# COUNTY POMONA CRANCE MEETING

# A Very Interesting Session Held at Cuba Last Week Thursday--Grand Master Godfrey Present.

The Allegany County Pomona Grange was held at Cuba, N. Y., June 23 and 24. The session opened Thursdey A. M., with an address of welcome by Moe Splegel of Cuba, and response by Robert D. Mingus of Andover. Both were ably given and appreciated.

Then followed the reports from the subordinate Granges of the county.

The Question Box conducted by the

lecturer gave many helpful facts and figures. Some of the questions were: Does it pay to feed grain when cows are on pasture? It was developed that it was highly profitable and that although plenty of grass was the best ration for the production of milk, what grain the cow would ear up clean would increase the production greatly. Many gave remark able yields. Averages showed abou clean would increase the pro-43 lb of milk per cow per day with grain against 20 to 25 lb withcut grain on good pasture.

Another question was how to cradicate or subdue weeds such as paint brush, wild morning glory, etc. Another; Should subordinate Granges incorporate to simplify cooperation in buying and selling. The answer was emphatically "Yes." answer was emphatically "Yes."
Discussion on how to make a
cesspool sanitary in town or country was another valuable point. Other questions of minor importance yet were discussed.

Thursday p. m., an able address by S. E. Strivings of Castile gave the Grangers an insight into the advan-tages of countywide co-operation in buying and selling, sometimes showing savings of hundreds of dol-

Thursday evening working of the Fifth degree with 26 candidates, followed by an open session during the address by State Master F. N. the address by State Master F. N. Godfrey on subject of a "Higher Education for the Young Man and Young Woman from the Farm," along the lines which would give them an interest in the soil and encourage them to return to the farm to help make it a success instead of drawing them away to have their places filled by foreigners both on the farm and in the government of our

Friday, a. m., Mrs. J. B. Flint of Scio gave a tilk on canning, how to can tomatoes, corn, green peas, and beans etc., so that they will keep. This was very valuable to the inexperienced and less successful of the ladies in that department of the

family economy.

Friday p. m. A talk on "Every Day Living," Mrs. G. Murray Brown, Lecturer of Cattaraugus County Pomona Grange, gave some ideas which if followed would make the world a lot better. The principle theme was, "It matters not what we

we called to do but rather how well we do that which we have at hand." There were other addresses, all good and giving out zeal and instruc-

tion in each and every one.

The music for the session was furnished by the Cuba Grange, and the Fifth degree was worked by Centerville Grange. The session closed Friday, p. m., having been one of great interest and profit to every one

COUNTY JAIL INSPECTED.

Building Be Enlarged Without Delay.

Clifford M. Young, inspector for the state prisen commission, has completed his inspection of jails and lockups in Allegany and Steuben lockups in Allegany and Steuben counties. In each county he found places that were inadequate, while many were found to be in good con-

The Allegany County Jail at Belmont was found to be entirely in-adequate: The inspector says be found adults, minors, court prisoners and those serving sentences mingling One of the prisoners was charged with murder. As that system has long been recognized as a school of making criminals, the inspector re commends that the jail be enlarged without further delay so that the law regarding classification of prisoners be complied with.—Repor-

## WILLIAM K. BESS.

William K. Bess died at his home n Ress Hill. two miles southwest of Andover, Wednesday morning, of Peritonitis, aged 72 years.

Mr. Bess was an old resident of the town of Andover, having lived here over sixty-five years. He was born in the town of Greenwood, N. Y., December 22, 1838, moving to And-over with his parents, sixty-five years ago and has since resided here. He was an industrious hard working farmer and had been very suc cessful in a financial stanpoint. He was unmarried, and was the son of James Bess, who died in December 1901, and Isabelle Kennedy Bess who died several years ago.

He leaves two sisters, Mrs. Eliza Vasburg, and Miss Nellie Bess, of Andover, and one brother, Lawerence Bess, also of Andover.

Funeral services will be conducted this (Friday) afternoon at the late home on Bess Hill at 1 o'clock, Rev. H. D. Bacon officiating. The inter ent will be in the family cemetery

ed at the Lily hardware in Belfast net an accidental death while at work in that place June 18th. He was engaged in putting up eave troughs on a building when he suddenly fell backward to the ground. In falling he struck his temple on the corner of an open door causing almost instant death.

Mr. Wuun. Wildman, or "Ber amiliarly called by was familiarly called by his as one-third, thus saving about sociates in this place was a resident Now with mechanical transport here for several years and with his Saturday, July 2, to elect a new chairman in his place, says the Elmtra Advertiser.

Mr. Fassett has announced that The remains were taken to Whiteshe will retire from the official lead ville, his birth-place and former hone. where funeral services were held in the M. E. Church and interment made in Hillside cemetery.

# An Andore By Takes a Wellsville GOOD RESULTS IN

### Many Criminals Improved in Conduct Without Imprisonment-Additional Probations Officer to be Appointed.

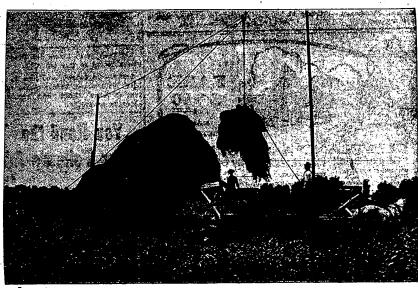

The results of the probationary treatment in the cases of nearly 200 offenders placed on probation by County Judge Taylor and the Supreme Court justices in Eric County during the past fifteen months have re-cently led the Board of Supervisors of that County to make an appropria-tion for the employment of an adtion for the employment of an ad-ditional probation officer from July first. Many offenders, who formerly first. Many offenders, who formerly would have been committed to Elmirs Reformatory or Auburn Prison, are now being made into law-abiding citizens through the work of County Probation Officer Edwin J. Cooley.

