Mr. Eben E. Rexford, probably the best known writer on the culture and care of flowers, gives the following recipe for an insecticide that he has found to be more satisfactory than hellebore or Paris-green: Shave a quarter of a pound of Ivory Soap in water sufficient to cover it and dissolve upon the stove, then add five gallons of warm water. Spray this solution upon the plants with a florist's syringe, or if they are small dip them bodily into it. In either case be sure to reach every part. Let them stand has an hour and then rinse with clear water. Every aphis that the solution comes in contact with will be promptly killed. COPYRIGHT 1888 BY THE PROCTER & GAMBLE CO. CINCINKATI
