go pat of the colonial business. Among other departments of govactivity, the work of the Another! Blair looked at his reddene weether bureau during the last fiscal and important incident in the work at the bureau for the year was the extension of its field of operations, so ) as to include the West Indies and the shores of the Gulf of Mexico. was in large part dictated by considerations of a military and navel charactor, but in part also the departure was intended for the benefit of our Soon, round growing commercial interests throughout the West Indies and Central and South American countries. In the United States new observing stations have been established, mainly in the west and southwest, and a climate and crop centre has been located in Alaska. The volunteer who lay on the left It may interest statisticians to know ! that the bureau has undertaken the work of collecting statistics, which it

"enable those interested to determine he relative frequency of lightning Strokes throughout the United States.' The cycle show at one time, both in this country and in England, seemed to have outlived its usefulness. There seemed not to be enough that was new each year to warrant the trouble and expense of a large show. But either the cycling public yearly includes so Blair of (arge a proportion of new comers as to make what is old to others a novelty to them, or else the people found sufficient beguilement in the many souvenirs, together with the few novelties, to make them willing to support an annual exhibition, observes the New York Commercial Advertiser. At any rate, the recent show proved to be one of the best held in America. That burning question, the chainless wheel, will be the chief feature, and vext to it will come the automobile vehicles; for the cycle, from a fad, har come to take a similar place to that of the trolley cars in the public mind as a necessity with a certain pleasurable ness about it. The chainless wheel it. • problem on which everyone is work ing. Like the storage battery, it ap pears to be foreordained, but just in
