WALDO PONDRAY WARNEY

ONSERVATISM is often merely a polite name for being In a rut. There is, of course, a same conservation that Is progressive but cautious—the opposite of impulsive experimentation. But there is also a conservation that sticks to the beaten track because the groove is wern, so deep it is

speed in transportation and communication the whole motion of the world's activity has been accelerated. Theories ... which have bound the world for decades and centuries are parting like ropes of sand. Methods are outgrown season. Last year's automobile is a back number beside this sesson's model. The public is rapidly becoming educated in many things. Competition is growing keener. Few, indeed, are the conditions that remain untouched by this spirit of

It is a matter of vital importance to recognize these changing conditions, otherwise we are liable to be following outgrown methods while priding ourselves on our "conservatism." This is the lesson that many of the large and old-established business houses are learning—that the world is demanding something new every minute, and that it is turning to those who will supply it. Precedents are giving

Are you doing it in a way to receive substanti reiny day? If not, you will never have a better

In addition to our regular Certificates of Depos which draw 3 per cent interest, we have installed department for the constructions of those who wish to deposit their savings from time to time in an interest bearing account.

On these deposits we pay interest at the rate of 3 per cent per annum on the first day of January and July of each year on all amounts left for at least three months preceding these days. If the interest is not withdrawn it will be added to the principal, thus compounding semi-annually; These accounts are not subject to check, but

money may be withdrawn from them at any time upon presentation of the pass book The cut here shown represents a little recording

sale that we give out in connection with these special savings accounts, and is designed more particularly for the children. This safe is circular in shape and has separate compartments to hold cents, nickels,

dimes, quarters, half dollars, as well as an aperture for the deposit of currency if desired. Each compartment is solid and indestructable. The outer surface is beautifully finished and indexed, recording unerringly the exact amount of money deposited, which is visible at all times, so that the depositor always knows just how much has been saved. This safe is its own book keeper and accountant.

Begin the new year RIGHT by opening a savings account. One dollar will start one and you will be surprised how fast it will grow if you stick to it. Call and let us explain the matter more fully to you.
