the Erie, Champlain and Oswego canals, the Governor having signed the bill providing that such a vote may be taken. It is safe to say that if the question were to be decided by voters of Allegany county, the bonds would not be issued.

One of the very few commendable acts of the last Congress was the passage of the anti-bribery bill, aimed at breaking up the transportation of lottery circulars, tickets, etc., by express companies. If the new legislation accomplishes its purpose as effectively as has the previous act excluding matter of the same character from the mails, the people of this country will soon be comparatively free from this insidious form of robbery.
