Always Ready for Emergencies

A DISASTROUS FIRE occurred on May 16th at the factory making our Russelloid-Up or Down-Shingles It is esning of the season. The sale of Russelloid-Up or Down -SHINGLES has been phenomenal, They have met with universal approval wherever they have been shown.

We had but a limited stock on hand at our warehouses—just about sufficient to fill orders on hand. While the time when we will be able to resume operations is indefinite, our latest advices are to the effect that some of the machinery was not so badly damaged as it appeared to be at The work of reconstruction is being rapidly pushed forward, and not a day will be lost; but, of course, until we resume operations we will be unable to accept orders for the Russelloid -UP OR DOWN-SHINGLES. Fortunately, however, we have another invention of shingles which we had not expected to

bring out just yet, for the reason that we thought it was enough to start one good thing at a time; but on account of the fire we have decided to introduce to you at this time our Russelloid Tile Shingles, upon which patents are now pending. In presenting them to you we have no apologies whatever to make. We do not bring them out prematurely, as they have been time tried and tested through a whole season. They have withstood all kinds of weather and are absolutély dependable in every way. Now that we have brought out our Russelloid Tile Shingles we wish to state that it is not to

bridge over the time until we can resume the manufacture of Russelloid-Up or Down-Shingles. but that they are out to stay; and our two great specialties, Russelloid-Up or Down-Shingles and Russelloid Tile Shingles, will run hand-in-hand, each kind suiting the individual tastes of Resselloid Tile Shingles are so different in their construction and in mode of application from
