

ACUTE DYSPEPSIA

NEURALGIC HEADACHE OFTEN ATTENDS IT.

The Modern Treatment Consists in Removing the Cause.

(From the Republics, Cedar Rapids, Iowa.) Mrs. V. Curley, who has resided in Clarence, Iowa, for the past twenty-two years, tells an interesting story of what she considers rescue from premature death. Her narrative is as follows: "For ten years prior to 1894, I was a constant sufferer from acute stomach trouble. I had all the manifold symptoms of acute dyspepsia, and at times other troubles were present, as complication—I did not know what it was to enjoy a meal. No matter how careful I might be as to the quality, quantity and preparation of my food, distress always followed eating. I was despondent and blue, almost to the point of insanity at times, and would have been glad to die. Often and when I could not sleep. Sympathetic heart trouble set in and time and again I was obliged to call a doctor in the night to relieve sudden attacks of suffocation which would come on without a moment's warning.

"My troubles increased as time wore on and I spent large sums in doctor bills, being compelled to have medical attendants almost constantly. During 1892 and 1893, it was impossible for me to retain food, and water brashes plagued me. I was reduced to a skeleton. A consultation of physicians was unable to determine just what did all me. The doctors gave us as their opinion that the trouble was ulceration of the coats of the stomach and held out no hope of recovery. One doctor said, 'All I can do to relieve your suffering is by the use of opium.'

"About this time a friend of mine, Mrs. S.antha Smith, of Glidden, Iowa, told me about the case of Mrs. Thurston, of Oxford Junction, Iowa. This lady said she had been afflicted much the same as I had. She had consulted local physicians without relief, and had gone to Des Moines for treatment. Giving up all hope of recovery, she was persuaded by a friend to take Dr. Williams' Pink Pills. The result was almost magical. "I was led to try them from her experience, and before many months I felt better than I had for a dozen years. I am now almost free from trouble, and it through some error of judgment I feel badly, this splendid remedy sets me right again. I have regained my strength and am once more in my usual health. I sleep well and can eat without distress. I have no doubt that I owe my recovery to Dr. Williams' Pink Pills. I only wish that I had heard of them years ago, thereby saving great ten years of suffering and much money."

Dr. Williams' Pink Pills contain all the elements necessary to give new life and richness to the blood and restore shattered nerves. They are for sale by all druggists, or may be had by mail from Dr. Williams' Medicine Company, Schenectady, N. Y., for 50c. per box, or six boxes for \$2.50.

Early Electric Motors.

Joseph Henry, in 1831, was the first to construct a motor which worked by electro-magnetic attraction. The apparatus really has a better right to the distinction of being called the first electric motor than Barlow's wheel. Many other inventors followed Henry in devising forms of electro-magnetic motors. Jacobi, in 1834; Davenport, in 1837, and Page, in 1838, are particularly worthy of mention. Some of these early motors were by no means mere toys, but were of considerable size and power. Jacobi, of St. Petersburg, in 1838, propelled a boat twenty-eight feet long at a speed of three miles an hour; and Page of Washington, in 1821, succeeded in obtaining a speed of nineteen miles per hour with a car carrying a number of persons and driven by a sixteen-horse-power electric motor. This result is practically the same as that obtained from the most improved trolley cars of to-day; both in speed and power.

To be English one should have an egg tea and marmalade with toast for breakfast.

\$100 Reward. \$100. The reader of this paper will be pleased to learn that there is at least one dread disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly on the blood and destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address: F. J. Catter & Co., Toledo, O.

Sold by Druggists, etc.

Best of All To cleanse the system in a gentle and truly beneficial manner, when the Springtime comes, use the true and perfect remedy, Syrup of Fig. One bottle will answer for all the family and costs only 50 cents; the large size \$1. Try it and be pleased. Manufactured by the California Fig Syrup Co. only.

Health in Economy. A well man can do as much work as two men who are in the weather, and do it better. A box of Ripans Tablets in the office will save clerk-hire.

American sheep last year grew wool to the extent of 307,100,000 pounds. Dr. Kilmer's Swamp-Root cures all Kidney Troubles. Pamphlet and Consultation free. Laboratory, Birmingham, N. Y.

The end of the century piano stool has a back to it.

