Examine the new oil cloth on the kitchen floor; its color and gloss are being destroyed and you may see where a cake of common soap fresh from the hot water in the scrubbing bucket has been laid on it for a moment, the free alkali having eaten an impression of the cake into the bright colors.

A more careful examination will show small "pin here" here and there where the alkali has cut through the surface to soak into and gradually weaken the whole floor covering.

This is what cheap soaps do. Use Ivory Soap, it will not injure.
