

**THE ANDOVER NEWS**

ONE DOLLAR A YEAR

HAMILTON C. NORRIS, EDITOR

ANDOVER, N. Y., April 17, 1895.

Unless there is a change in public sentiment annexation of territory will soon become an important question in national politics.

A fellow is under arrest in New York for swindling some wall street brokers out of \$15,000. If he will sell the scheme by which he did it, he can raise all the money he needs to pay any judgment rendered against him.

Postmaster James A. Hill of Paris, Ind., reported 2 cents as the entire receipts of the office during the last quarter. We suspect that the two cents is the amount paid by him for a stamp to put on the letter containing his report.

Some men never will let well enough alone. Thomas Punshon of St. Joseph, Mo., recently received a twenty-one year sentence for murdering his wife. He applied for a new trial and has just been found guilty of murder in the first degree and sentenced to hang.

According to the formula used by Armour & Co., as put in evidence in a case in Utica, N. Y., wherein the above company was plaintiff and the New York Commissioner of Agriculture the defendant, the following ingredients enter into the composition of 100 lbs. of oleomargarine: leaf lard, 34 lbs.; oleo oil, 27 lbs.; cotton-seed oil, 12 lbs.; salt, 9 lbs.; milk, 18 lbs. The person who has been used to eating good old fashioned sweet butter, made of good old fashioned cream, in the good old fashioned way, will probably not make a deligent search for oleomargarine after reading this item.

A prohibitory bill has been introduced in the Legislature of this State, and bids fair to become a law. It will not prohibit traffic in intoxicating drinks, however, but it aims at narrow wagon tires. It provides that no wagon made after the first day of January, 1896, for the purpose of carrying freight and merchandise and drawn by two or more horses, and having a tire less than four inches wide, shall be used by any person upon any of the public highways of this state outside of paved or macadamized streets and villages. The bill also provides that the proper municipal authorities of cities of the second and third class, and villages having within their limits macadamized streets, may regulate the width of the tires upon wagons used on macadamized streets.

At noon last Friday, the heavenly bodies which gravitate around the sun were in exactly the same position relatively to each other and to the earth that they occupied the day Christ was crucified. Not since the crucifixion day has this occurred, and it will be 2,000 years before it will occur again. Prof. W. H. Pickering of Harvard, said: "Of course this is simply a matter of calculating the relative positions of the heavenly bodies. During the past year I remember seeing in one of the astronomical magazines that it had been worked out, and for the first time since Christ was crucified Mercury, Venus, Mars, Jupiter and Saturn are in the same latitude in the sky. There is nothing of great importance to astronomers in the circumstance, but as a matter of general interest it can be said the same relative positions of these planets will not occur again on the anniversary of Good Friday for about 2,000 years."

**The Deering Roller-bearing Ideal Mower.**

Lightest draft of all. The Ideal was given highest honors at the World's Fair, because it showed a draft of only 85 3/4 pounds against 152 pounds for its highest competitor of the same width of cut. Since the Fair it has been winning hands down in every part of the world.

These steel rollers in the bearings change sliding contact into rolling contact, and make the Deering Ideal Mower move easily and quickly along through the most difficult crops. Its silence is golden, for noise means wear, and wear means waste.

SERRATED LEDGER PLATES hold up the fine grasses and press them against the knives. They make the Ideal Mower the only one that can run slow and do perfect work in difficult grass, and the only one that can stop and start as often as you wish without backing.

HORIZONTAL CRANK SHAFT AND VERTICAL CRANK WHEEL make the wonderful Deering pitman move easy and quickly backward and forward in the same line, like the piston of a locomotive, instead of jerking and wobbling like the pitman that is run by a slanting crank wheel.

ADJUSTABLE DRAG BAR makes it the work of only a few minutes time to bring the cutter bar back into line after years of wear have allowed it to sag back. No other mower has this provision. All other mowers are ruined before their time by the bar sagging back and throwing the knives out of register.

All the power exerted by the horses is used in cutting grass.

A boy isn't in it in this town unless he has a pair of "flappers." Careful estimates place the number of pairs now in use at four hundred and fifty or thereabouts. But we don't propose to utter a single word of protest. A pair of those sticks make sweet music when compared to the "squakers" which have occasionally been used.
