

THE ANDOVER NEWS.
ONE DOLLAR A YEAR.

HAMILTON C. NORRIS, EDITOR
ANDOVER, N. Y., March 27, 1895.

The "new woman" is just as much interested in the spring styles as was her predecessor.

In view of certain things it doesn't appear altogether right that a man should have been arrested for fleeing members of the Fifty-third Congress.

A man committed suicide the other day on account of politics. The country would have done the same for the same reason long ago, had it been an individual.

It will be noted that the British lion and the Russian bear are taking steps to be in the neighborhood when Japan takes that mouthful of China. They may even "convince" Japan that the bite had better not be taken.

The United States Supreme Court reassembled Monday, and it is expected that a decision in the income tax case will be reached in a short time. The treasury department is especially interested, for an adverse decision would play havoc with the calculations which have been made of the government's receipts for the coming year.

The gradual approach of the year for the great national party conventions is marked, as usual, by the simultaneous remark of a number of western cities that their hotel accommodations are greater than ever. Some of the eastern cities, among them Buffalo, are also trying to convince the National conventions that their attractions and accommodations are ample to warrant the afore said conventions in registering at these places.

An electrical engineer in England, Sidney F. Walker, advances the somewhat startling theory that the day is not distant when science will not only regulate the weather, but climate, as well. In an article published in one of the technical papers he declares that "judged by the age of other branches of science, electricity is still an infant, with all its manhood's work yet to accomplish." He declares that the future of electricity holds in view first the gradual utilization of the forces of nature known as wind and water power, to the gradual displacement of coal. At irregular periods the world is startled by the cry, "What will become of us when our coal supply fails?" Long before that period is reached, Mr. Walker asserts, coal itself will have to fight for its life as an industrial product, just as gas is now doing, the antagonist being wind and water power, delivered where required in the shape of electrical energy. His views have been submitted to some scientists of this country, who, if they do not at once assent, are not disposed to deny Mr. Walker's propositions.

INDEPENDENCE NEWS.

Your correspondent has been on the sick list for the past week with a hard cold, or the distemper, which is quite general in this neighborhood. Messrs. Crittenden & Austin were in this part of the town last week, selling stock for the new railroad. I understand they met with some success.

Mr. Samuel Helmer of Almond, is visiting friends in this neighborhood. The Farmers' Alliance held an open session on Saturday evening at O. G. Clarke's. Supper was served and a general good time was had by all.

H. Kenyon expects to run his sugar bush by gas.

J. P. Remington has so nearly recovered that he is able to be out.

Miss Julia Harry is at Andover taking care of one of Dr. Comstock's patients. Miss Harry is a professional nurse.

Miss Nora Livermore has gone to

Belmont to spend the summer with her aunt, Mrs. Geo. A. Green.

This is dull sugar weather. I have heard of one or two who have made a little syrup. Everybody is ready when the sap runs.

THE ANDOVER NEWS.

Office, up stairs in Prest's new Brick Block, Main Street.

Hon. A. B. Cottrell, of Alfred, was in town Monday.
C. Lester of Richburg was in town the first of the week.

Mrs. L. A. Burrows visited relatives in Fillmore last week.

The back bone of this winter season is abundantly able to take care of itself. Surveyors are at work on the proposed macadamized road between Alfred and Alfred Station.

Misses Bertha and Leah Smith of Wellsville were guests of Miss Mar Richardson last week.

Miles Herrick has a position with the Epstein clothing house. He began work Monday morning.

G. M. Baker, who has been seriously ill with pneumonia, has been reported better for a day or two past.

Mrs. W. W. Kimble and Miss Irene Hunt of Hornellsville, visited J. W. Richardson and family last week.

Fred Smith left last Sunday evening for The Bend, Ohio. He expects to attend school at Ada, Ohio, the coming year.

The opening of the Epstein Clothing House will occur Saturday of this week and Monday of next week. Read the big ad.

Attorney L. C. Van Fleet went to Rochester Monday evening, on business before the General Term of the Supreme Court.

Mrs. H. S. Smith has been very ill with pneumonia for about a week past. At present writing her condition is slightly improved.

Wm. Perkins, the engineer who was so badly injured in a wreck about two weeks ago at Dyke's is recovering rapidly. —Hornellsville Times.

Volney McCann is home from Cornell College for a short vacation. He is accompanied by John Hoyt, a former student in Andover Union School.

Mr. and Mrs. C. A. Robinson are entertaining a young man, who arrived at their home last Thursday. He proposes to run that farm to suit himself hereafter.

The Canisteo Tidings has been purchased by James Osineup, a former employe of the Canisteo Times. Mr. Osineup promises to make improvements in the paper.

B. C. Cole, formerly of Andover, now of Stannards Corners, has been appointed postmaster at the latter place. His Andover friends will be pleased to learn of his good fortune.

The company of local talent who produce "The Lightning Rod Agent," are away on a trip to Whitesville and Glysses. They ought to draw full houses, and probably will.

There is a petition in circulation in And about Alfred Station to have the name of that postoffice changed to Plainfield. It looks like a tremendous job, but if done in good faith it will hardly come to pass, as there is a Plainfield Centre in Otsego county.

The locomotive of train one ran off the track at the west end of the sidetrack near Andover station Monday evening. The train had taken the siding to allow another train to pass, and the engineer tried to run onto the main track before the switch was turned. Nothing more serious than a short delay resulted.

Robert Cochrane, who resides on the Patterson farm in Elm Valley, met with an unfortunate accident this morning. He was sawing wood with a circular saw, which was running at a high rate of speed, when the saw burst, and a piece about 18 inches long struck him in the right jaw, cutting a gash about 2 inches long. Mr. Cochrane came to this place and had the wound dressed by Dr. Brainard. It is not thought that serious results will follow, other than causing considerable pain and inconvenience, and it seems remarkable that the injuries are not more serious.
