

Have You Ever Been Broke?

It probably was your own fault, no matter how much you may try to convince yourself to the contrary, for if you had commenced saving when you began earning and had kept on saving something from each pay day, you would have had money on hand for a rainy day when it overtook you. We suggest this as a reason why you should be saving a part of your earnings every week, even though the amount be small.

There is no better way to do this than by opening a savings account at this bank. We pay 3 per cent interest on such deposits and \$1.00 will start you.
