What we want, and this is the crux of the whole matter, is this: Place our note redemption so located in the United States that no banker will be out of the use of his money. FOR MORE THAN TWENTY-FOUR HOURS, and the cost of transmission paid by the government. Then bank note credits will be sent home when their mission is filled as directly and swiftly as now are checks and drafts, for the bankers will want the proceeds of the note credits precisely as they want the proceeds of their CHECKS AND DRAFTS.

Our present bank notes are a FIRST LIEN upon the assets of the banks issuing them. With this law remaining in force, taking the entire history of the national banking system down to 1901, the average tax upon the outstanding note issue after eliminating all the gov- tice? ernment bonds deposited to secure circulation from our calculation would have been EIGHT ONE-THOUSANDTHS OF ONE PER watha setting, twelve lines long, with r per annum to secure the payment of the notes.

In other words, the reserve of 5 per cent for current redemption and the proposed guaranty fund of 6 per cent would be sufficient last 1,375 years, and the annual tax of 2 per cent would be sufficient to pay the AVERAGE LOSS of eight one-thousandths of 1 per cent for 250 years.

The banks should pay the government the same for these note credits that they are usually paying on large balances—viz, 2 per cent

THEY SHOULD ALSO PAY INTO THE TREASURY THE SAME that "he who runs may read." The REDEMPTION FUND OF 5 PER CENT THAT IS NOW REQUIRED