The case of a nineteen year-old youth, who had previously been arrested four times and committed to institutions three times, fillustrates the character of the manifestimes. the character of the work done by Mr. Cooley. The young man was placed on probation for criminally receiving stolen property. An investigation by the probation officer before the court had disposed of the case, showed that the offender at the time of committing the crime was drunk. Because of this mitigating circumstance, and because the probation officer believed the young man's delinquency resulted chiefly from undesirable companionships and was curable, the court decided to give the efendant a chance to improve under probationary influence. As an out-come of the probation officer's ad-vice, assistance and friendly intervice, assistance and friendly meest, the young man since being put on probation has worked steadily, has associated with better companions, has improved his habits, has moved to a better neighborhood, and has contributed regularly to the support of his home.

When Mr. Cooley recently appeared before the Board of Supervisors to ask for an assistant, his work was nighly commended by County Judge Harry L. Taylor, District Attorne Dudley, Sheriff Jerge, Superintendent of the Poor Herbert S. Sisson, Fred-eric Almy, Secretaryy of the Buffalo Charity Organization Society, and Frank E. Wade of Buffalo, a member of the State Probation Commission.

Judge Taylor recognizes that many a home already prepared for his bride. The best wishes of a host of friends will follow them to their new of the persons indicted for crime are more weak than wicked ,and he is a hearty believer in the efficacy of probationary treatment properly ap-plied. He says he believes probation has solved the greatest problem what to do without crimins namely, how to make men of them

enlargement of the probation force, testified to the financial benefits of probation in reducing the number of commitments, and in making men support their families. Men convicted of abandoning their families are frequently required to pay a fixed amount of money each week through the probation officer for the support

Hoisting Alfalfa in Kansas, Showing that the Automobile is a Power Plant on Wheels

tonnage of 200,000,000—a conservative estimate has been pointed out— and an average haul of ten miles, here is here a saving of \$440,000,000 annually. If every wage earner, man, woman or child, in the United States contributed a week's wage each year they would be unable to meet this charge, and yet it indirect ly comes principally out of their pocket, for it is included in the an-nual food bill of the nation.

The direct effect of - mechanical haulage in reducing the cost of living would, however, be inadequately re presented by the sum mentioned. In the first place, when horses are being used to draw produce to the mar ket, or to the shipping points, regular work of the farm suffers Again, there is a limit to a horse's endurance. It is only capable of somany hours' work in every twenty four hours. Moreover, a horse's wor cannot be concentrated. It can only lo work at a cretain rate. In othe words, it is impossible to make quick job of horse haulage by moving heavy loads quickly. Bulletin No. 49, issued by the Bureau of Statistics of the U. S. Department of Agriculture, says (of horse haulage): "The cost trip, he might save \$25 on a crop of 1000 bushels if he could make two trips a day; er, if he still made but one trip a day but could increase the

possible, and each individual low-would be greater than with horses. Bulletin 49 also remarks that "Waste and rest are believed to be important the round trip. \* \* Knowing that the trip will 'spoll' a day, that there will not he time enough left for any considerable amount of work at home, even if he can reach there an hour or two earlier, the driver will not have much inducement it puts within the reach of the hours. In hilly country farmers (Continued on Editorial pass

prepared and served by Mrs. Phil co-operative idea. Take, for example the collection of milk from a grout of farms of a morning, and its de-livery at the depot or creamery. It is quite common for farmers to club Horan drove to Hornell in an automo bile, and from there took the train for Atlantic City, where they will spend the honeymoon. On their re-turn the young couple will make their together to buy a threshing machine for which they have individually only occasional use. Still more practical would be the co-operative ownership of motor wagons, which would thus e kept in continuous daily service,

supplies all the year round. Coming now to the indirect benefits which would follow in the train of the rural motor car—that is, benefits CHEESE & BUTTER MARKET. other than the saving which can be effected in the cost of haulage perhaps the most important would be the resulting change in the social character of country life. Man is a social being. His nature demands 1300 boxes of flats were sold at bane of farm life has hitherto been its isolation and hence its narrowness and while good roads undoubtedly can do much to remove this 1,333,600 lbs. curse, the automobile can do more. To quote Mr. Frederick once more: "The horses are needed of wagon transportation would be lowered if the size of the load were increased or the time of the round trip shortened, or if both changes were effected. \* \* If it costs a farmer 5 cents per bushel to haul this wheat to the shipping point when he requires one day to make a round and are trip. The first wife and family are therefore practically prisoners for a large part of the year. They are at the mercy of distance. Such a condition cramps them, stunts them, and are tripled to the shipping point when the requires one day to make a round and are tripled to the shipping point when the requires one day to make a round and are tripled to the shipping point when the requires one day to make a round and are tripled to the shipping point when the requires one day to make a round and are tripled to the shipping the requirements. and drives the children to the cities in search of more life and companionship. It has been the sad cry of the farm and village for Bert," as he might reduce the cost of Muling by dby his as one-third, thus saving about \$17."

"Bert as he might reduce the cost of Muling by dby his as one-third, thus saving about \$17."

Now with mechanical transport

respect a new condition. It puts farm three or even four trips would be possible, and each individual load nwould be greater than with horses. Bulletin 49 also remarks that "Waste time, it is always at hand in the round trip. \* Knowing that the trip will spoil' a day, that the trip will spoil' a day, that for any considerable amount of the considerable a not. On Sundays and holidays long trips up to one hundred miles can be comfortably made, and every day (Continued on Editorial page.)