Earl's Clover Root, the great blood purifier, gives freshness and clearness to the complexion, and cures constipation. Price, 25c.

Winnlow's Soothing Syrup for children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 25c. a bottle. Halsey's Honey of Horchard and Tar is the best cure for whooping cough. Price, 25c. a bottle. Pike's Toothache Drops Cure in one minute. If afflicted with sore throat, use Pike's Eye-Water. Druggists sell it by the bottle.

FOR THE FAIR SEX.

SOMBRE HUES WILL PREVAIL FOR A BRIEF SEASON.

Black Gowns Reigning Favorites-- Bishop Sleeves Much Worn--New Materials for Tailor Coats.

Black gowns are the reigning favorites at present and will continue to take the lead throughout the spring months. Black satins, both figured and plain, diamantine-moires, crepons and various kinds of rough wool-goods are being made up into spring gowns, with the customary fancy waists combined with or entirely made of a contrasting color. Tailor gowns of black cloth are very fashionable and especially suitable for these Lenten days. And, like those of mixed tweeds and like colors, they are made with the short tight fitting coat, which is worn over blouses of lace or soft silk or chemises of white batiste trimmed with rows of cream Valenciennes lace.

A novelty in blouses is made double breasted and fastened with buttons well over on the left shoulder, tapering off toward the waist, where it is gathered full into a belt. A turn over collar completes the neck. This style of collar, however, is not the exclusive peculiarity of the blouse waist, for it is seen on dresses as well. Bishop sleeves are much used for the blouse waists and are easily managed under the coat. Some tailor dresses have the extreme full skirts while others are more moderate in size, but in either case they are cut short enough to clear the floor.

The new materials for tailor coats, to be worn with any and every gown, are heavy tweeds in which several colors are prettily blended, and the covert cloths in all the pale shades of tan and gray. They are made quite short, with some fullness in the back. The front may be either single or double breasted, and is finished with the usual revers. Fancy vests of pique and bright colored vesting are shown with the new tailor gowns, and are very similar to those worn last season. Street dresses of plain cloth, not tailor made, have sleeves and bodice like the skirt. One made of light tan cloth has a very full, plain skirt, a plain waist with a full blouse front, which pinches a little over the belt, of bright plaid silk, and is made whole to fasten on the shoulder and under the arm. The belt fastens at the back under a full, short bow, and the neck band is of dark red velvet, of one of the shades in the plaid. Over this is a turn down collar of white batiste, trimmed with rows of narrow cream lace. Cuffs of this material turn back over the red velvet cuffs which finish the sleeves.

Coats, cloaks and capes show so many styles that it is somewhat difficult to decide the most fashionable. Some of the electric seal capes are so grotesque and pronounced as to give the conservative in dress a real shock. New importations of black silk grenadines show many new and novel effects, sure to please the girl of the period. Military cross belts of white ribbon worn by the up to date young woman make them very conspicuous to the enemy. In leather goods a novelty is a pocketbook and cardcase combination that is just as useful as it is unique. What are known as throat necklaces are more and more in vogue in connection with the low cut evening bodices. All the newest imported French gowns have a modified puffed sleeve that gives the figure a better appearance. Lorgrnettes have become common and therefore are being abandoned by the society women who introduced them. Feather boas continue fashionable, allowing for so many imitations of them. The "real ostrich" is very quickly detected. Payette silk is quite the ideal material for tea gowns and evening dresses. It is kept by the leading dry-goods houses and comes in all desirable shades. For finishing the bottom of a waist soft bone is unequalled and does away with the use of canvas. As a stiffening skirt bone is the best thing possible and gives the flare now so desirable.

One of the marked features of the present fashions is the use of one material over another so that both can be seen. And sometimes three materials are employed, as for example, lace over chiffon for a blouse waist and these made over satin or silk. The fancy for silk waists fitted close and covered with gurgule lace is still with us and here is a model for any dark shade of silk. The lace is cut out in the neck like a pinatore and edged around with jet. The collar and belt are of velvet, and straps of velvet beginning at the belt in the back are brought around under the arms to the front, where they end in three loops clasped with a jet buckle. Silk tissue, such as was worn years ago, has appeared again and is delightfully soft and pretty for fancy waists. A pretty afternoon dress is of mauve brocaded silk, made with a blouse and apron panel of pale yellow accordion plaited silk and muslin over yellow silk. Mauve satin forms the belt, bow and collar, and lace epaulets fall over the sleeves.

