MYSTERY AT WELLSVILLE

'uman Bones and Relics Found by Workmen While Excavating for a New

son home.—Cuba Press.

-While workmen were excavating at Wellsville Friday for the new bank building a rather unusual find was made at a depth of six feet when a number of human bones were uncarthed, beside the heel and sole of an old army boot, a copper case, evidently belonging to an old-time watch, and some brass ferules.

The ground had not been disturbed since along in the 60's. Notwithstanding this fact, several hole's were found 14 which were perfectly square and which ran into the ground a depth of eight or ten feet. There was nothing + to indicate that am iron pipe or a wooden stake had ever been driven in the holes, yet they retained their i. * shape perfectly and are worn smooth. The Coats house was built some! bouse. The oldest inhabitants of Wellsville are unable to solve the . mystery of the strange discovery .-