FASHION NOTES.

All the new dress goods are voted "the prettiest ever seen."

The improved and elaborated shirt waist is to have a new reign.

Black silk and fancy waists are to be a fashionable combination.

The popularity of capes of every style shows no signs of waning.

Fashionable mourning has reached a stage that is almost ridiculous.

Floral sunshades to be introduced this spring will create a sensation.

There is a tendency to keep velvet in fashion throughout the summer.

Bodices with straps on shoulder for evening dress are alleged colonial.

Summer silks show an endless variety and at unusually reasonable prices.

Trilby fashions are numerous enough, albeit they are not wholly correct.

Hand painted linen fans on exhibition show what will be used next summer.

The "winged bonnet," going right and left, will be the fashionable headgear.

There is a fashionable caprice among women just now for silver fingerings.

Black, silver tipped bags are now worn by the girl of the period dangling from the waist belt.

In Paris women are wearing a long black velvet strip that has the effect of the clergyman's stole.

Whatever prejudice there may have been against green as a fashionable color has disappeared.

White broadcloth embroidered in gold are newest piano covers. They are sufficiently elegant to cause talk.

Knickerbocker yellow is the prevailing color in lamp shades. The effect upon room and company is soft.

Yellow lace is especially manufactured for trimming the big yellow lamp shades that are now so fashionable.

Coats, cloaks and capes show so many styles that it is somewhat difficult to decide the most fashionable.

Some of the electric seal capes are so grotesque and pronounced as to give the conservative in dress a real shock.

New importations of black silk grenadines show many new and novel effects, sure to please the girl of the period.

Military cross belts of white ribbon worn by the up to date young woman make them very conspicuous to the enemy.

Homing Pigeons at Sea.

Prof. Henri Marion, who is in charge of the pigeon service at the naval academy at Annapolis, thinks that the lessons of the past few days strongly demonstrate the efficiency of trained carrier pigeons and their value to maritime circles. For several years the officials of the naval department have been particularly interested in experimenting with pigeons, and under instructions from Washington Prof. Marion has grown and raised a splendid loft of hardy and intelligent birds at the academy. These are frequently sent down the bay on vessels, particularly on the summer cruises of the cadets, and liberated with messages from time to time. These experiments have so far met with favorable and satisfactory results.

Pat It Out.

What a little spark can do is illustrated by the burning down of Chicago, and the modern apparatus for putting out great fires. The spark too enters the human family with devastating effects; house we hear of so many deaths by accidents with fire among careless cooks and children. This is another field of operation—but a bottle of St. Jacobs Oil is the apparatus to put the fire out of the system. Used according to directions it will soothe, heal, cure and leave no ugly scar behind. The healing process gives new surface and kindly does its work.

Electricity in Japan.

The progress of electricity in Japan is said to have been very rapid. Since the introduction of the electric telegraph, in 1870, the length of the lines has increased to about 80,000 miles, including several submarine cables, of which the most important is that uniting Nippon, the prin-

cipal island of the group, with Tsouima, an island midway between Japan and Corea. Several vessels of the Japanese fleet are lighted by electricity, and the recent naval battles have given evidence of the skill of the Japanese in manipulating large search lights. The telephone has also been adopted with enthusiasm, and at Tokio the police and fire departments possess complete and perfectly organized telephone systems.

The Greatest Medical Discovery of the Age.

KENNEDY'S Medical Discovery.

DONALD KENNEDY, OF ROXBURY, MASS., Has discovered in one of our common weeds a remedy that cures every kind of Humor, from the worst Scrofula down to a common pimple. Send for Book. Manistee, Mich., Feb. 14, 1895.

Dr. Kennedy,

Dear Sir: I am the little boy you sent the Discovery to about six weeks ago. I used two bottles and also the medicine my sores were as large as a quarter of a dollar, and now they are as large as a ten cent piece and I feel much better. Mamma and I feel very thankful to you. I shall write again and tell you how I am getting along. I remain your little friend, ANDREW POMFROY, 88 Lake Street.
